

Kidney: mixed-model coding patterns

Additive lead CS: 94.1%; overall: 84.7%; over-additive (FDR 1)

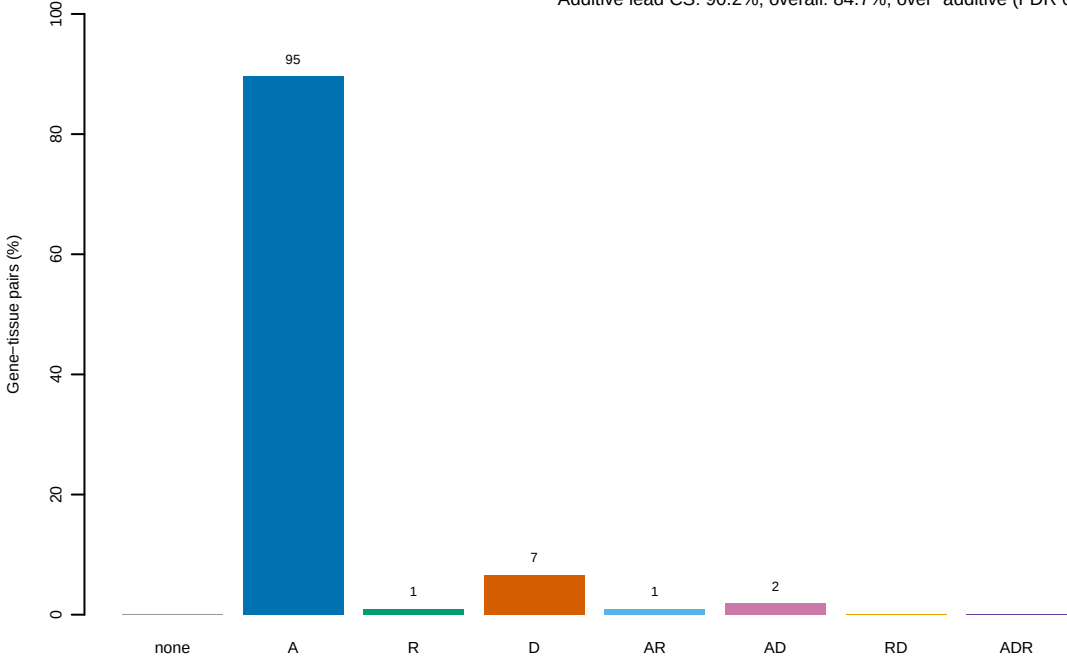

Kidney: CS lead SNPs around the TSS

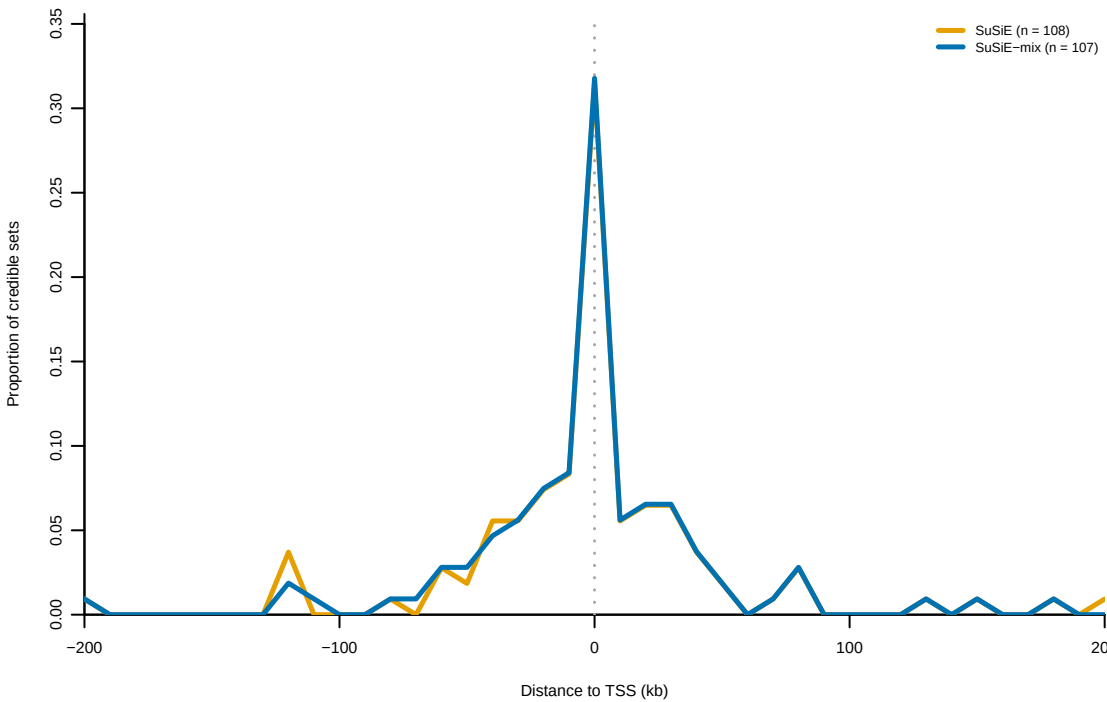

Prostate: mixed-model coding patterns

Additive lead CS: 90.2%; overall: 84.7%; over-additive (FDR 0.98)

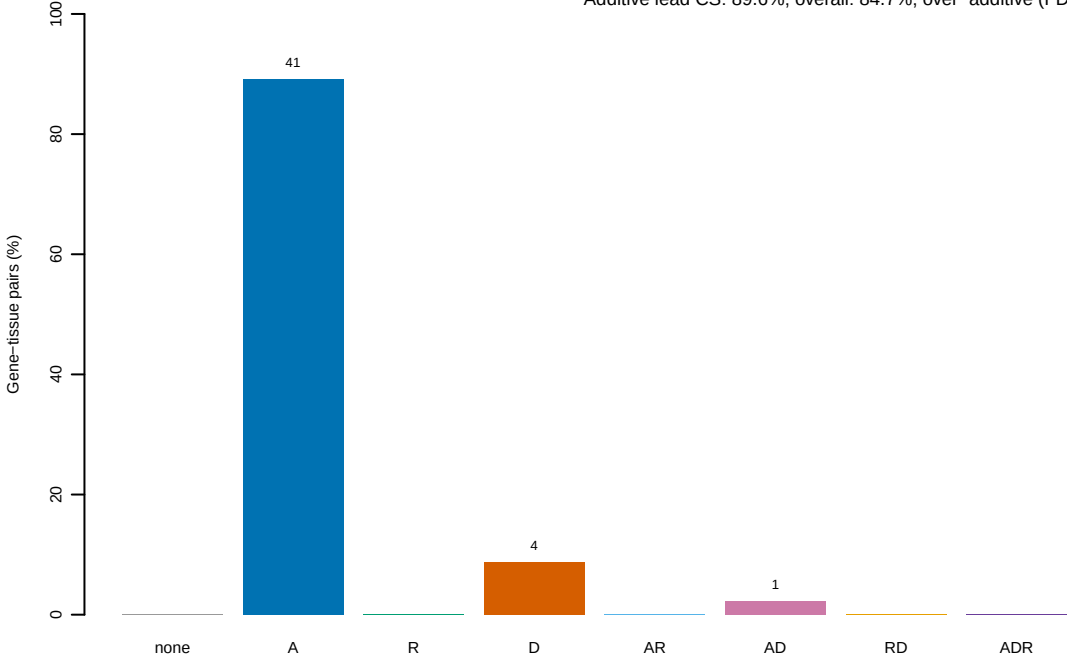

Prostate: CS lead SNPs around the TSS

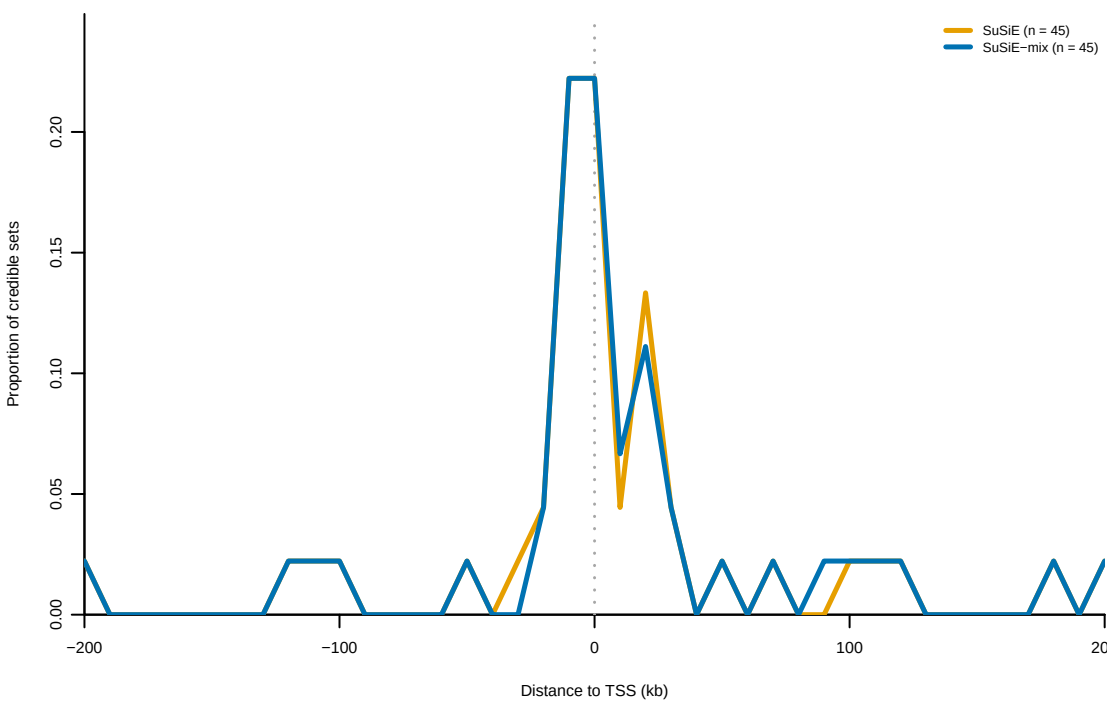

Uterus: mixed-model coding patterns

Additive lead CS: 89.6%; overall: 84.7%; over-additive (FDR 1)

