

Kidney: mixed-model coding patterns

Additive lead CS: 93.8%; overall: 85.3%; over-additive (FDR 0.59)

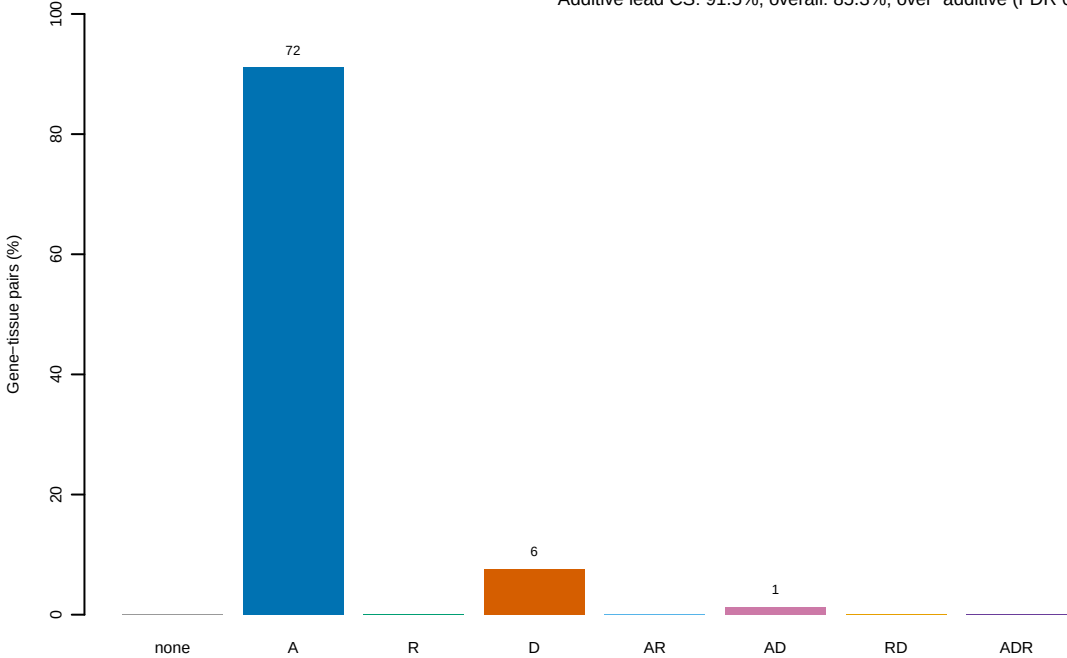

Kidney: CS lead SNPs around the TSS

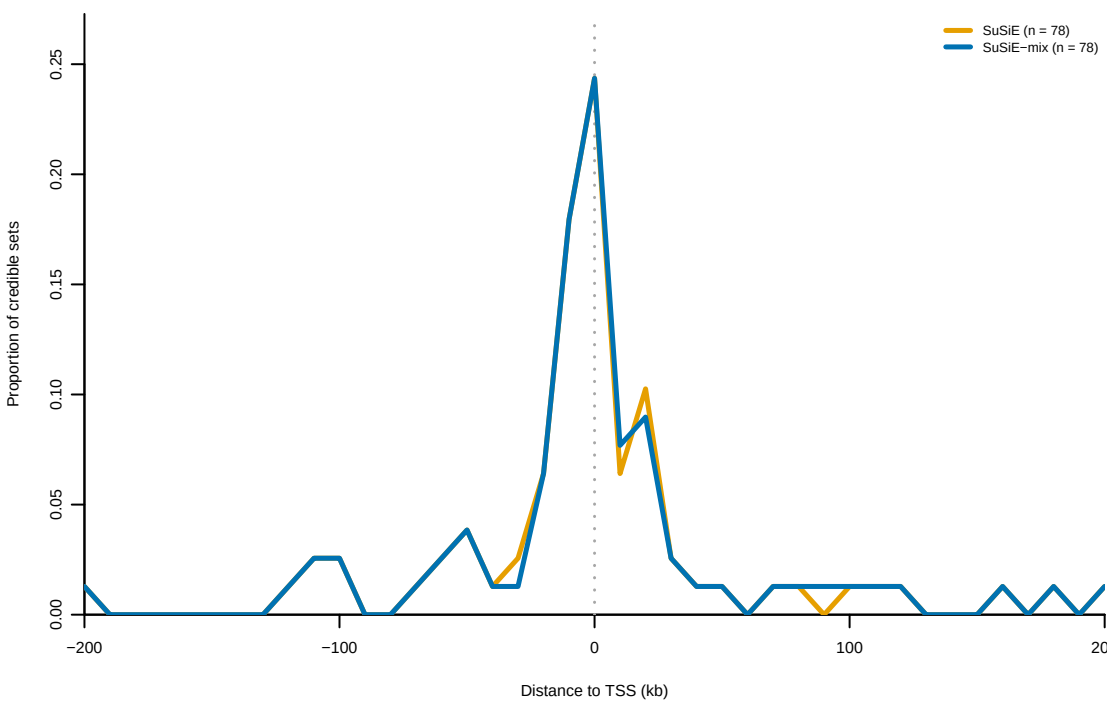

Uterus: mixed-model coding patterns

Additive lead CS: 91.5%; overall: 85.3%; over-additive (FDR 0.53)

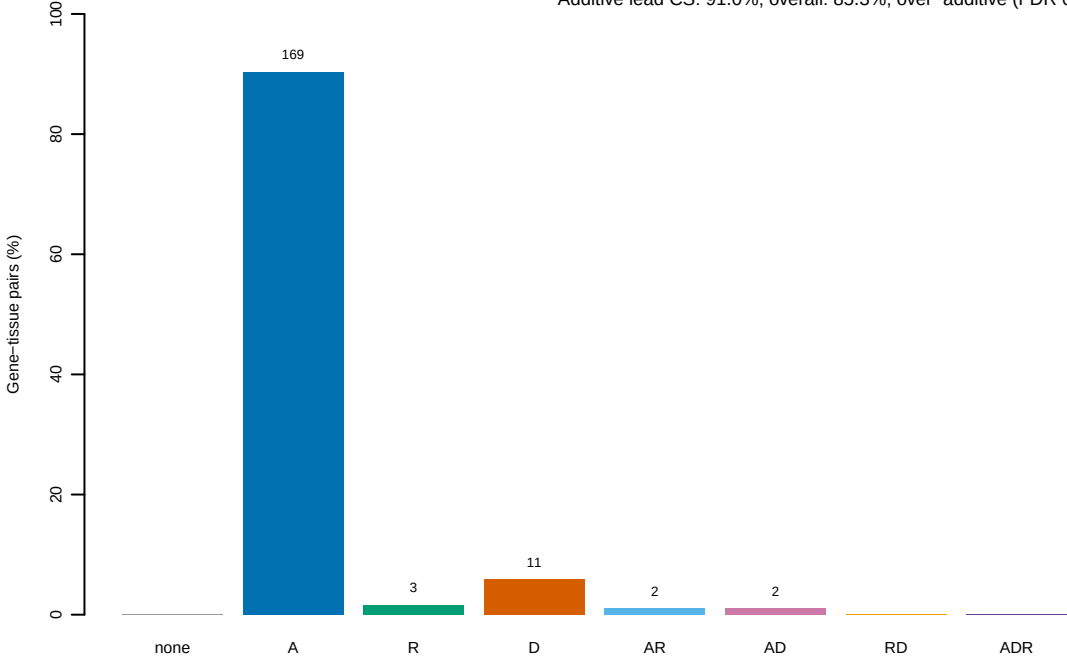

Uterus: CS lead SNPs around the TSS

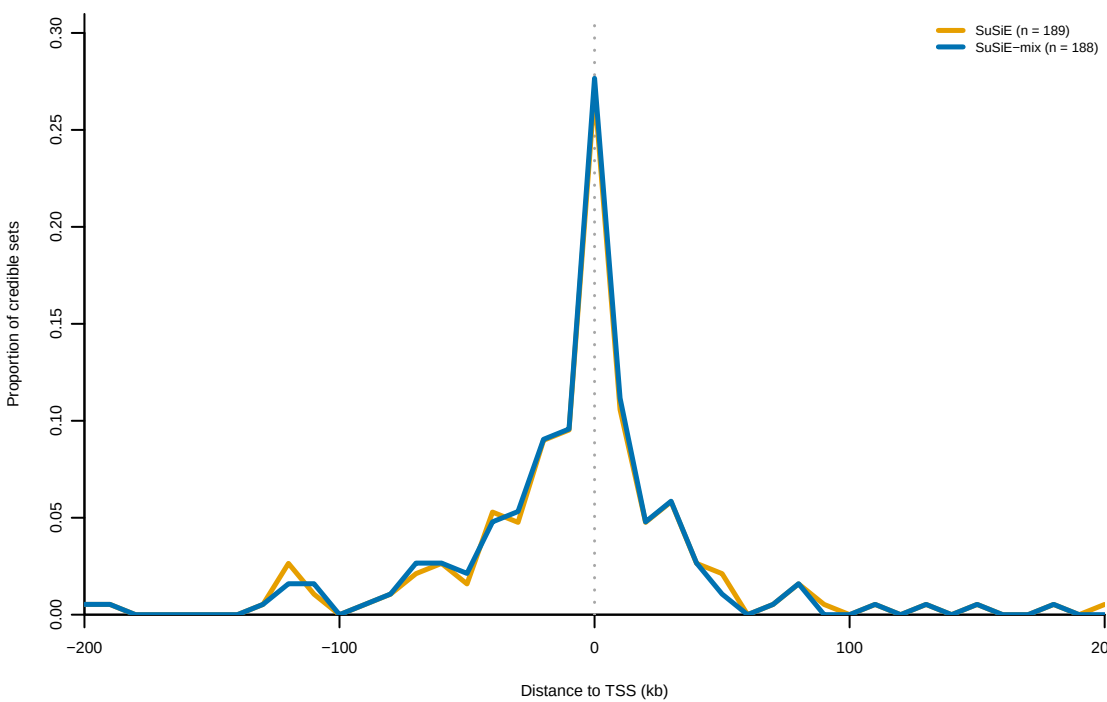

Prostate: mixed-model coding patterns

Additive lead CS: 91.0%; overall: 85.3%; over-additive (FDR 0.27)

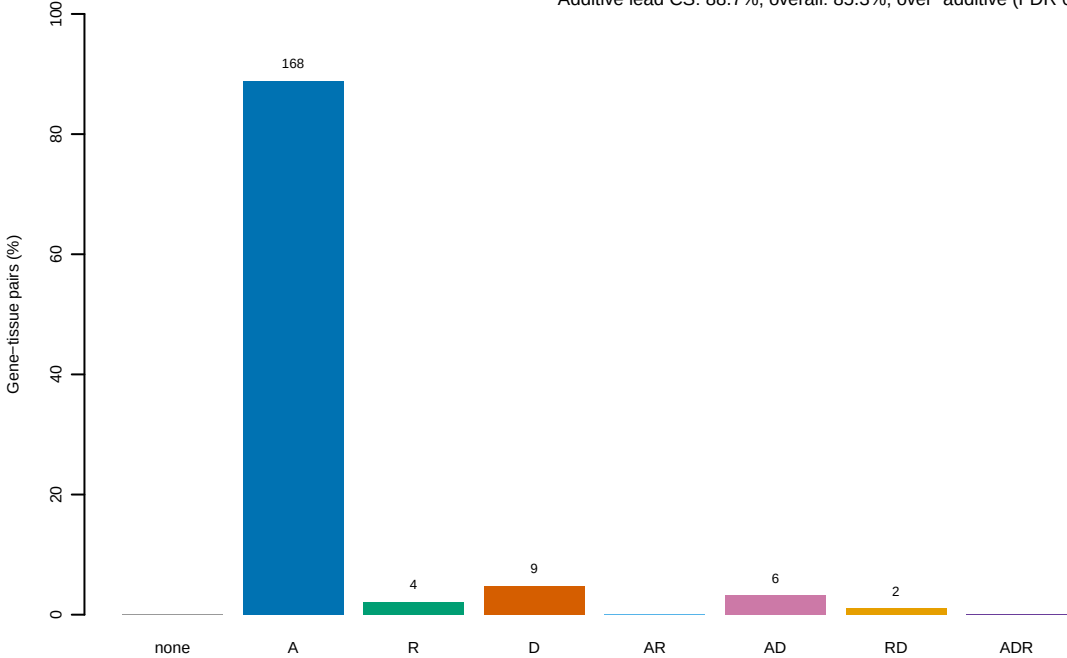

Prostate: CS lead SNPs around the TSS

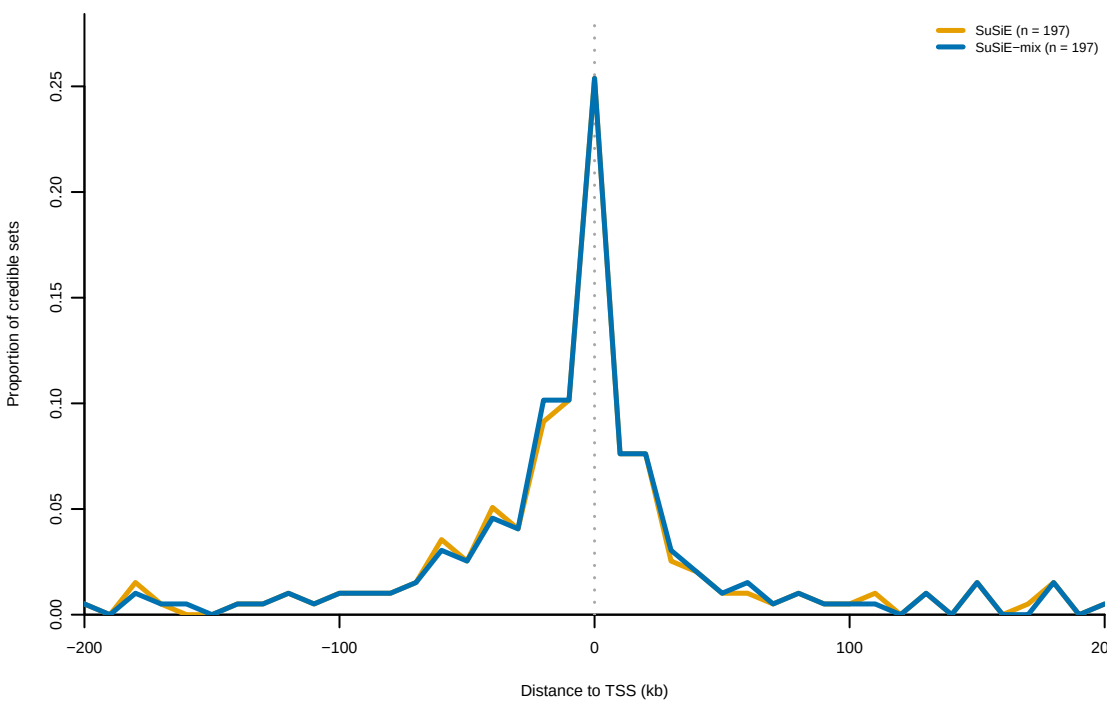

Stomach: mixed-model coding patterns

Additive lead CS: 88.7%; overall: 85.3%; over-additive (FDR 0.59)