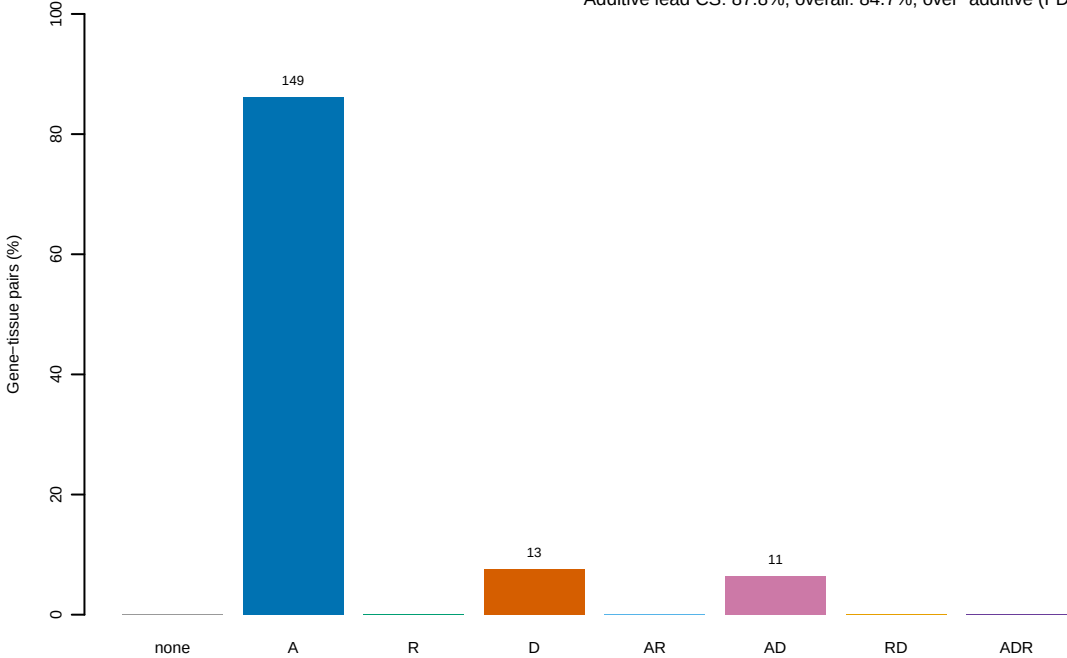

Uterus: CS lead SNPs around the TSS

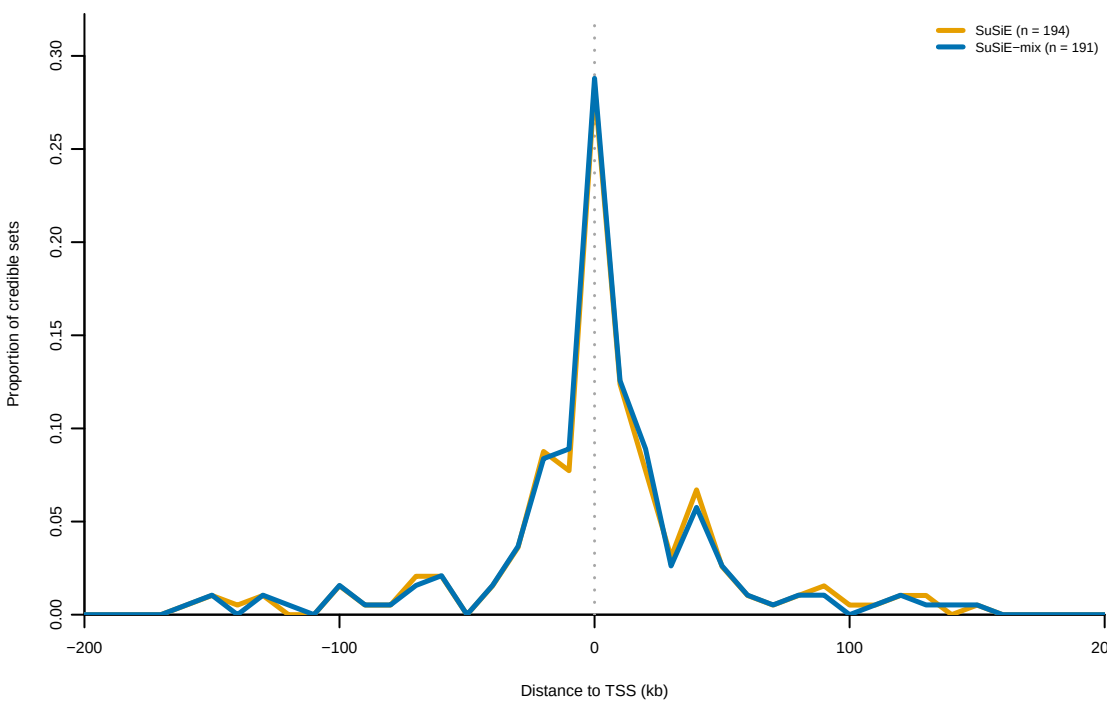

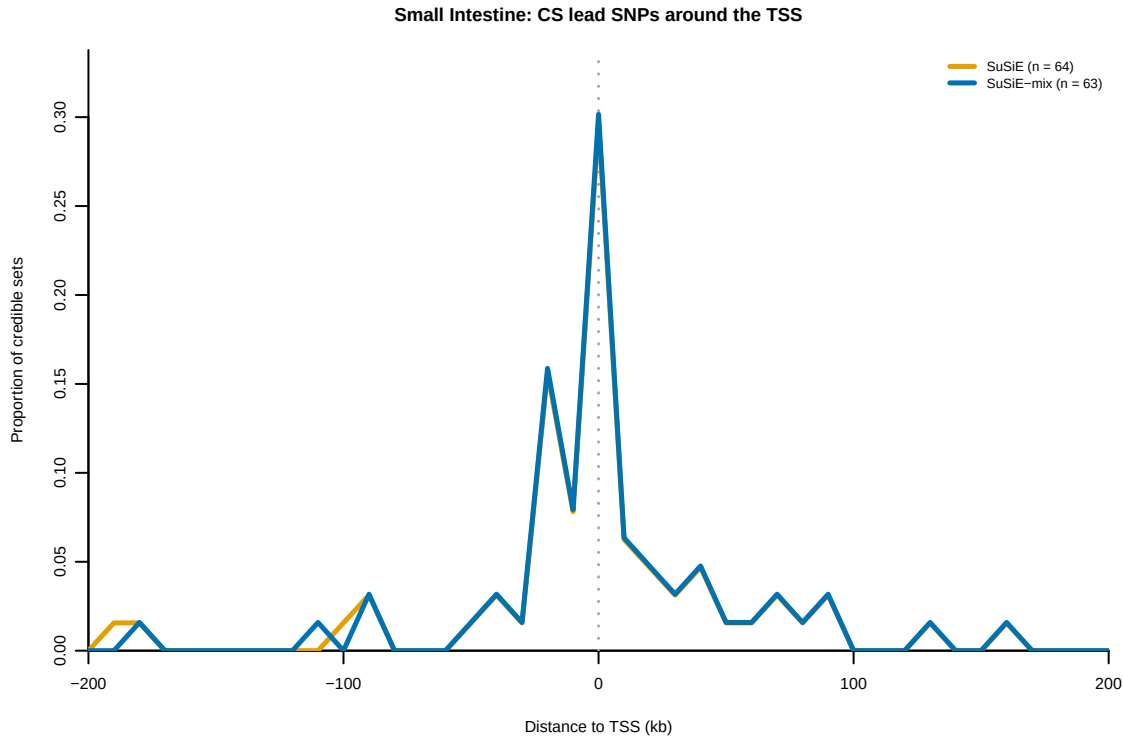

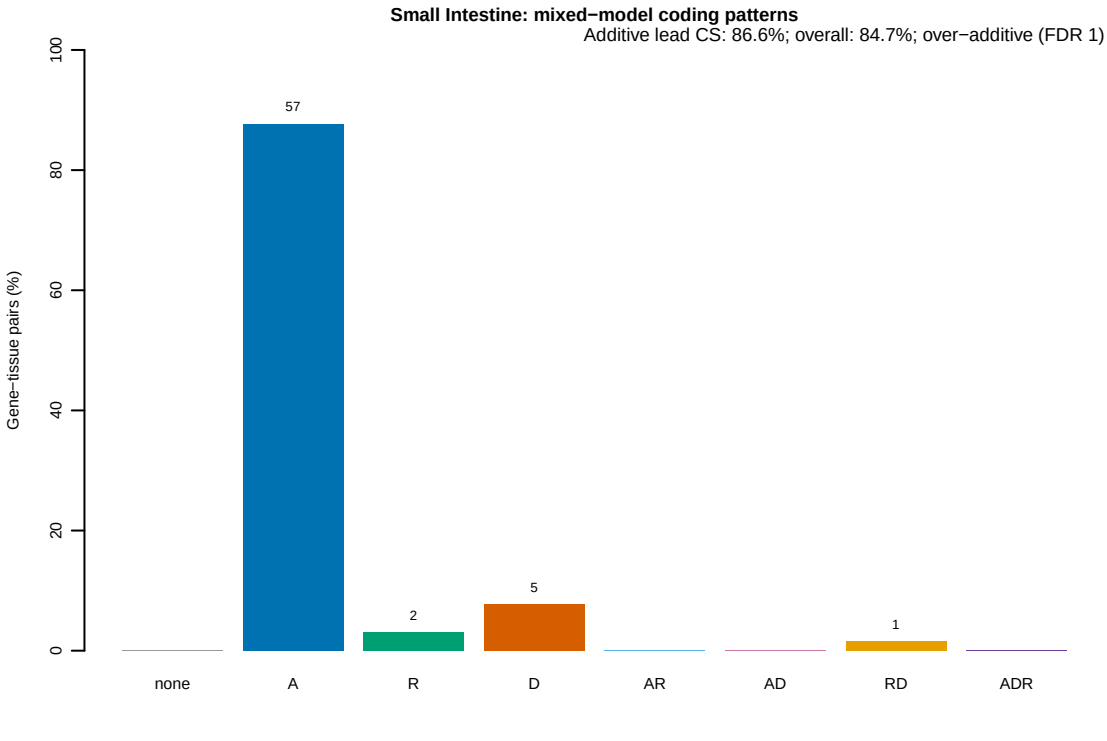

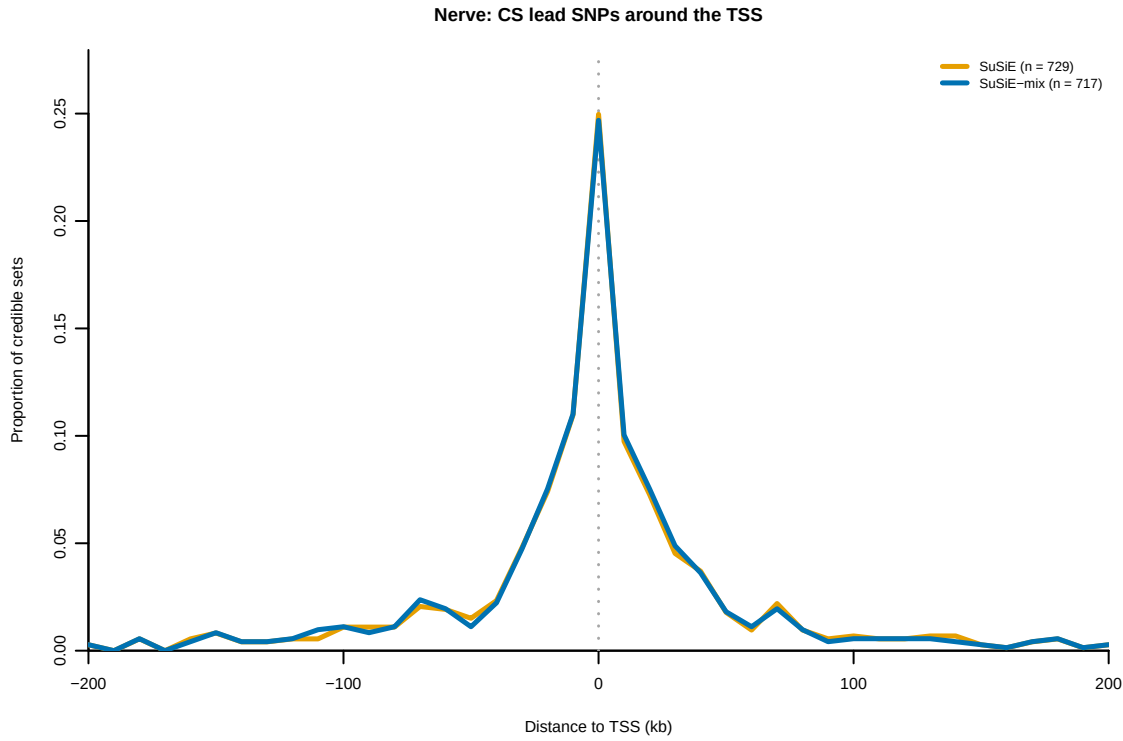

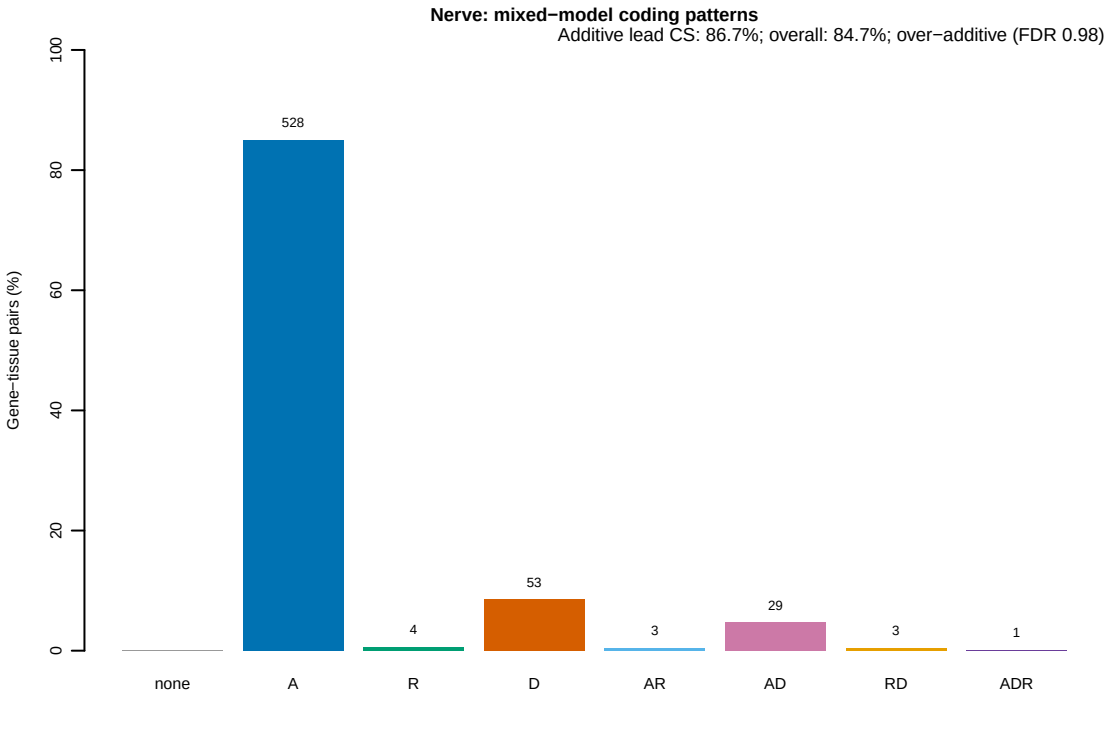

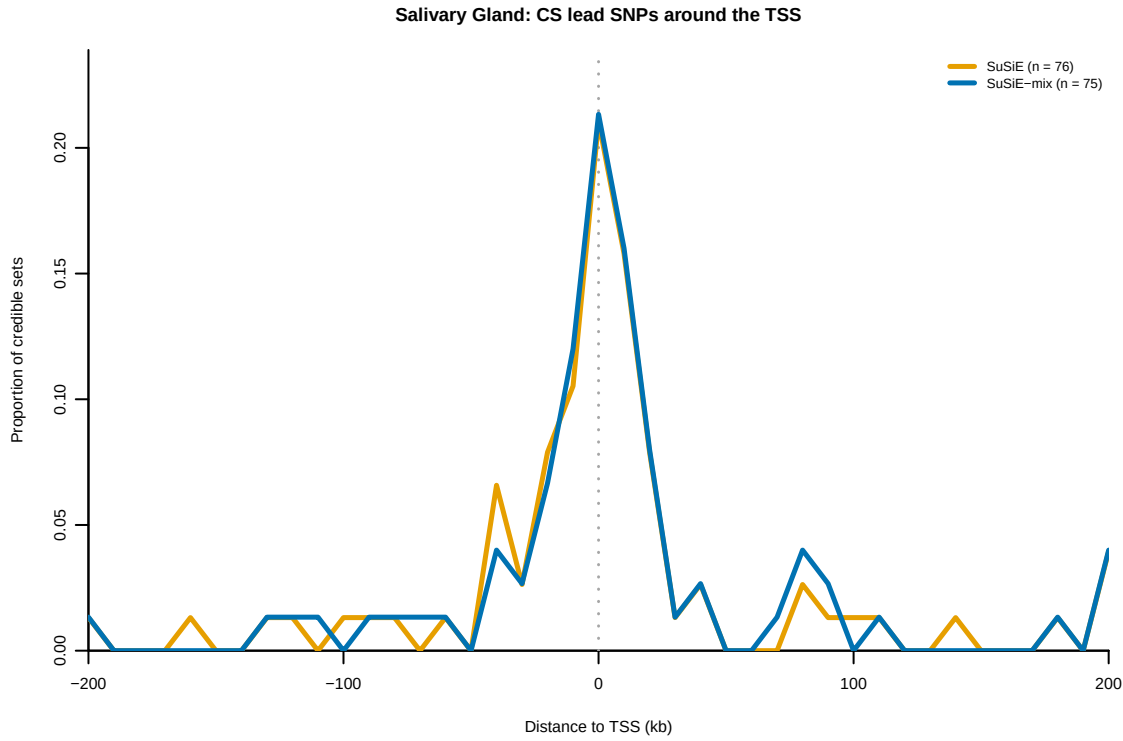

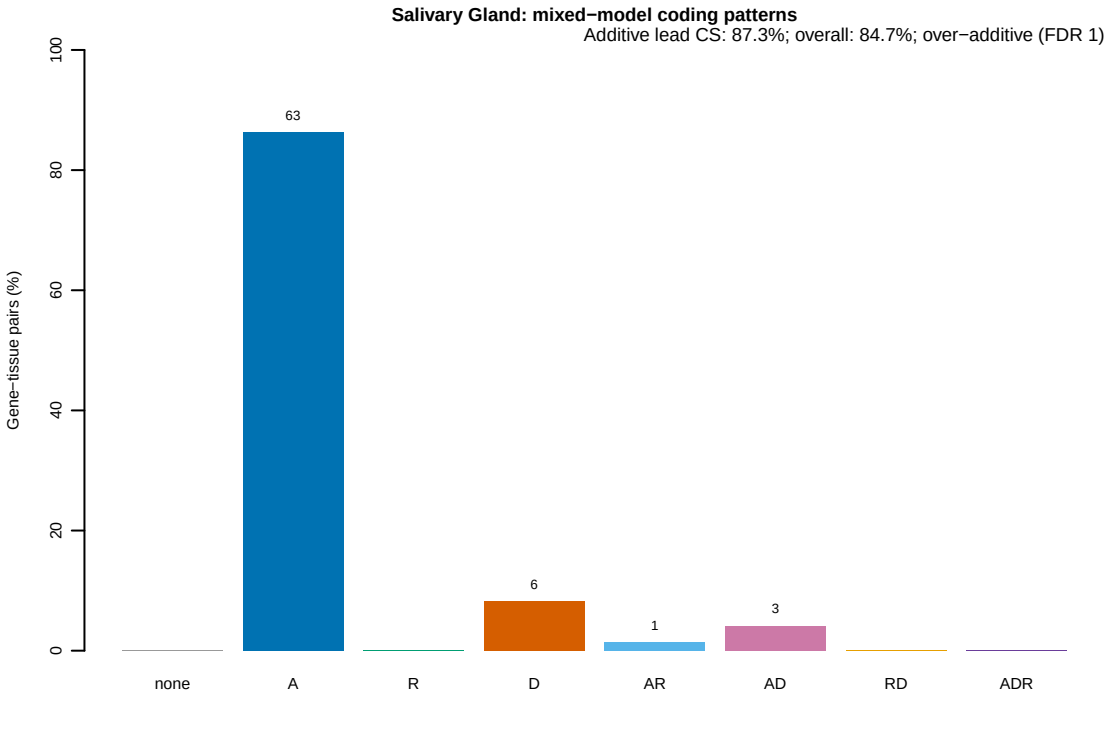