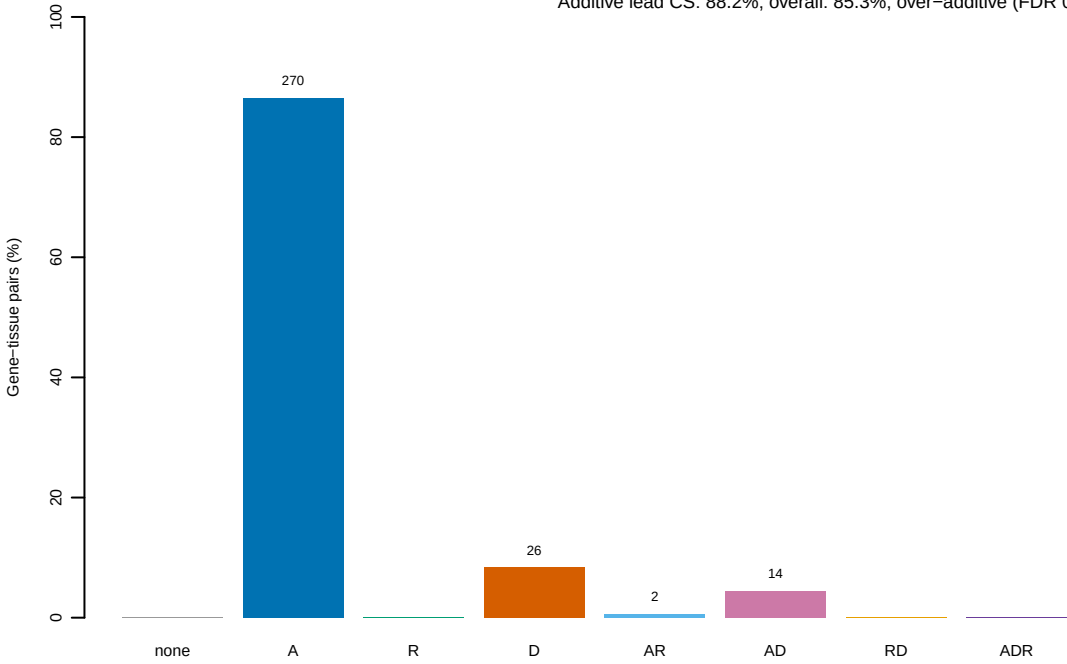

Stomach: CS lead SNPs around the TSS

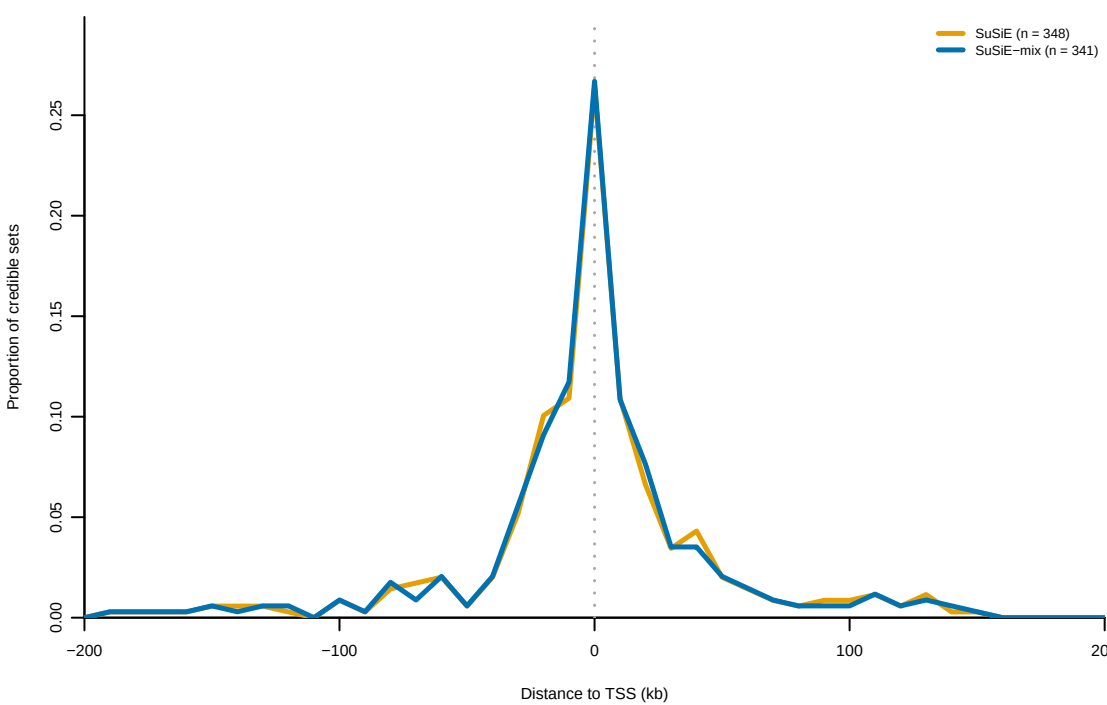

Heart: mixed-model coding patterns

Additive lead CS: 88.2%; overall: 85.3%; over-additive (FDR 0.53)

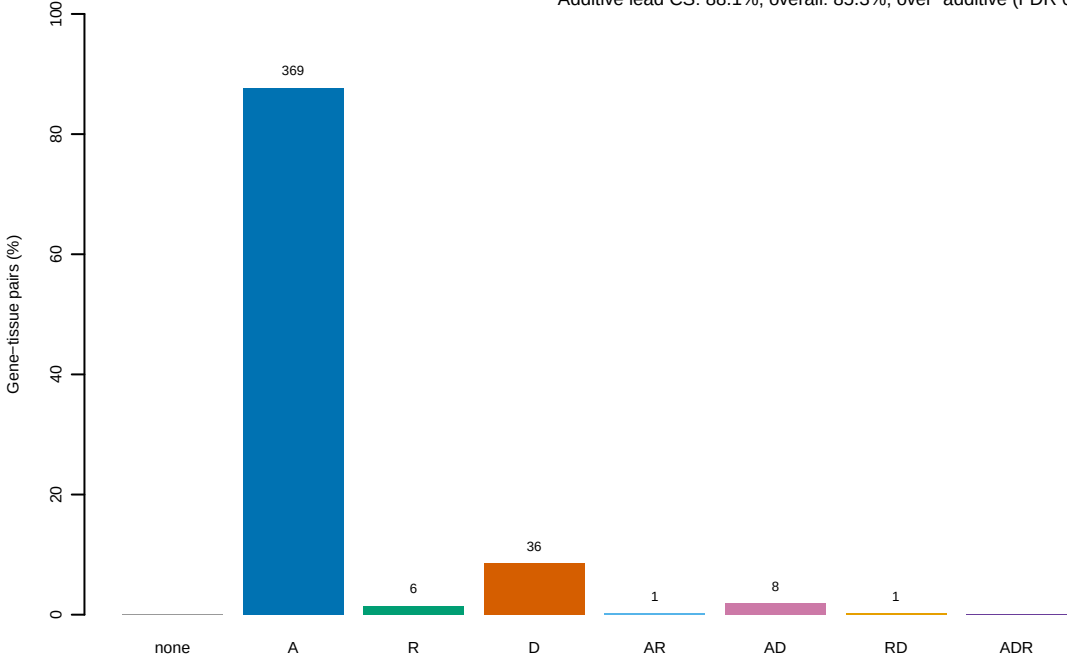

Heart: CS lead SNPs around the TSS

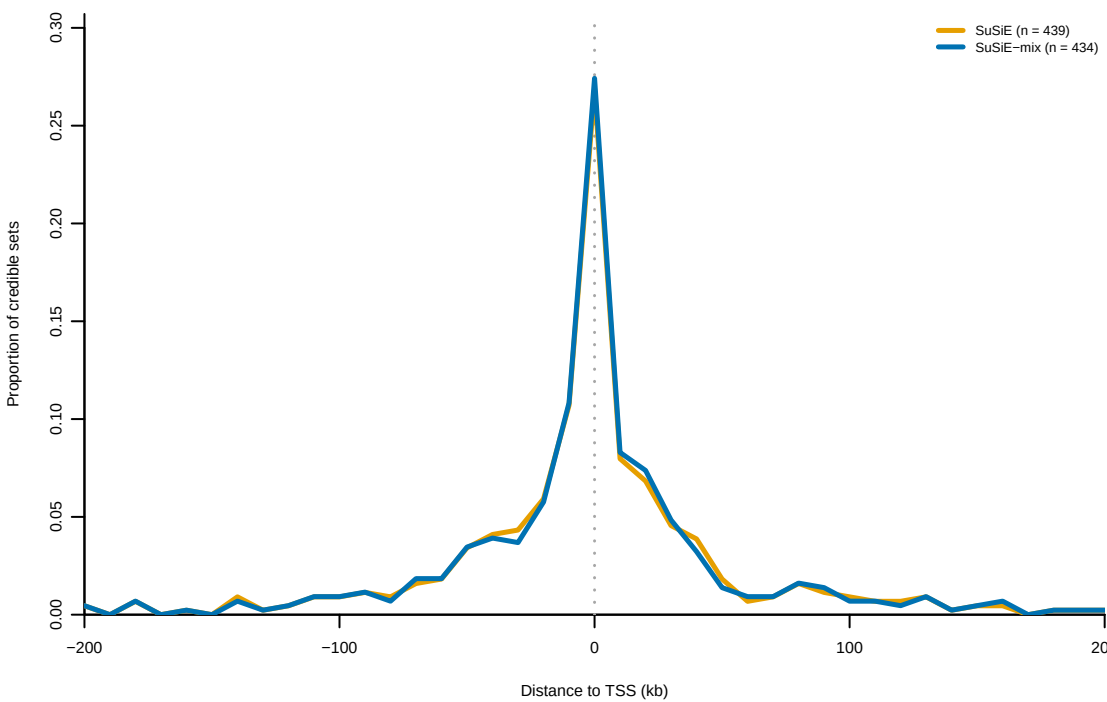

Spleen: mixed-model coding patterns

Additive lead CS: 88.1%; overall: 85.3%; over-additive (FDR 0.53)

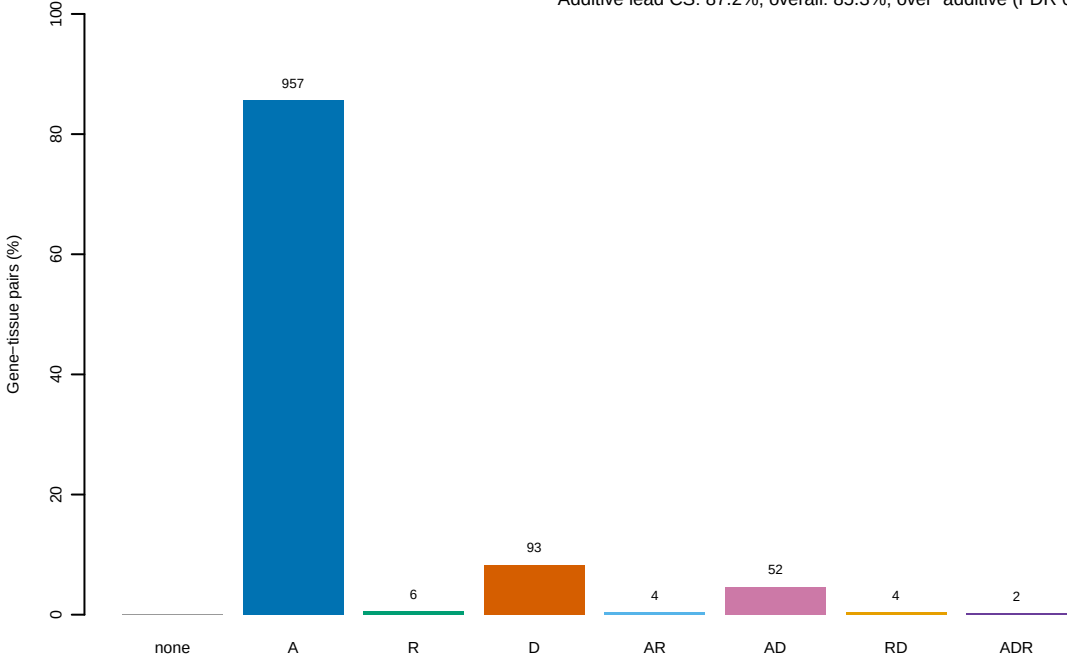

Spleen: CS lead SNPs around the TSS

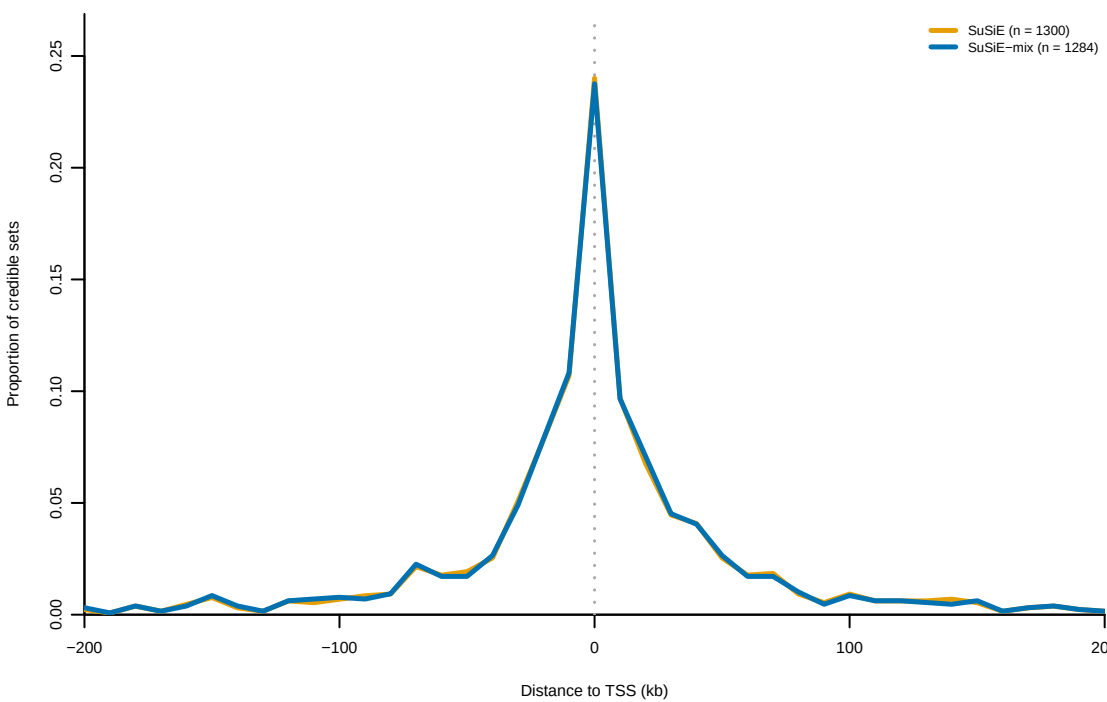

Nerve: mixed-model coding patterns

Additive lead CS: 87.2%; overall: 85.3%; over-additive (FDR 0.34)