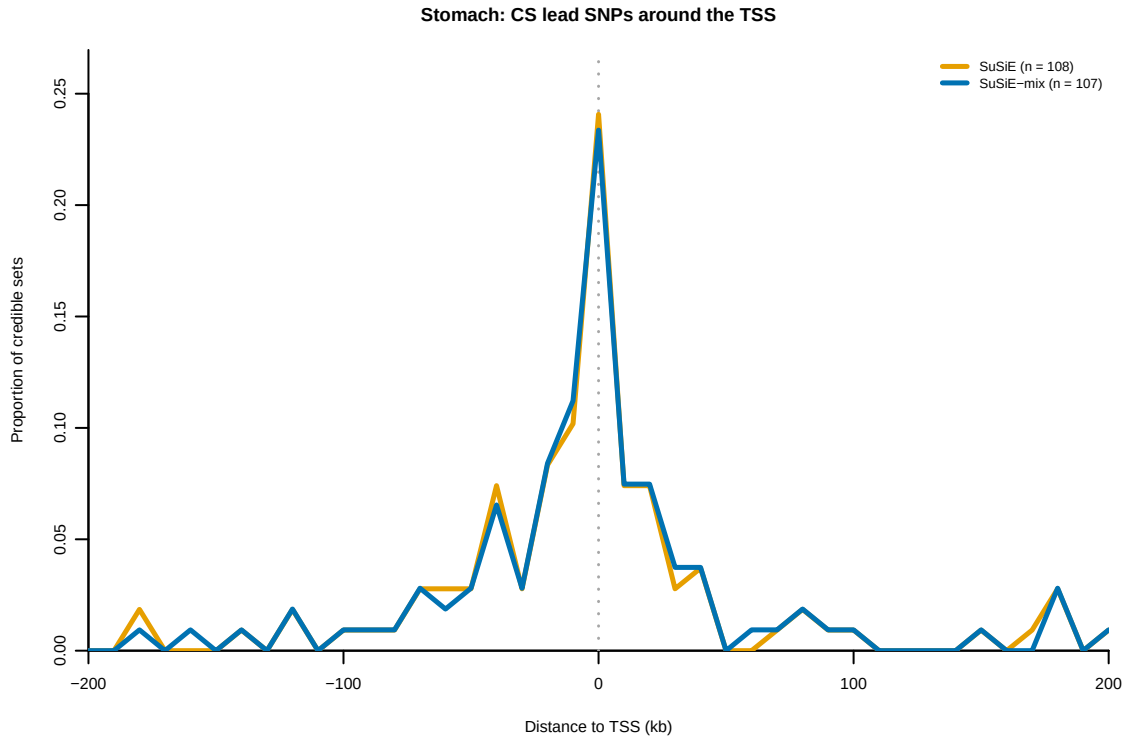

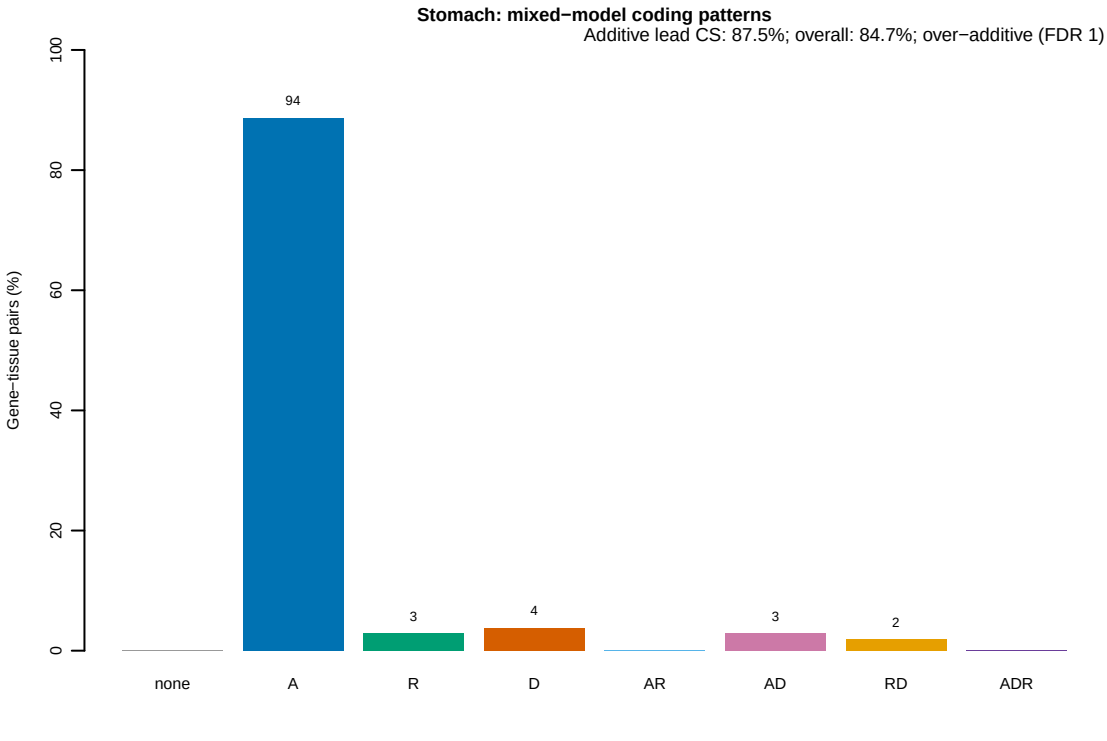

Heart: mixed-model coding patterns

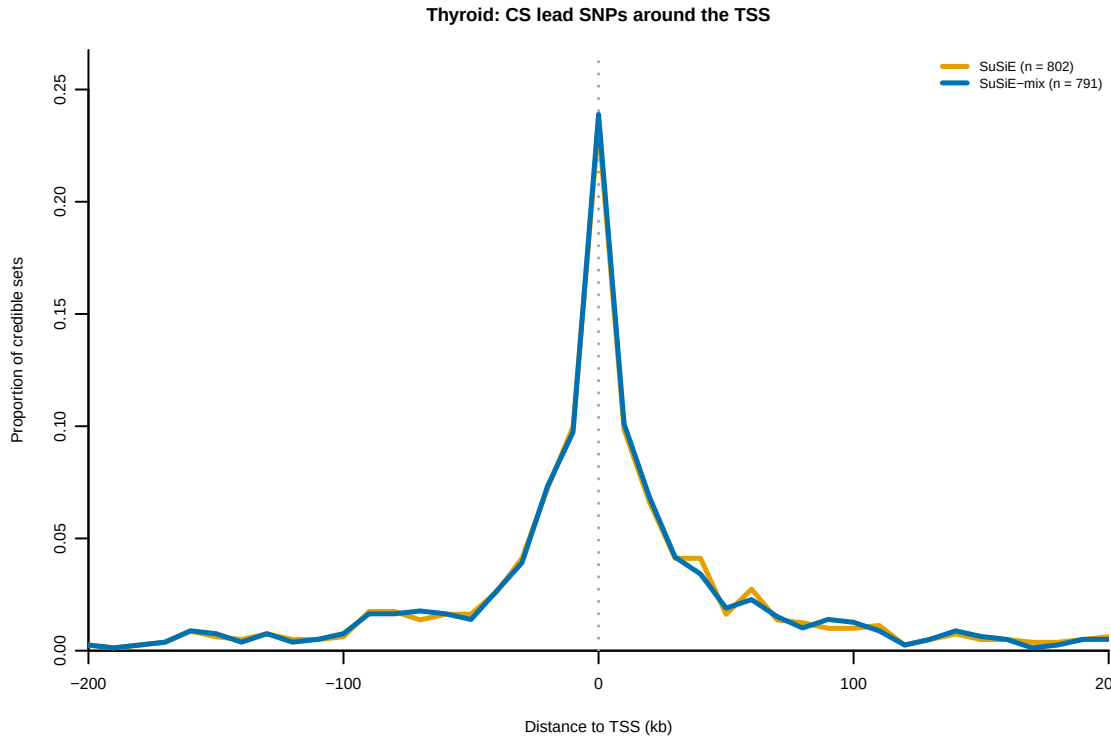

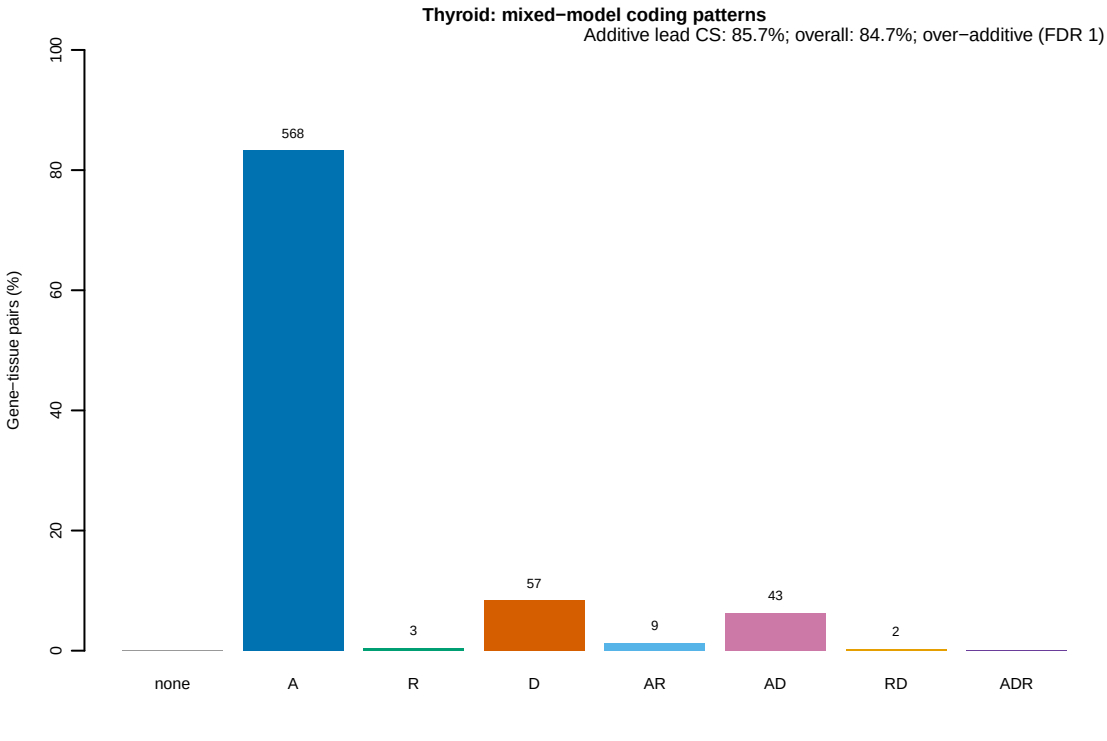

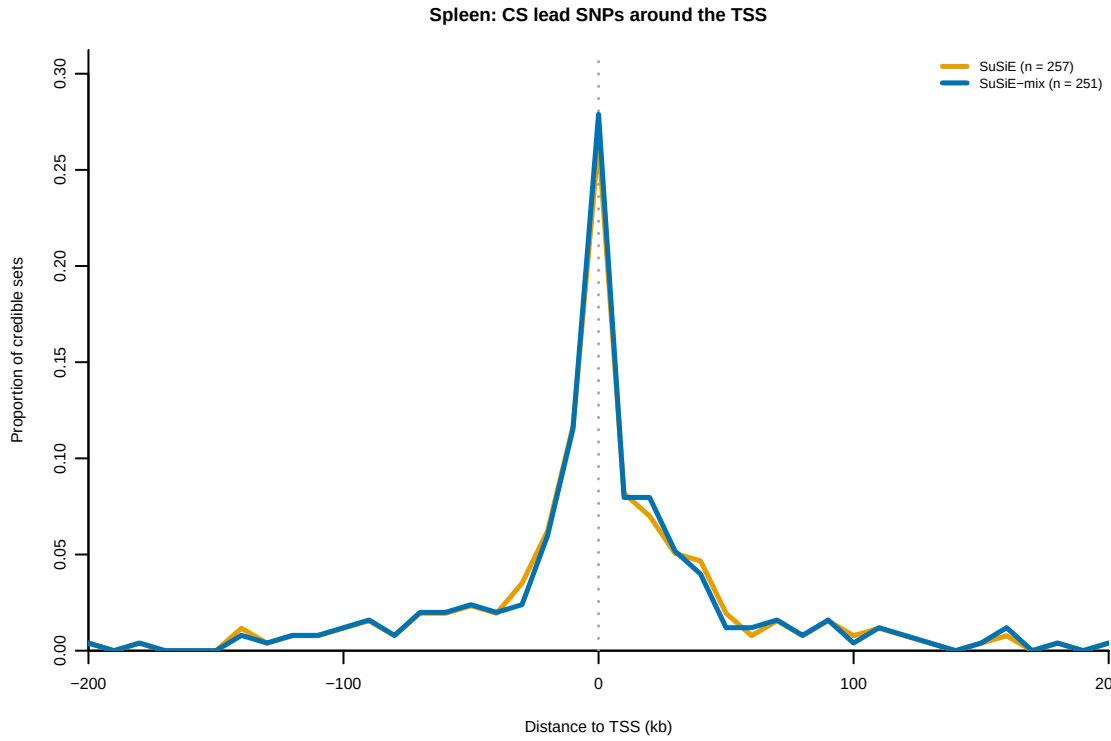

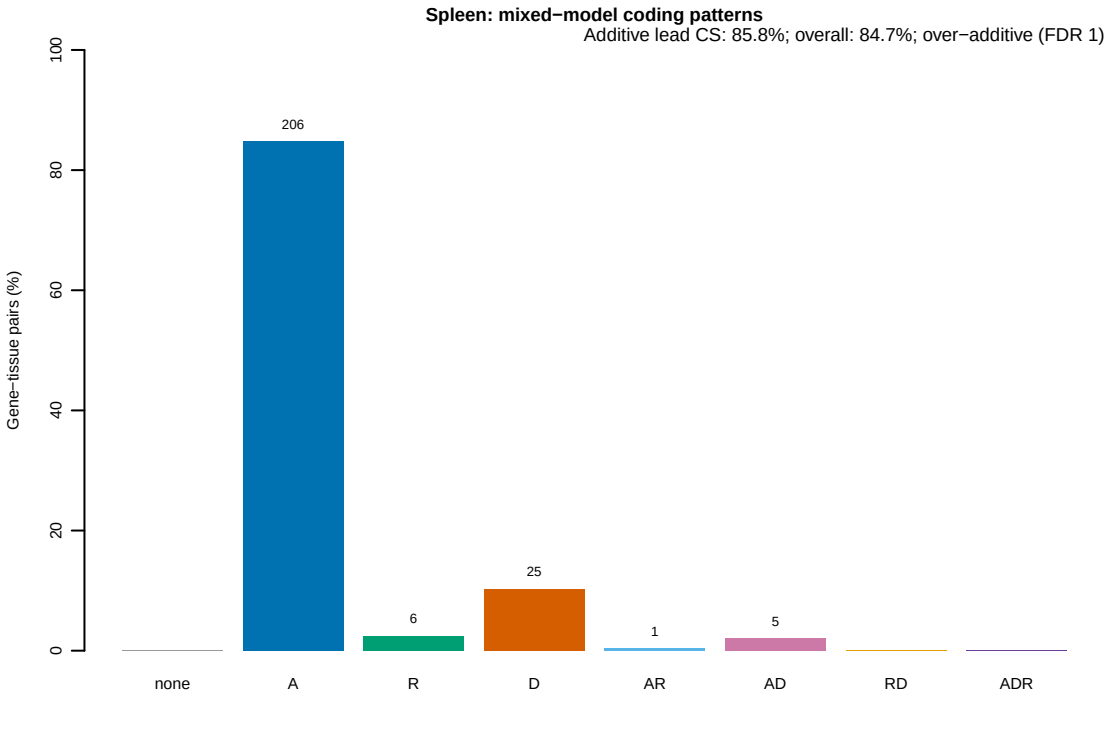

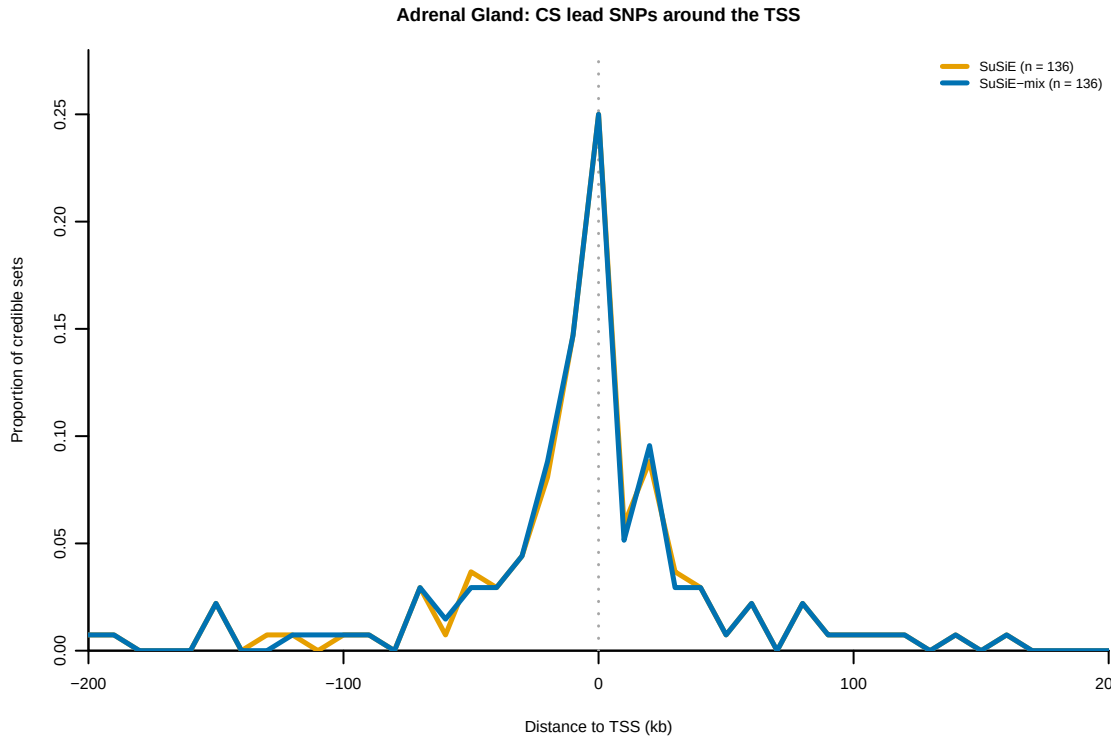

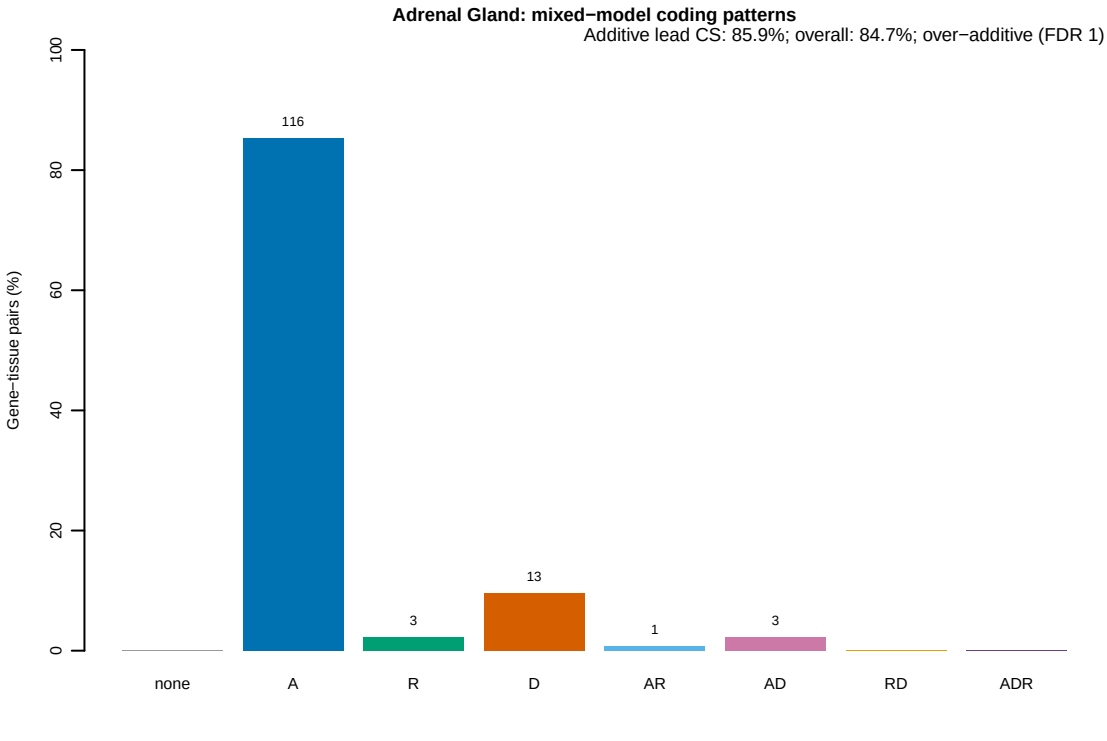