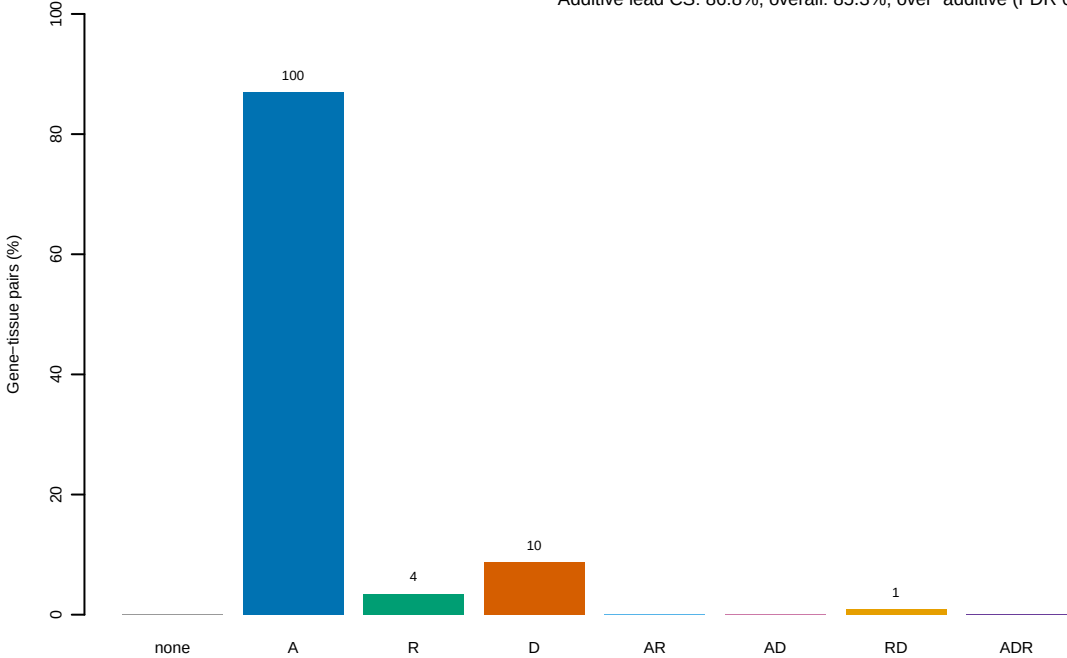

Nerve: CS lead SNPs around the TSS

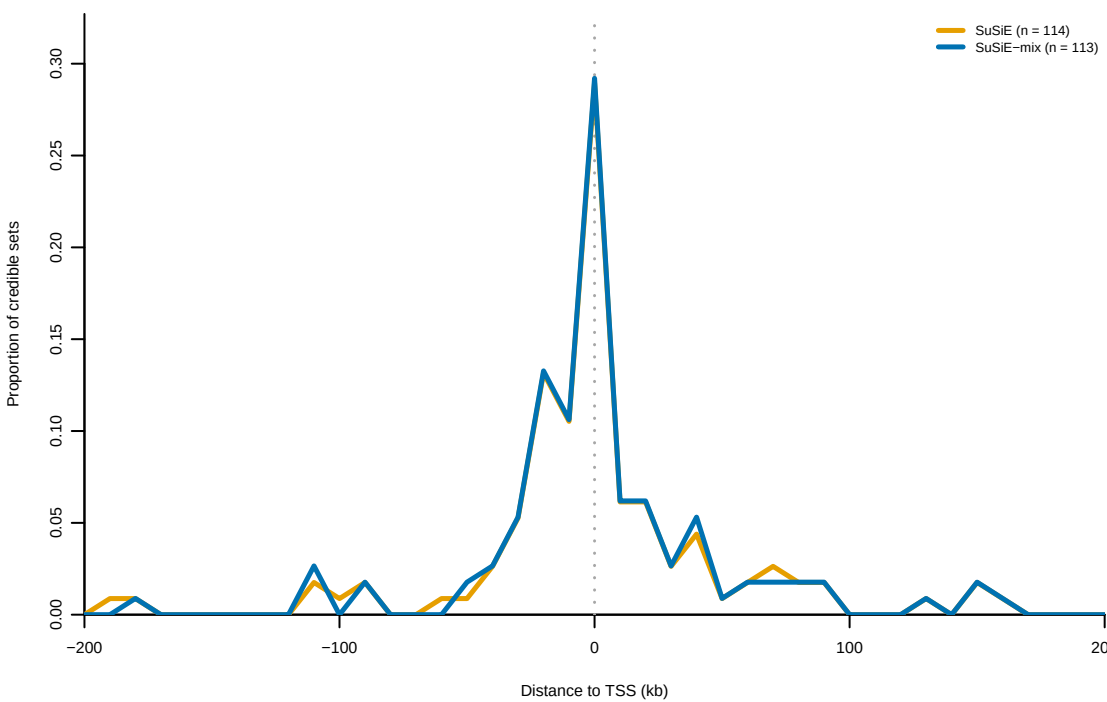

Small Intestine: mixed-model coding patterns

Additive lead CS: 86.8%; overall: 85.3%; over-additive (FDR 0.99)

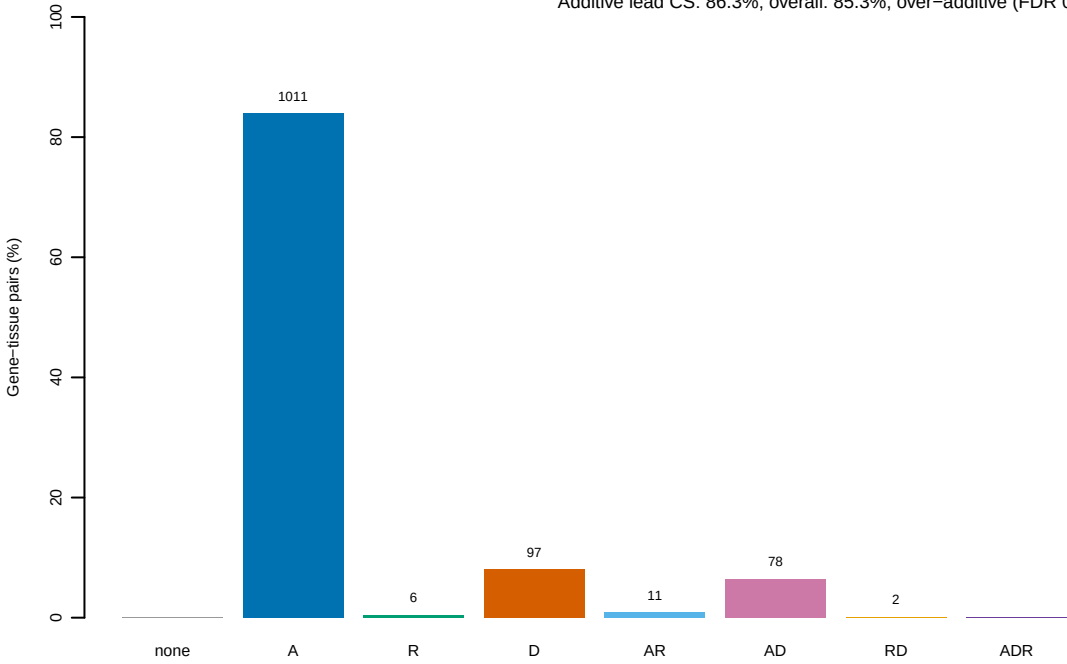

Small Intestine: CS lead SNPs around the TSS

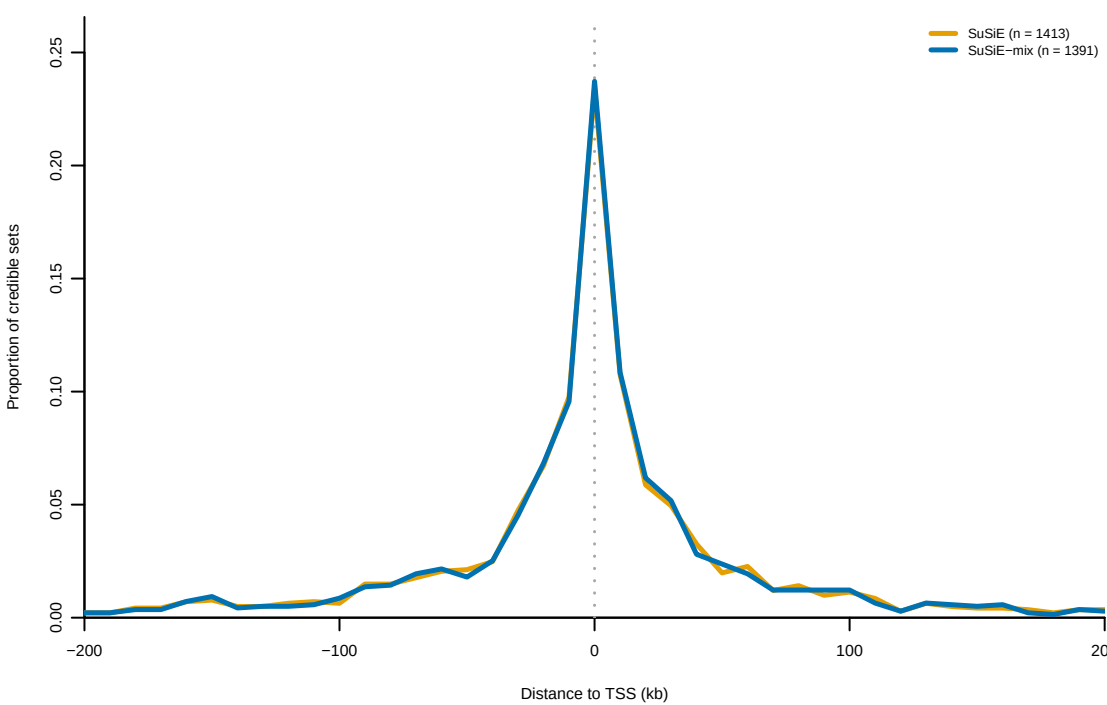

Thyroid: mixed-model coding patterns

Additive lead CS: 86.3%; overall: 85.3%; over-additive (FDR 0.67)