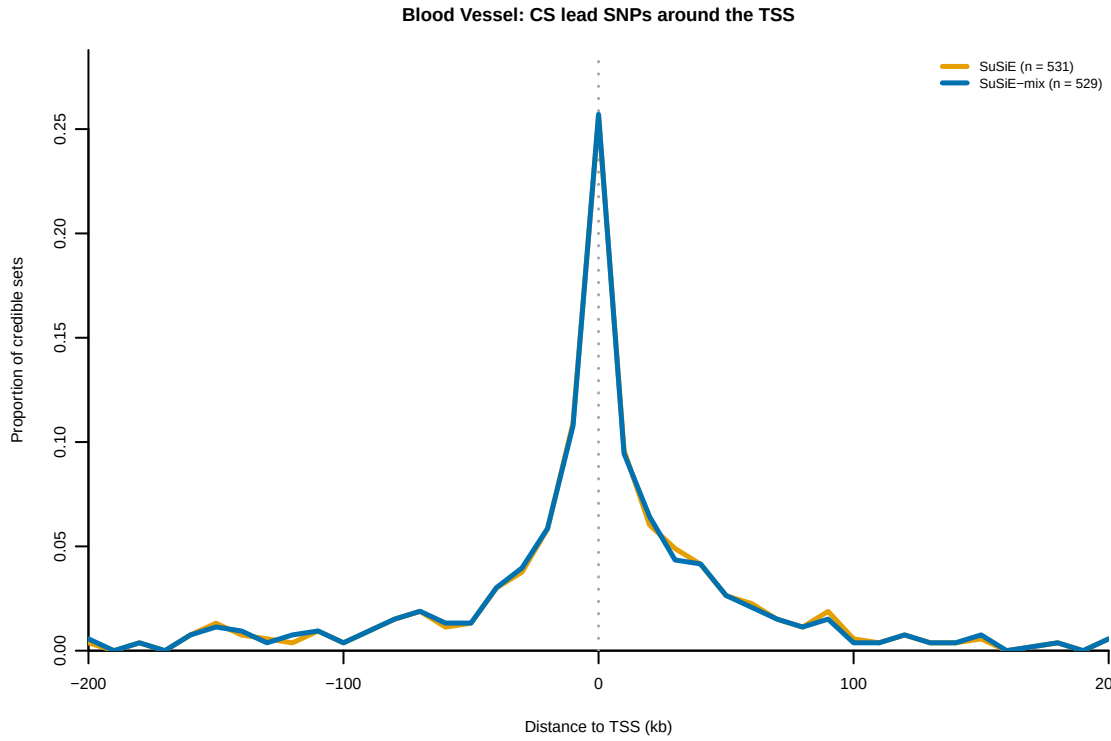

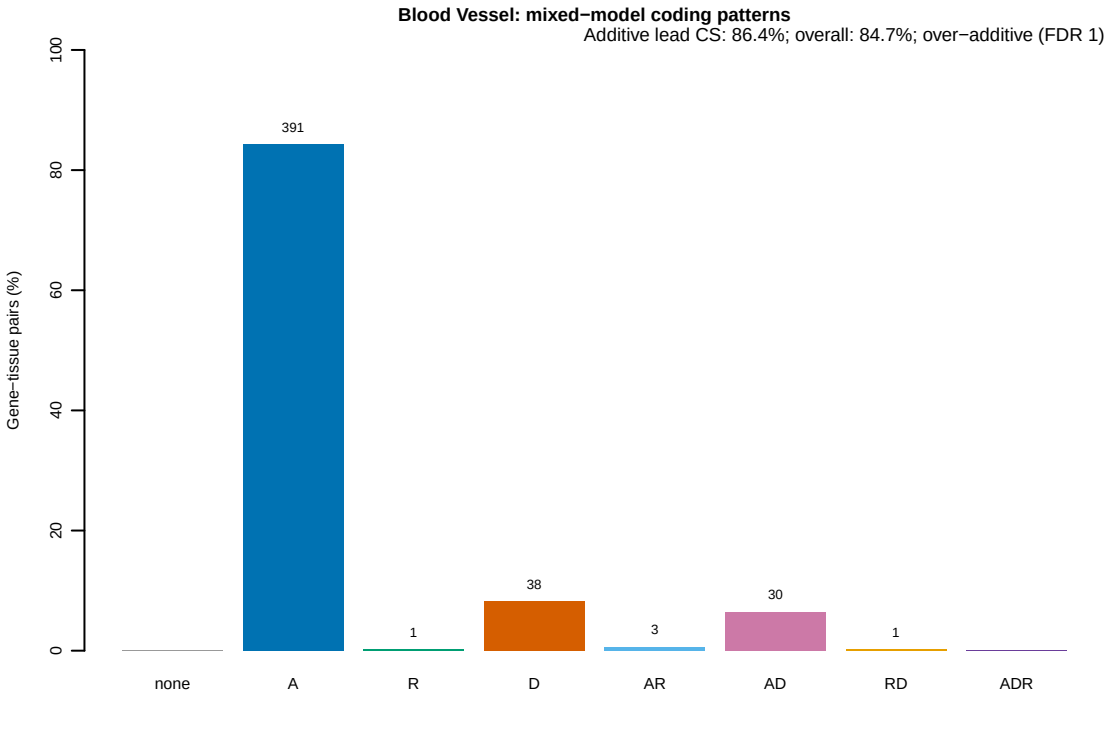

Additive lead CS: 87.8%; overall: 84.7%; over-additive (FDR 1)

Heart: CS lead SNPs around the TSS