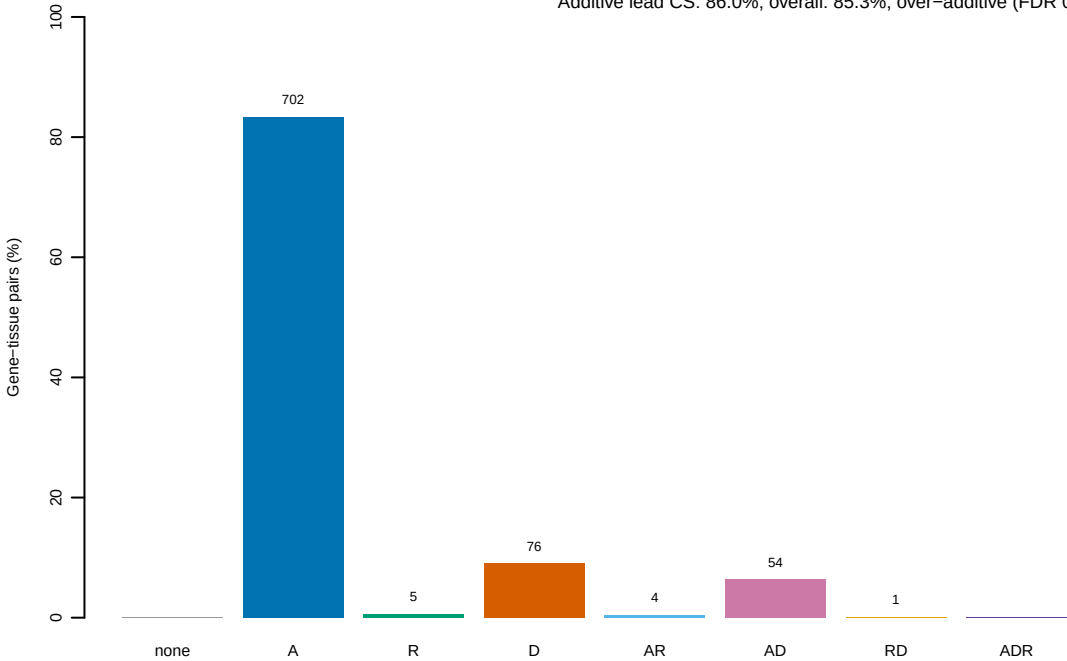

Thyroid: CS lead SNPs around the TSS

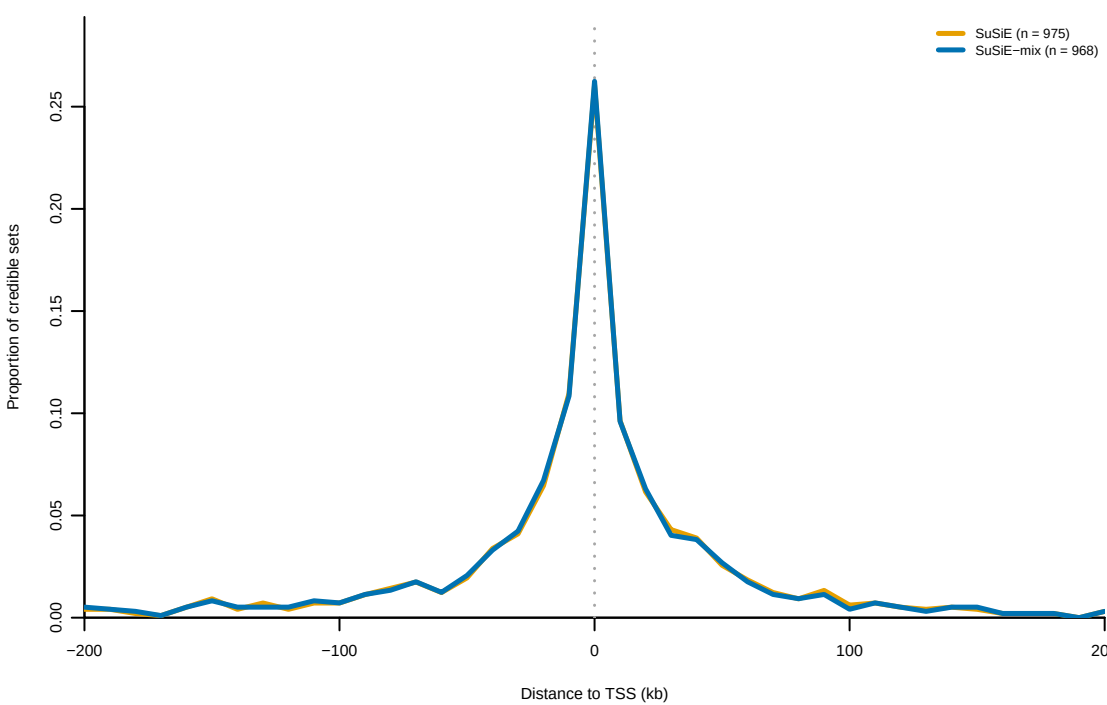

Blood Vessel: mixed-model coding patterns

Additive lead CS: 86.0%; overall: 85.3%; over-additive (FDR 0.94)

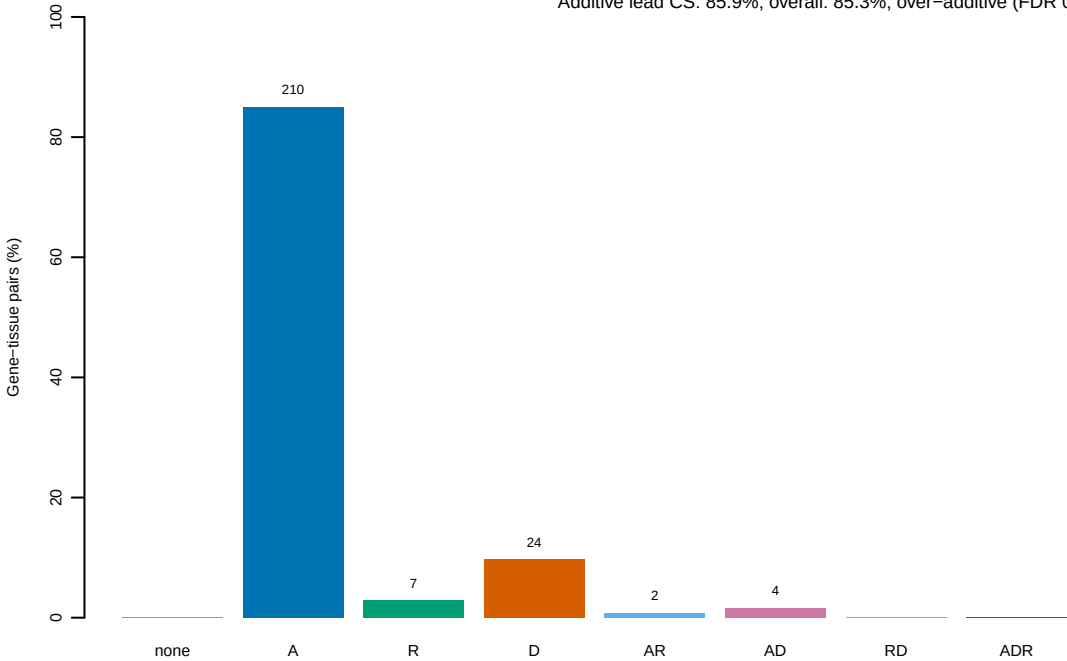

Blood Vessel: CS lead SNPs around the TSS

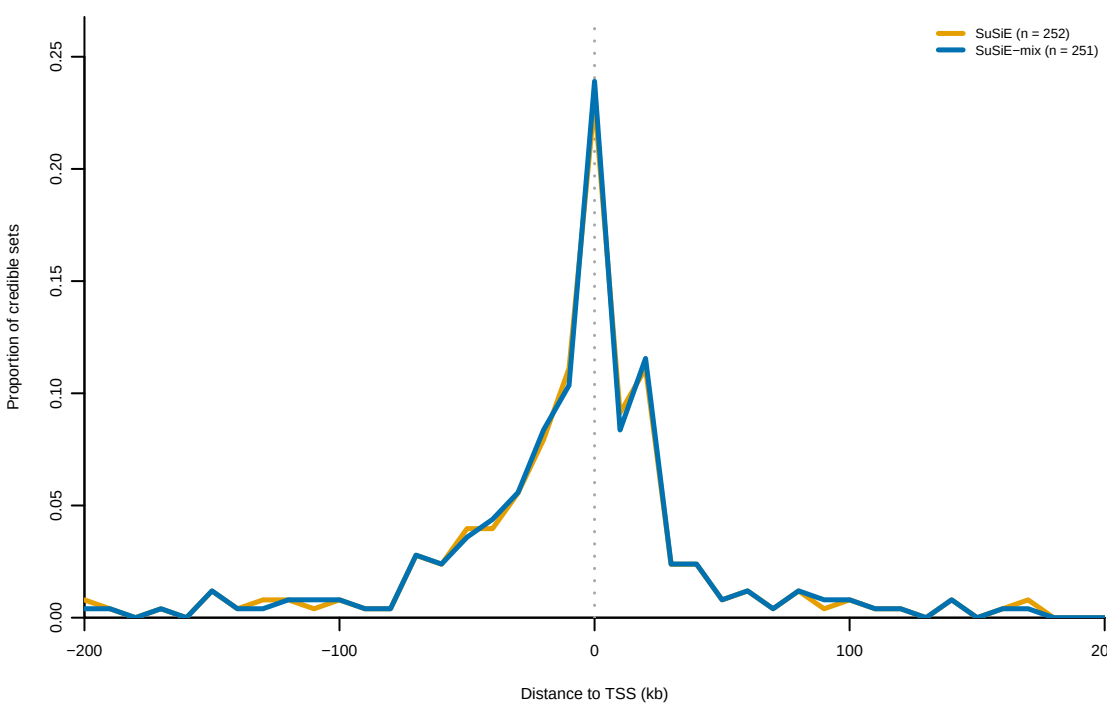

Adrenal Gland: mixed-model coding patterns

Additive lead CS: 85.9%; overall: 85.3%; over-additive (FDR 0.99)

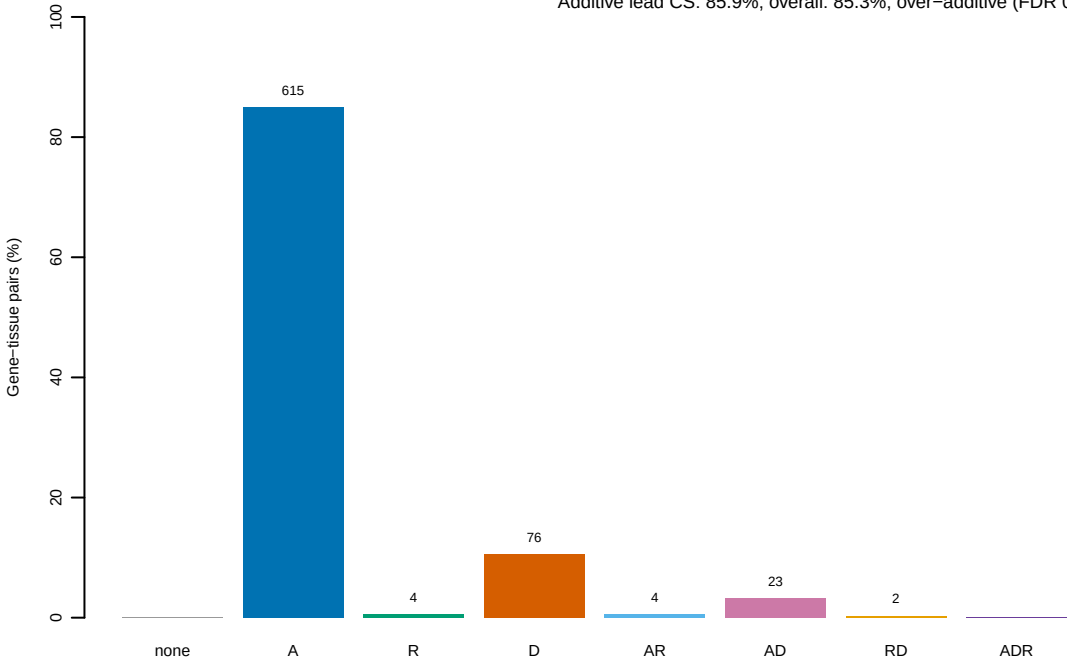

Adrenal Gland: CS lead SNPs around the TSS

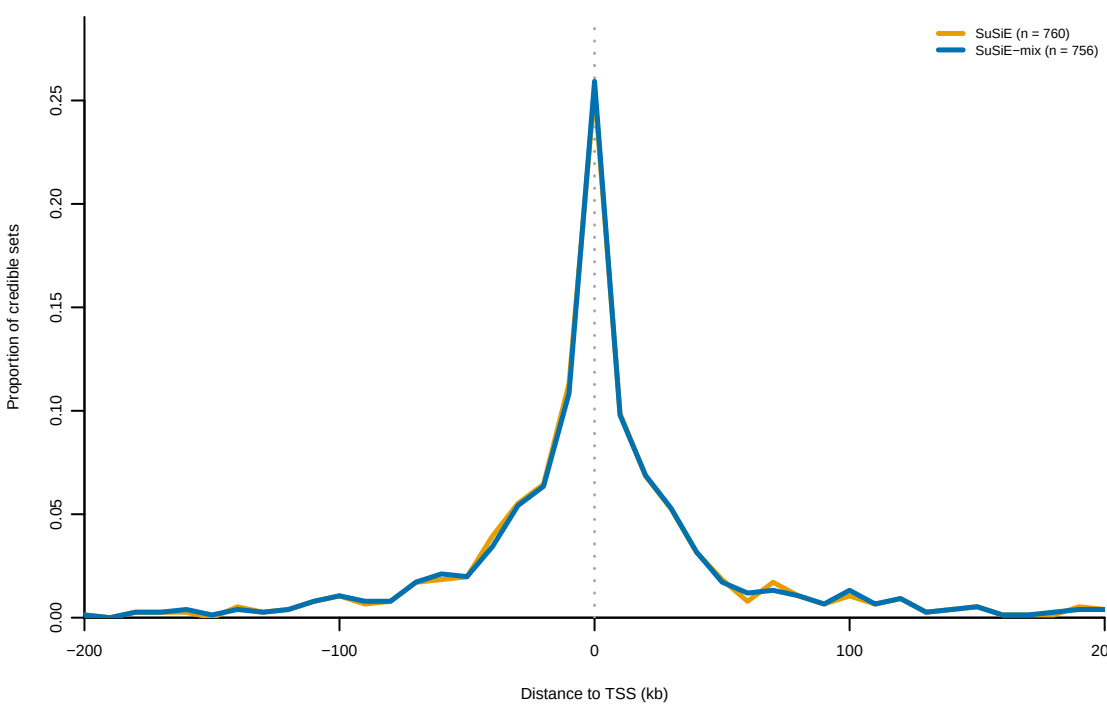

Testis: mixed-model coding patterns

Additive lead CS: 85.9%; overall: 85.3%; over-additive (FDR 0.99)

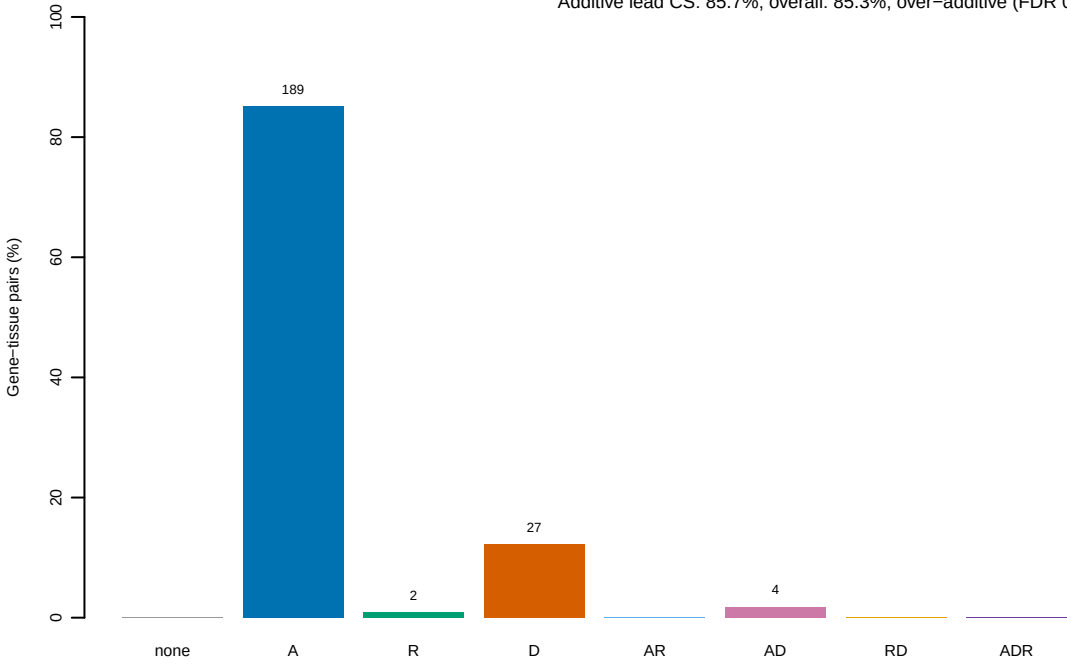

Testis: CS lead SNPs around the TSS

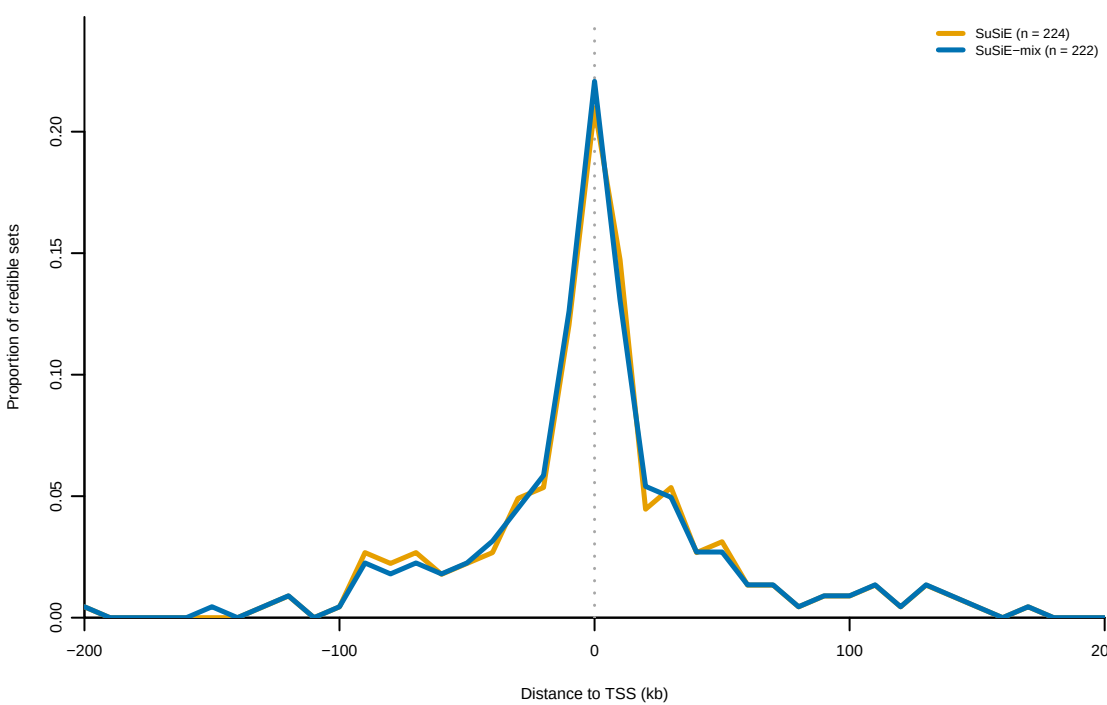

Liver: mixed-model coding patterns

Additive lead CS: 85.7%; overall: 85.3%; over-additive (FDR 0.99)

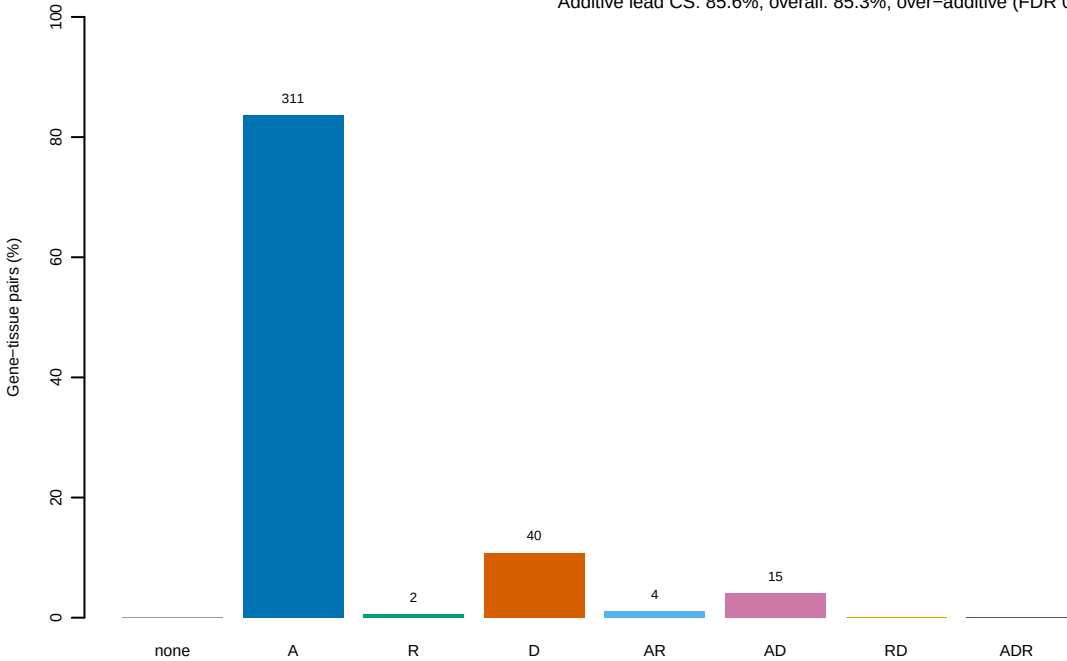

Liver: CS lead SNPs around the TSS

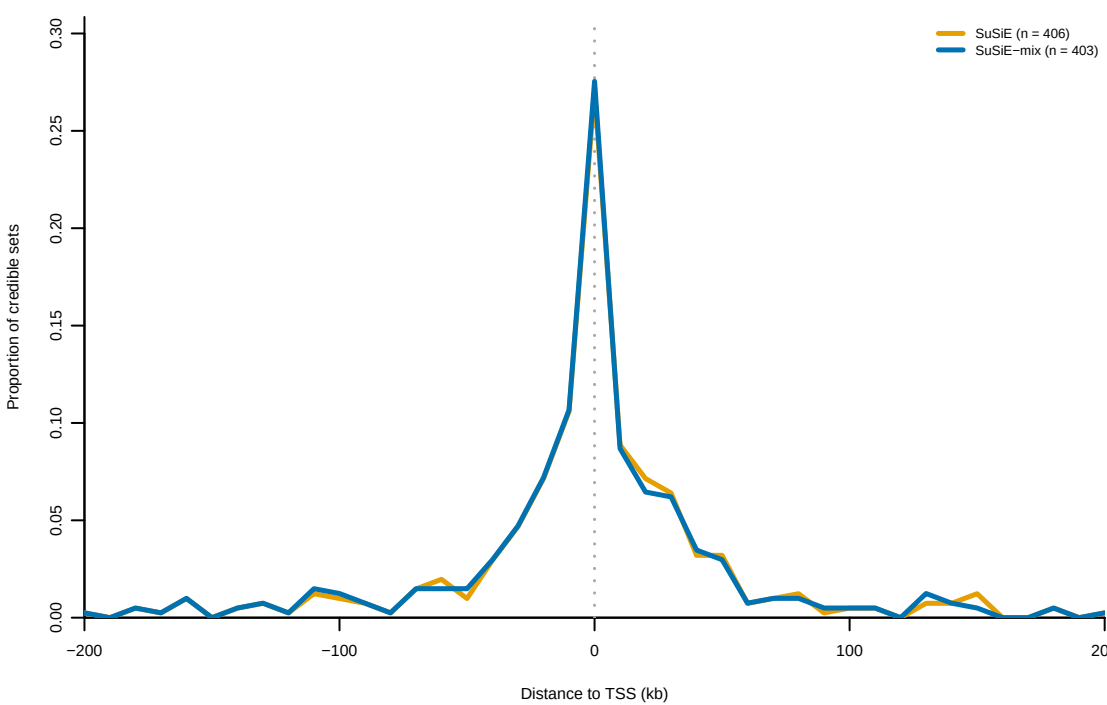

Breast: mixed-model coding patterns

Additive lead CS: 85.6%; overall: 85.3%; over-additive (FDR 0.99)

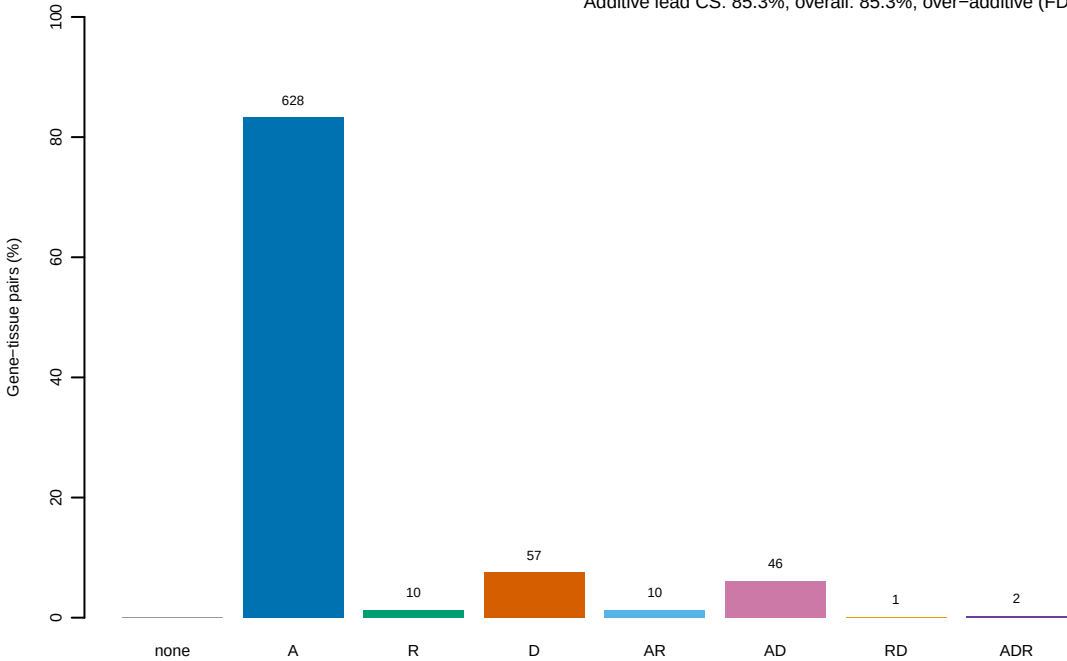

Breast: CS lead SNPs around the TSS

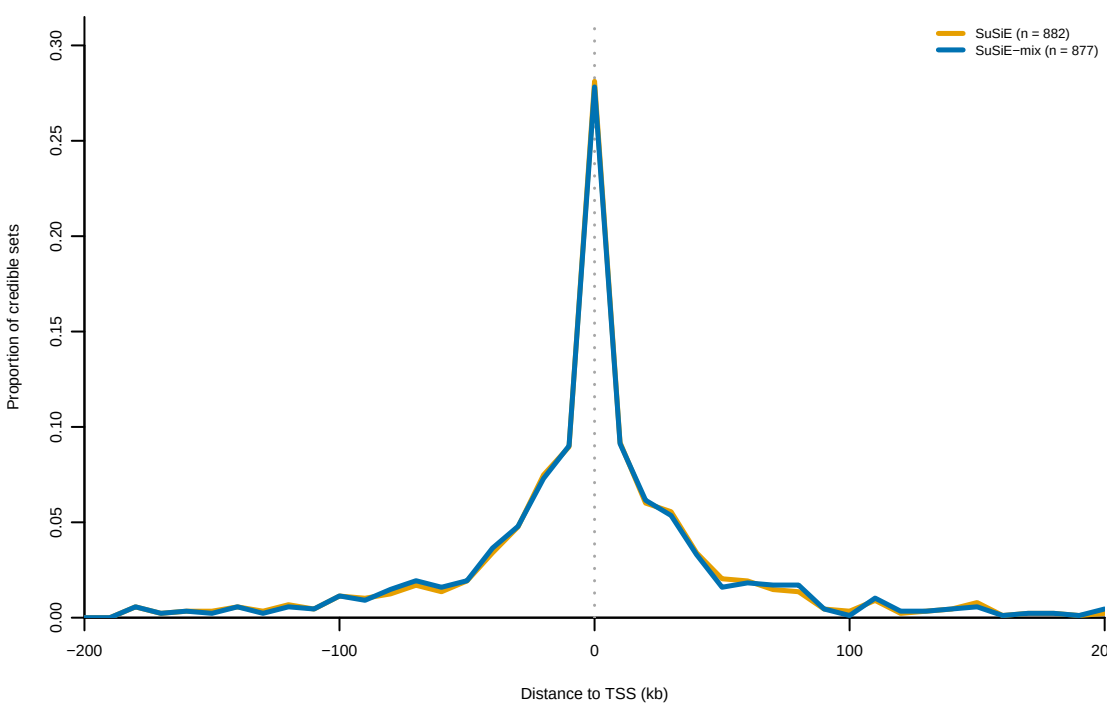

Adipose Tissue: mixed-model coding patterns

Additive lead CS: 85.3%; overall: 85.3%; over-additive (FDR 1)