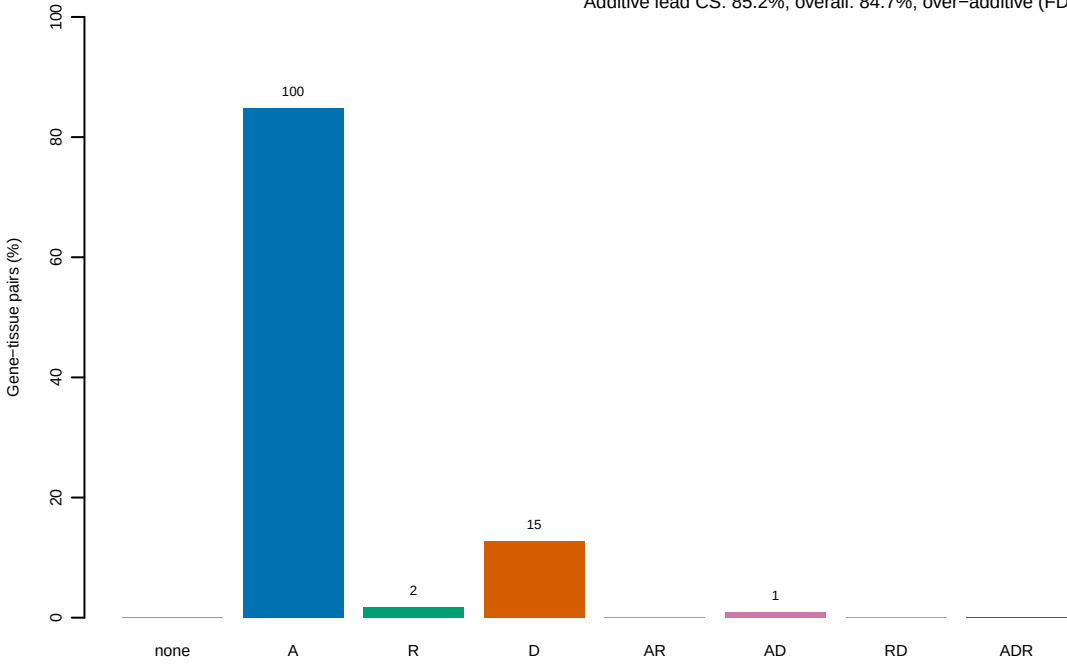

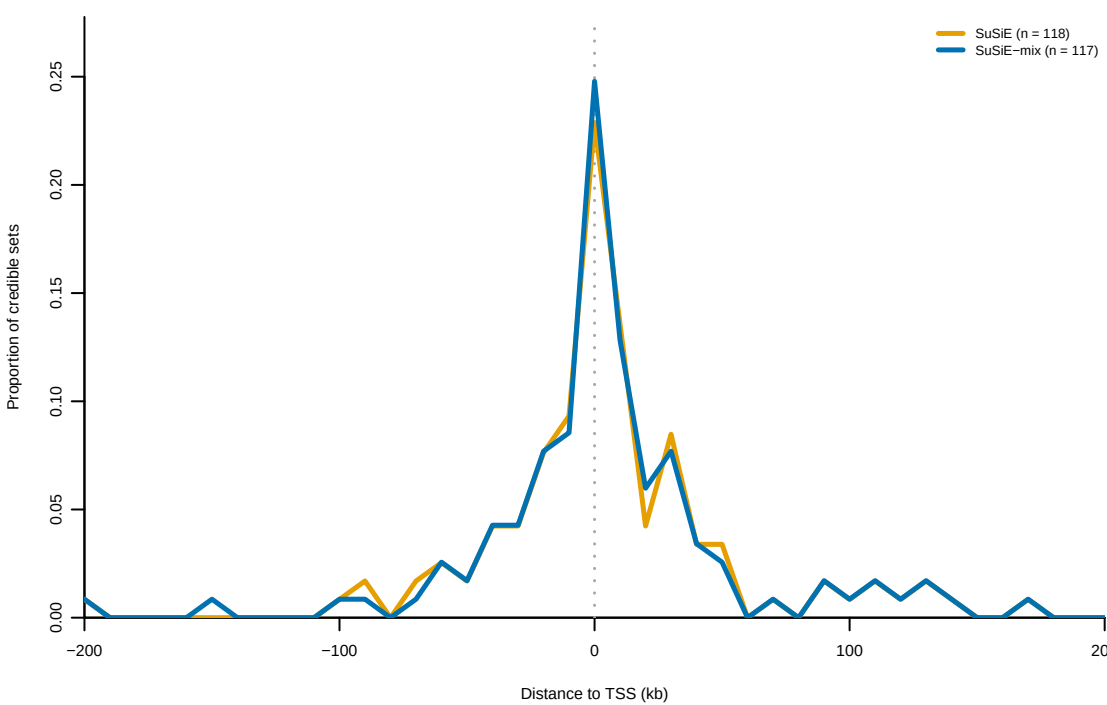

Liver: mixed-model coding patterns

Additive lead CS: 85.2%; overall: 84.7%; over-additive (FDR 1)