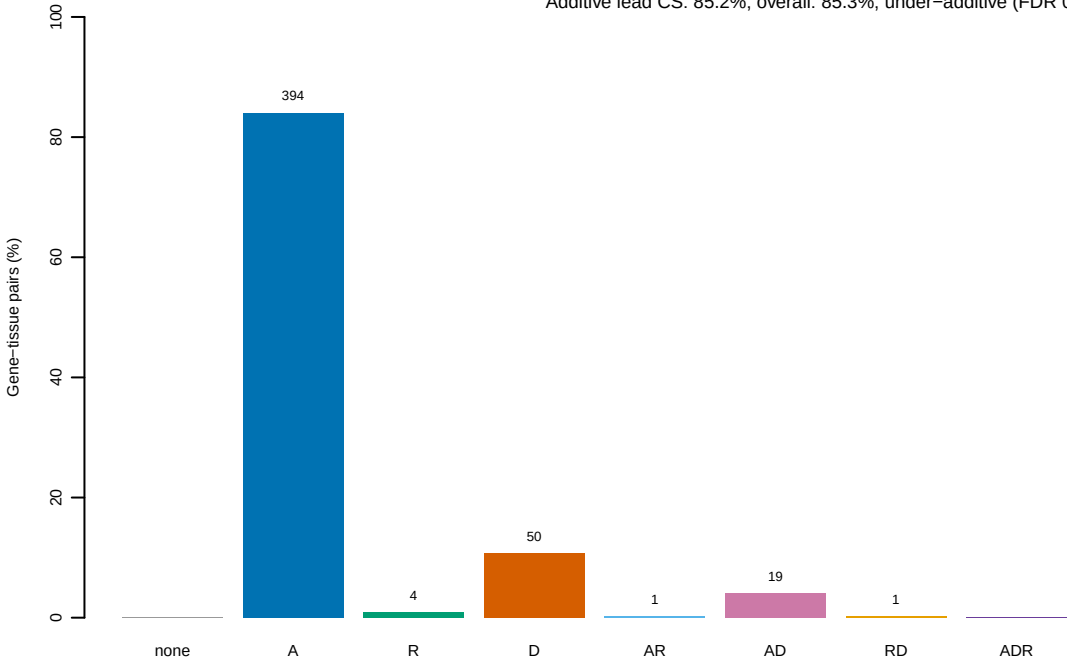

Adipose Tissue: CS lead SNPs around the TSS

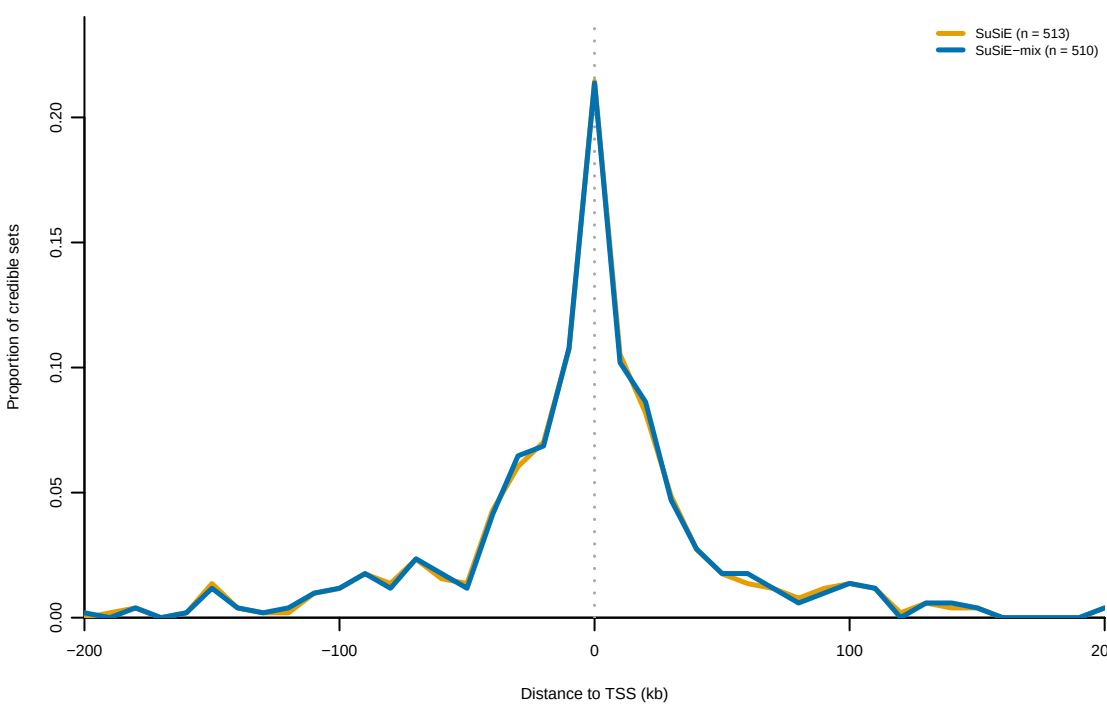

Pituitary: mixed-model coding patterns

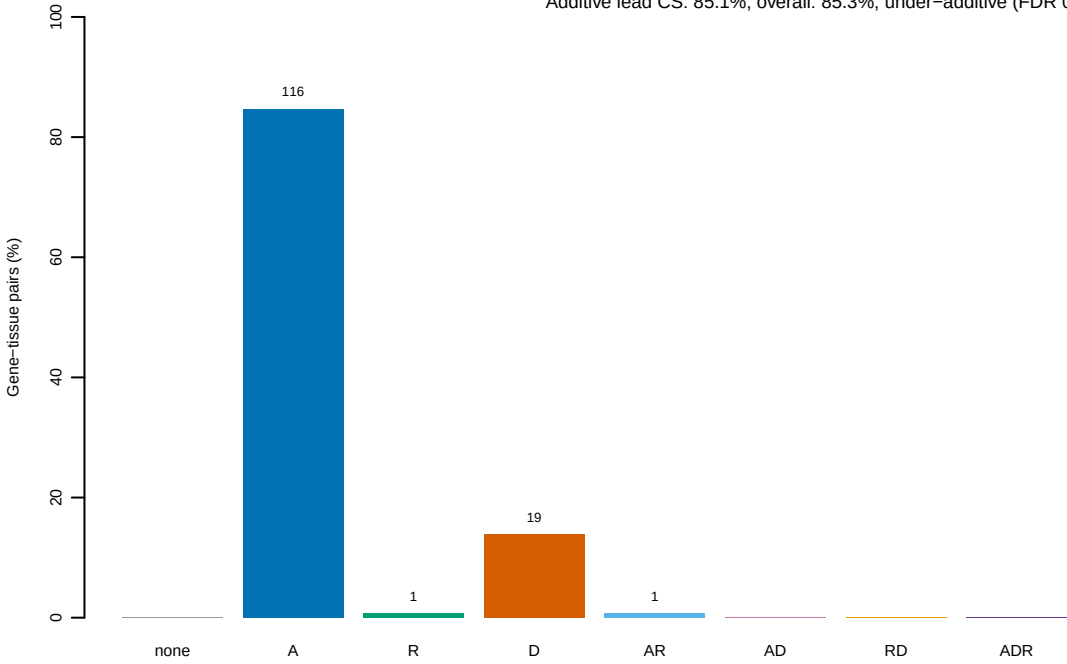

Additive lead CS: 85.2%; overall: 85.3%; under-additive (FDR 0.99)

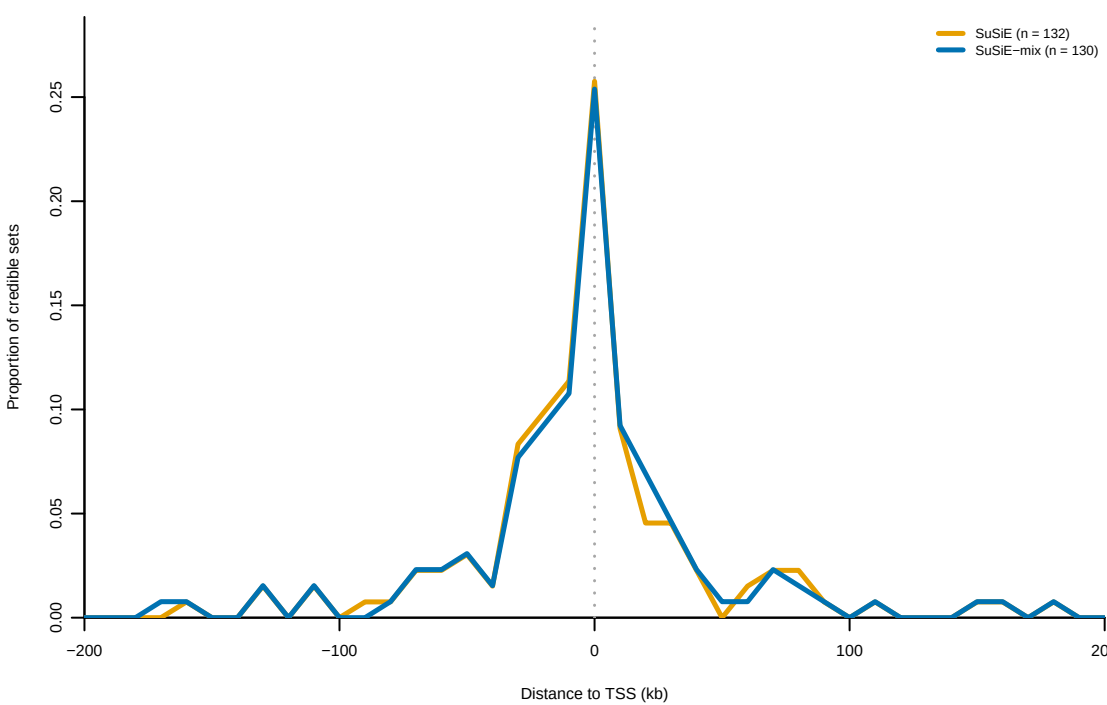

Pituitary: CS lead SNPs around the TSS

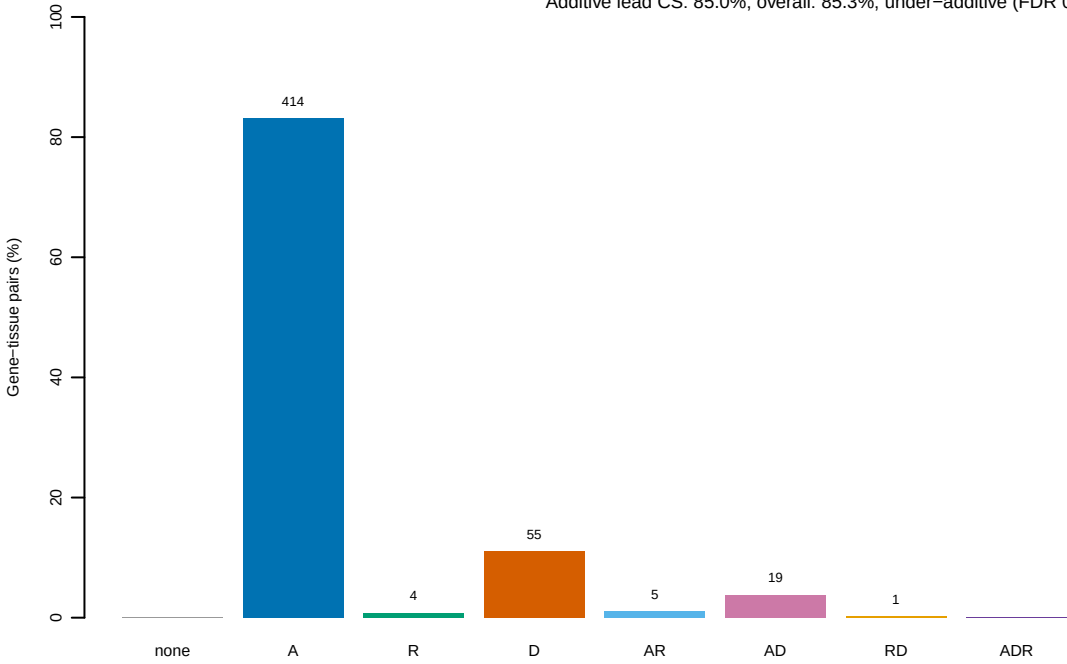

Ovary: mixed-model coding patterns
Additive lead CS: 85.1%; overall: 85.3%; under-additive (FDR 0.99)

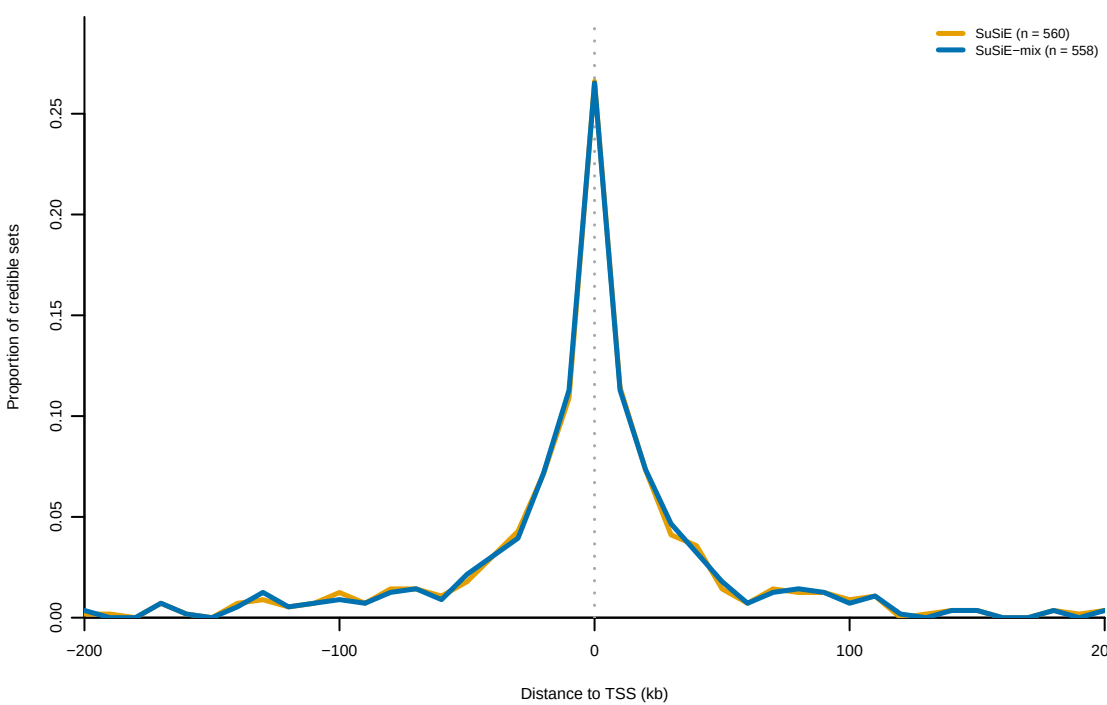

Ovary: CS lead SNPs around the TSS

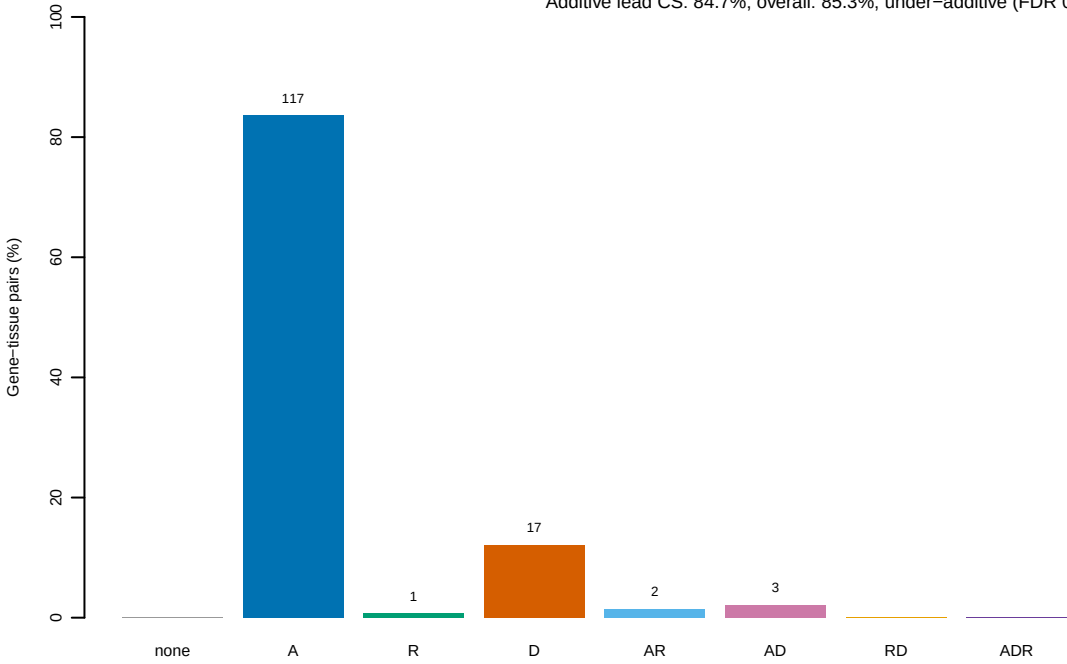

Lung: mixed-model coding patterns
Additive lead CS: 85.0%; overall: 85.3%; under-additive (FDR 0.99)

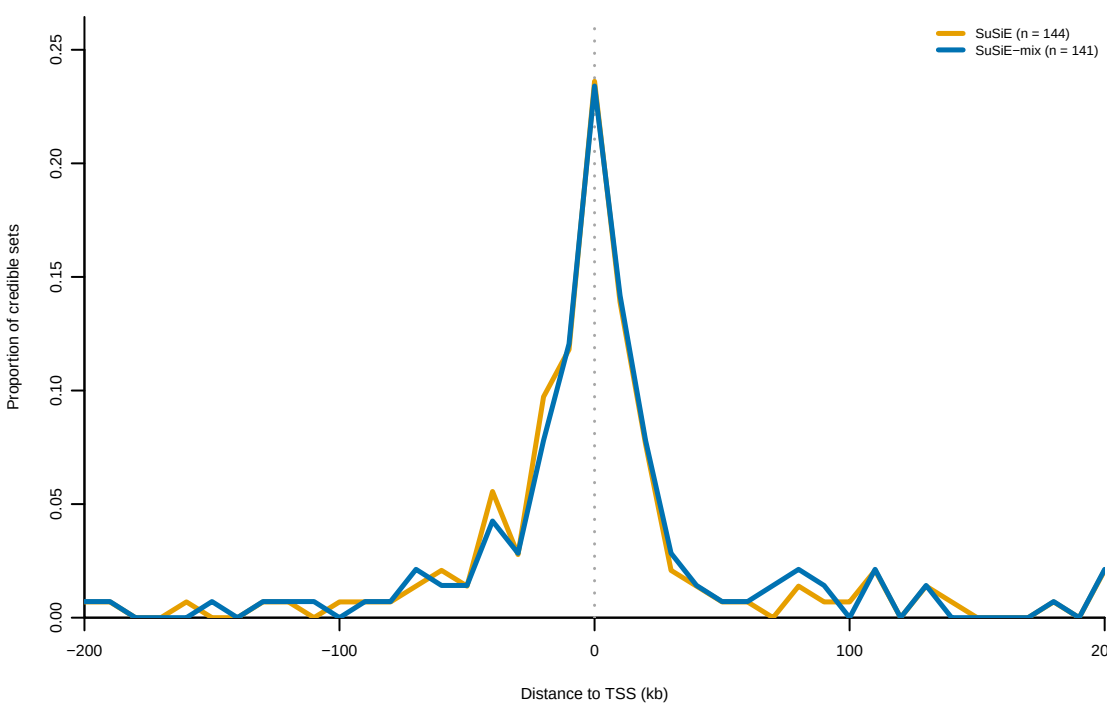

Lung: CS lead SNPs around the TSS

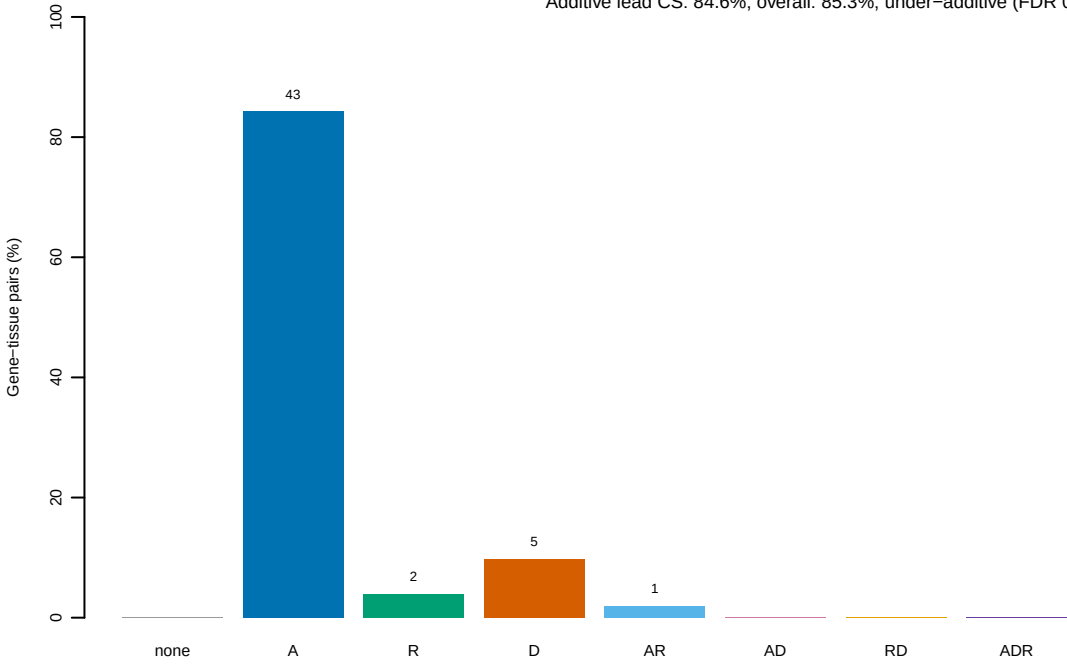

Salivary Gland: mixed-model coding patterns
Additive lead CS: 84.7%; overall: 85.3%; under-additive (FDR 0.99)

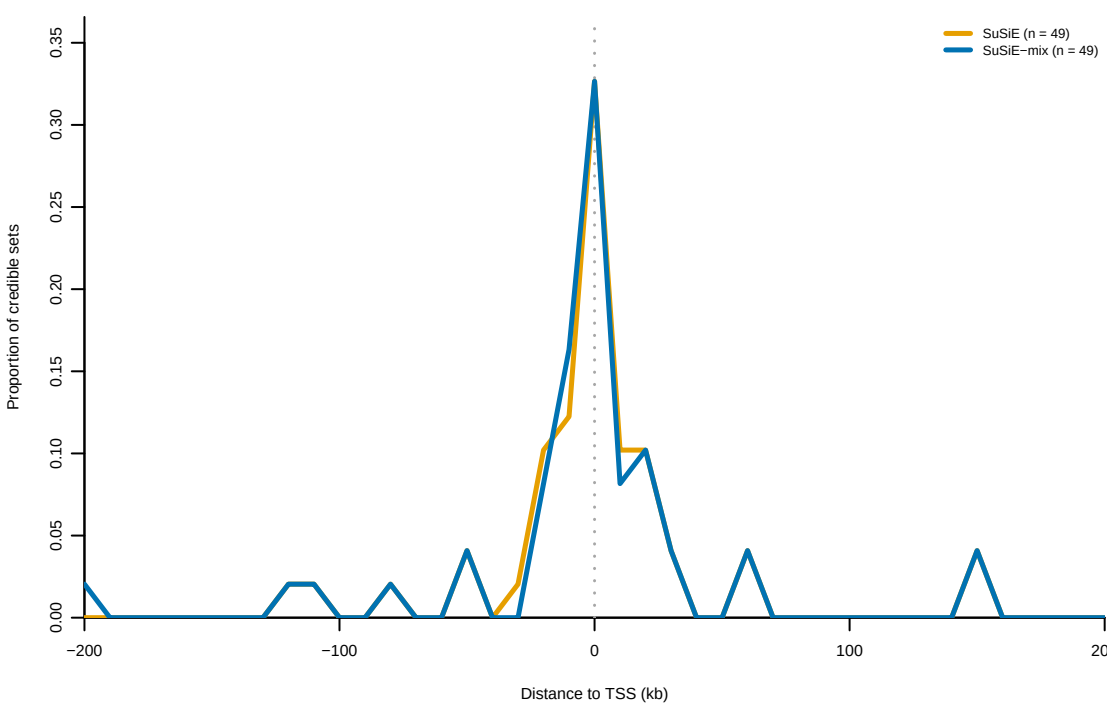

Salivary Gland: CS lead SNPs around the TSS

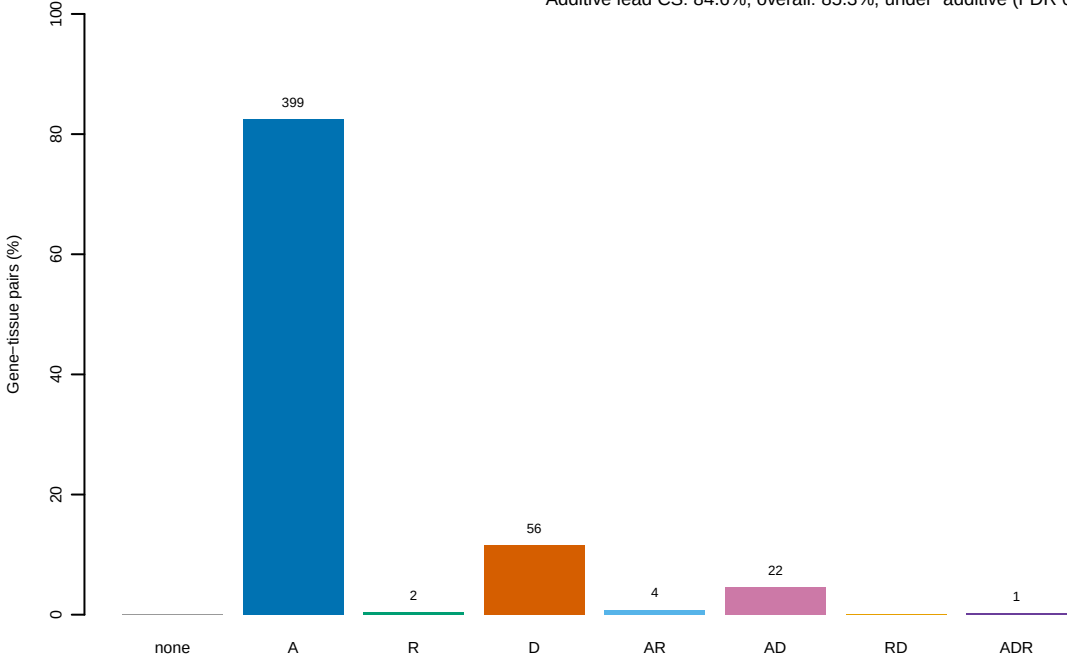

Vagina: mixed-model coding patterns
Additive lead CS: 84.6%; overall: 85.3%; under-additive (FDR 0.99)

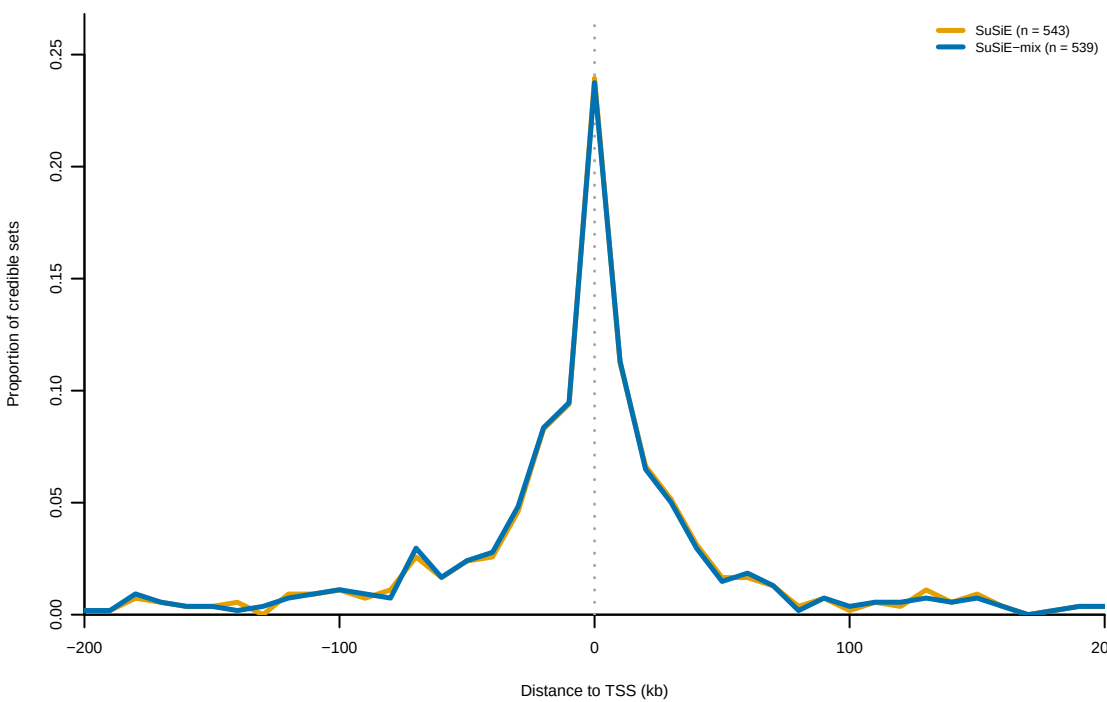

Vagina: CS lead SNPs around the TSS

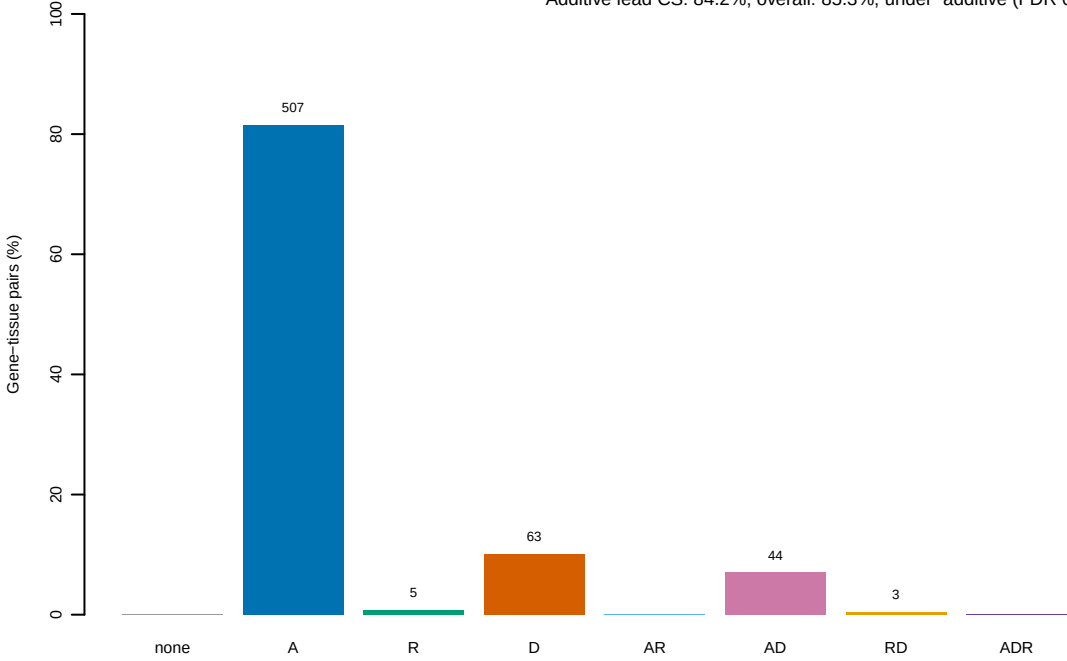

Colon: mixed-model coding patterns
Additive lead CS: 84.6%; overall: 85.3%; under-additive (FDR 0.99)

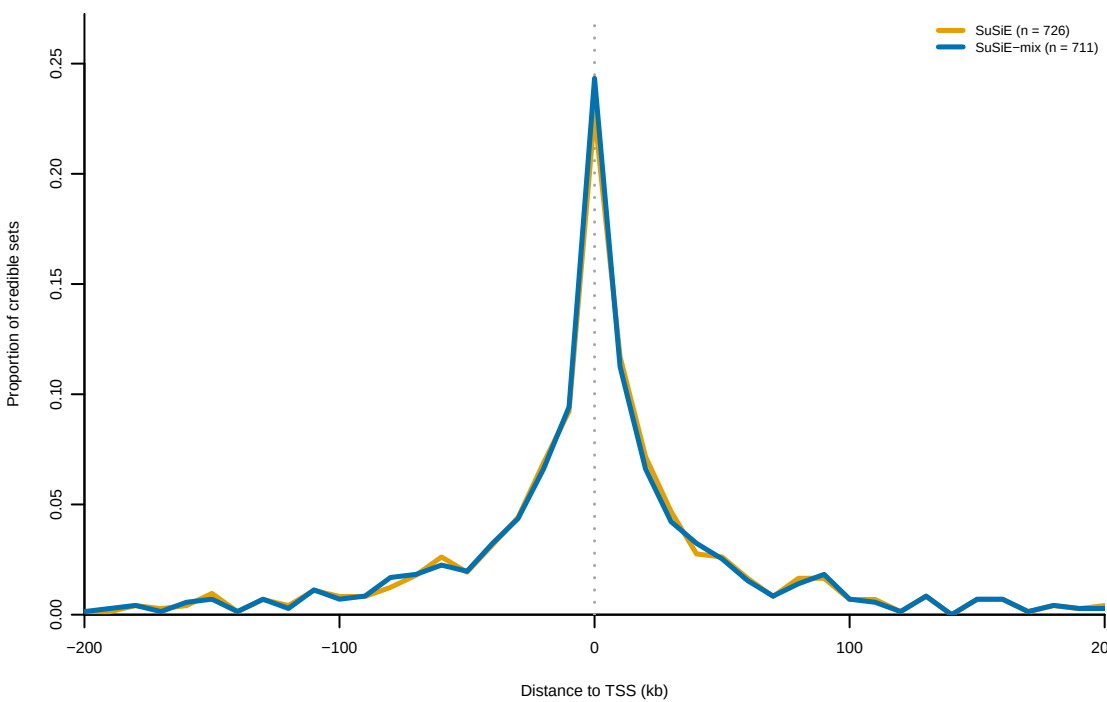

Colon: CS lead SNPs around the TSS

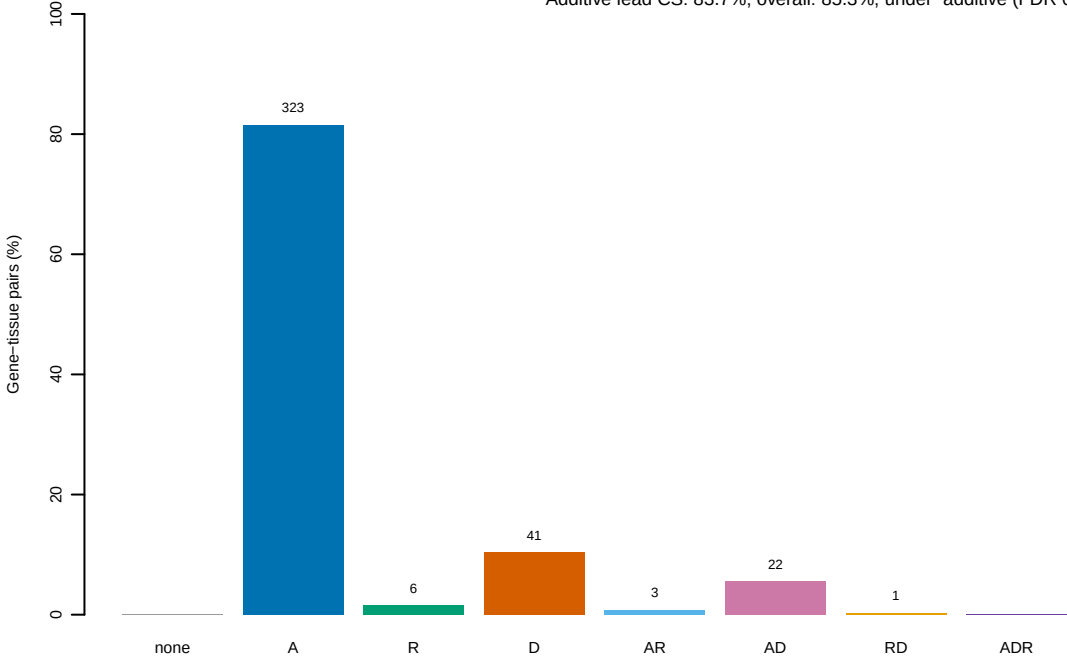

Skin: mixed-model coding patterns
Additive lead CS: 84.2%; overall: 85.3%; under-additive (FDR 0.77)

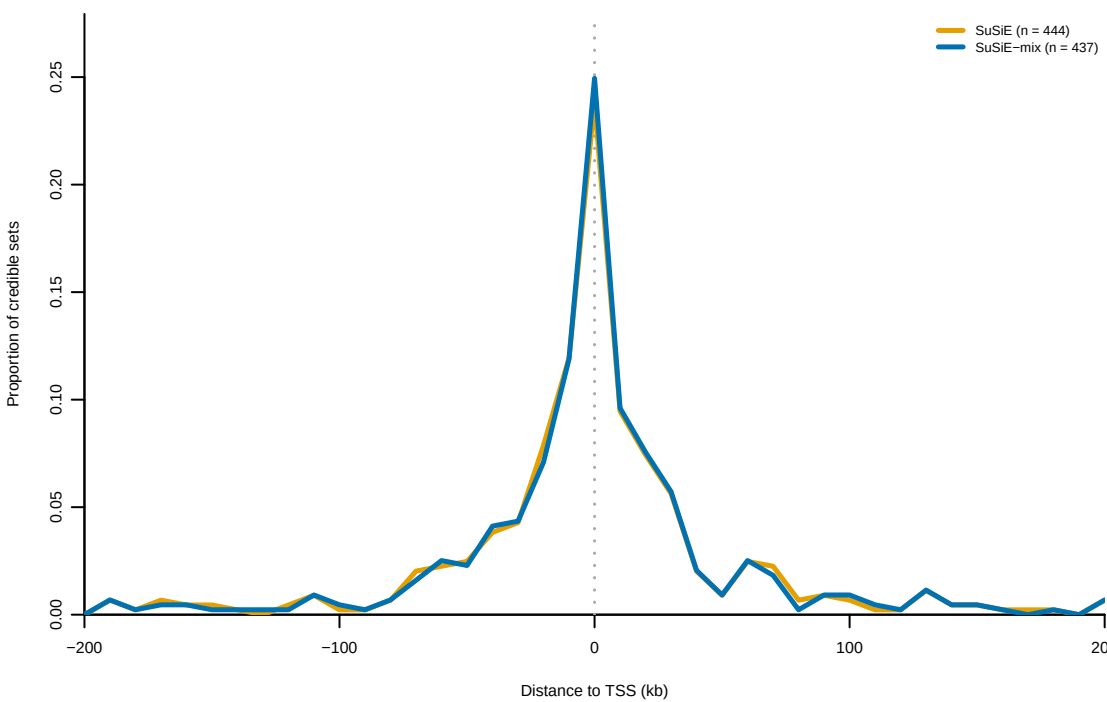

Skin: CS lead SNPs around the TSS

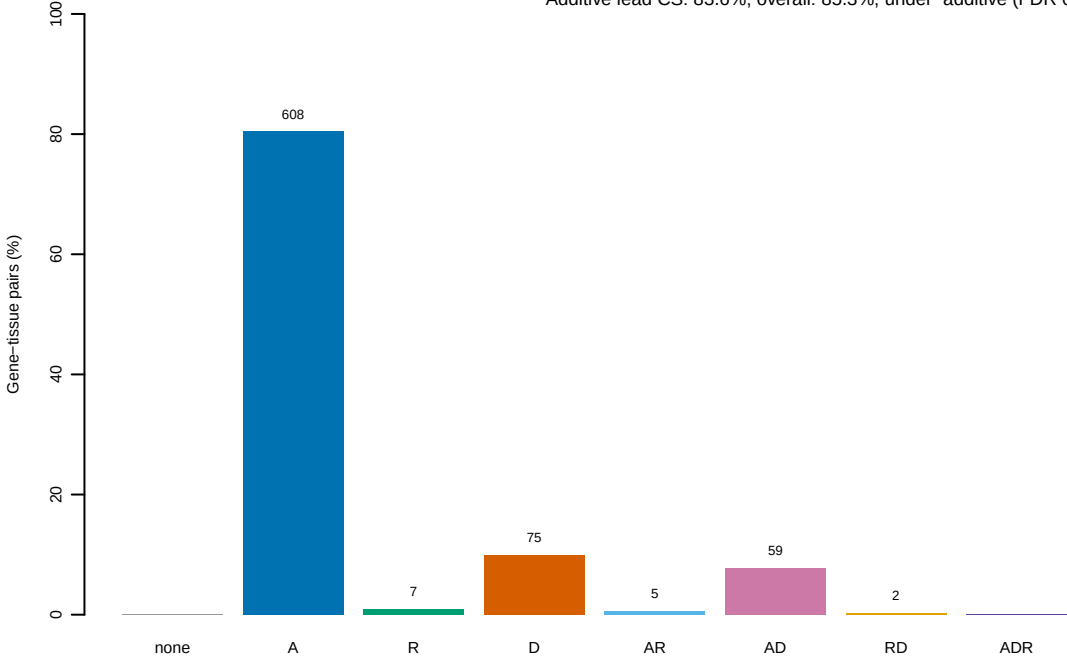

Esophagus: mixed-model coding patterns
Additive lead CS: 83.7%; overall: 85.3%; under-additive (FDR 0.71)

Esophagus: CS lead SNPs around the TSS

Muscle: mixed-model coding patterns
Additive lead CS: 83.6%; overall: 85.3%; under-additive (FDR 0.53)

Muscle: CS lead SNPs around the TSS