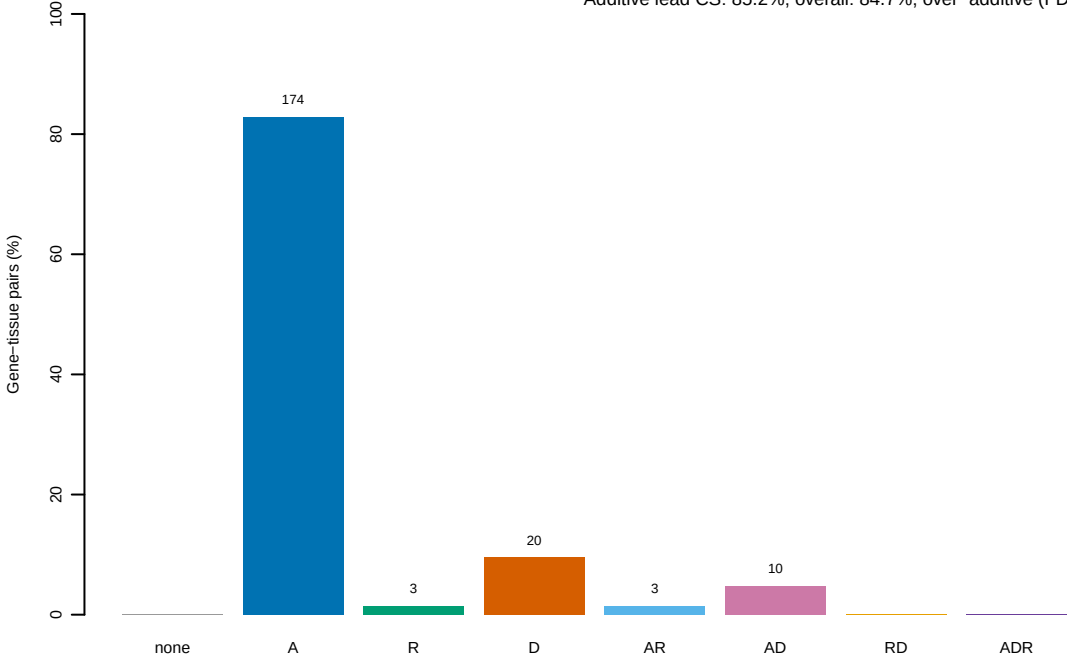

Liver: CS lead SNPs around the TSS

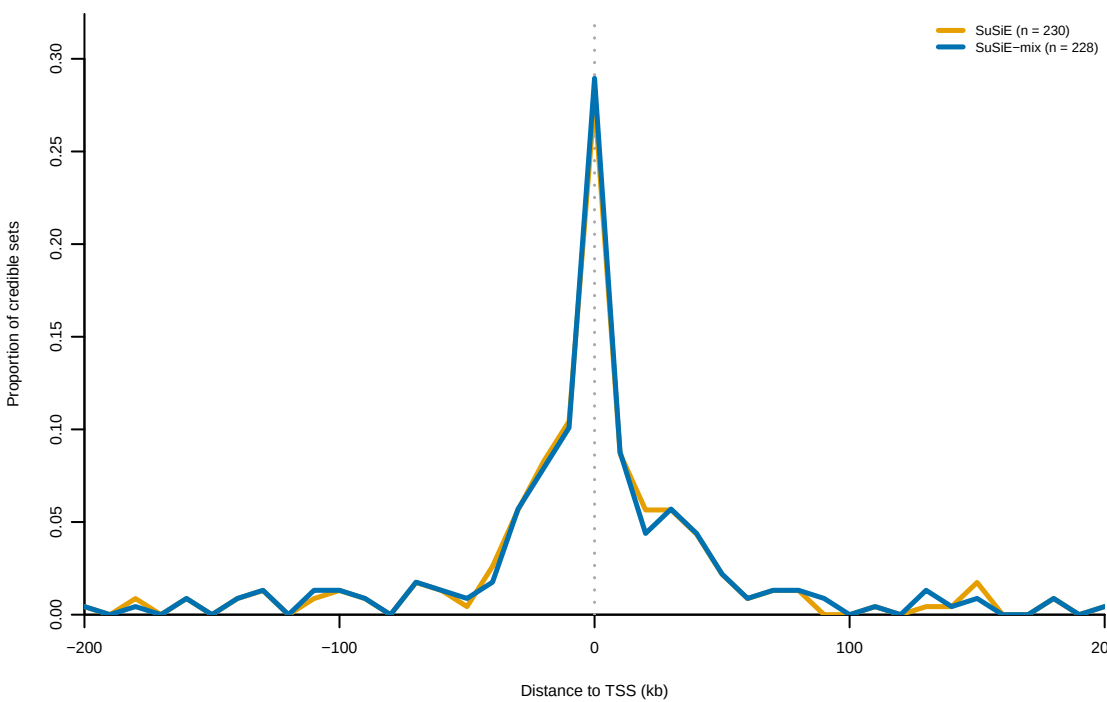

Breast: mixed-model coding patterns

Additive lead CS: 85.2%; overall: 84.7%; over-additive (FDR 1)

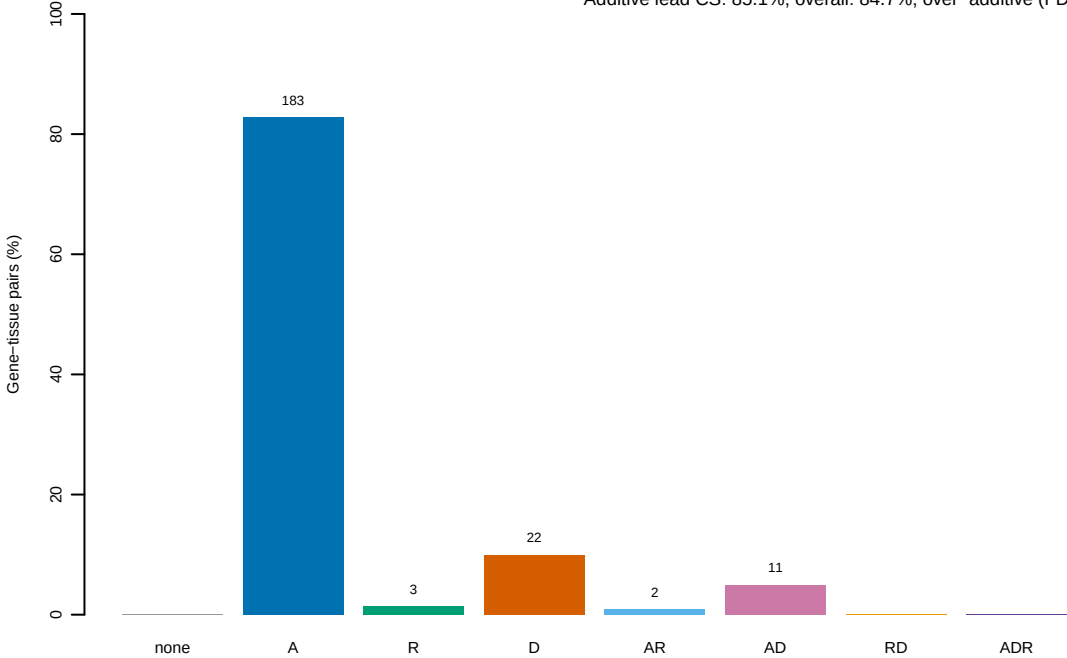

Breast: CS lead SNPs around the TSS

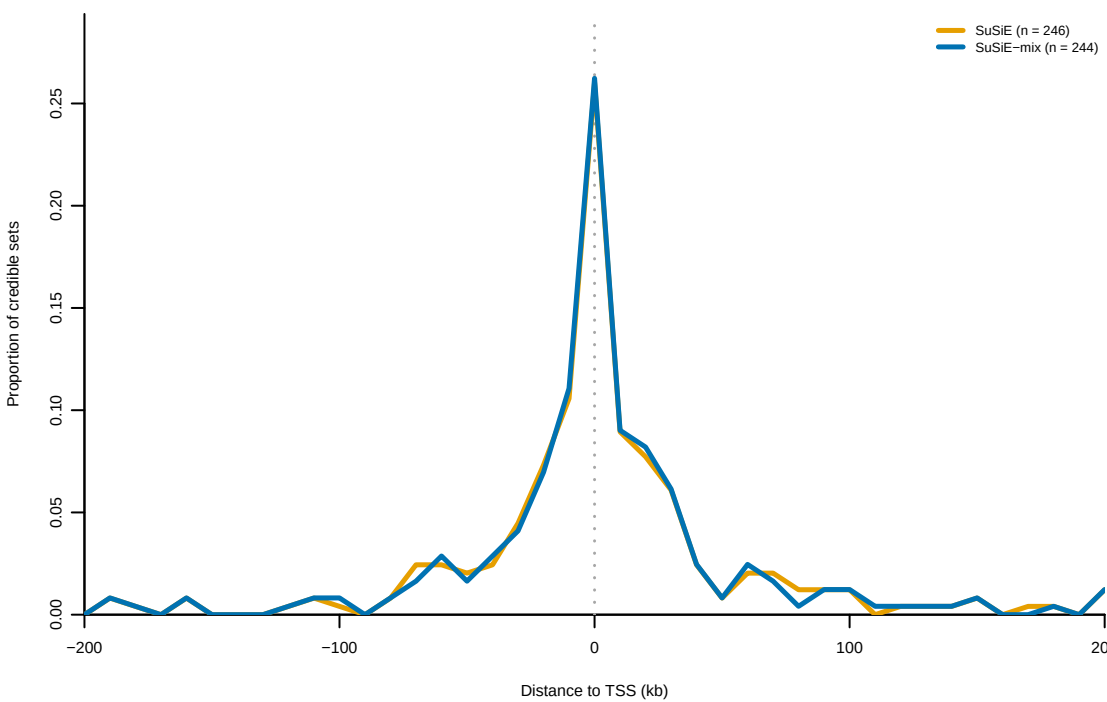

Esophagus: mixed-model coding patterns

Additive lead CS: 85.1%; overall: 84.7%; over-additive (FDR 1)

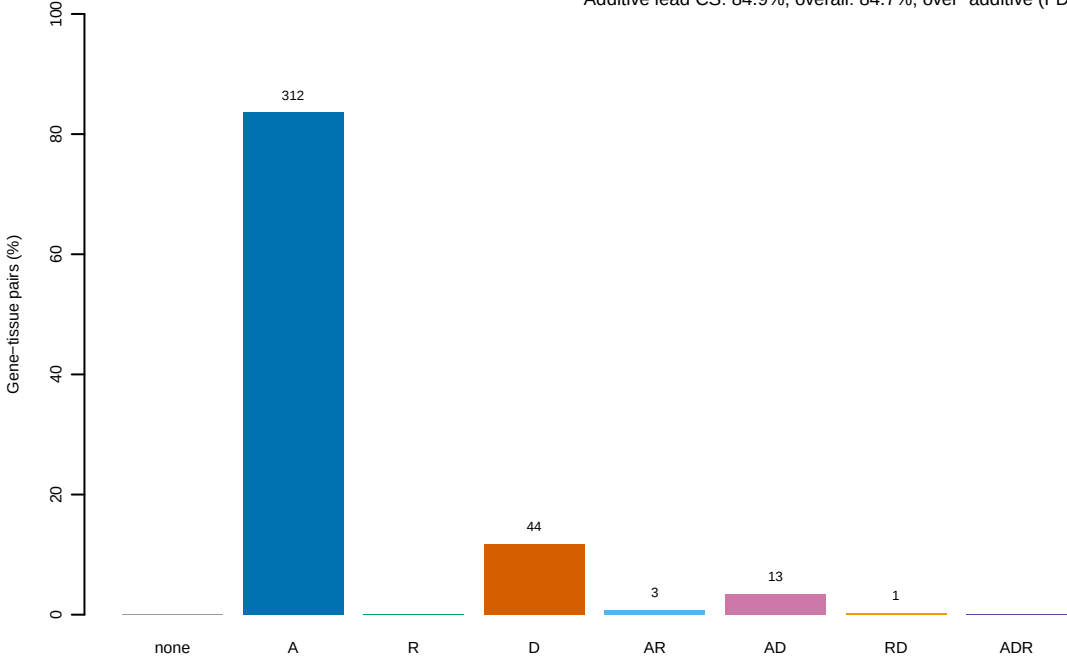

Esophagus: CS lead SNPs around the TSS

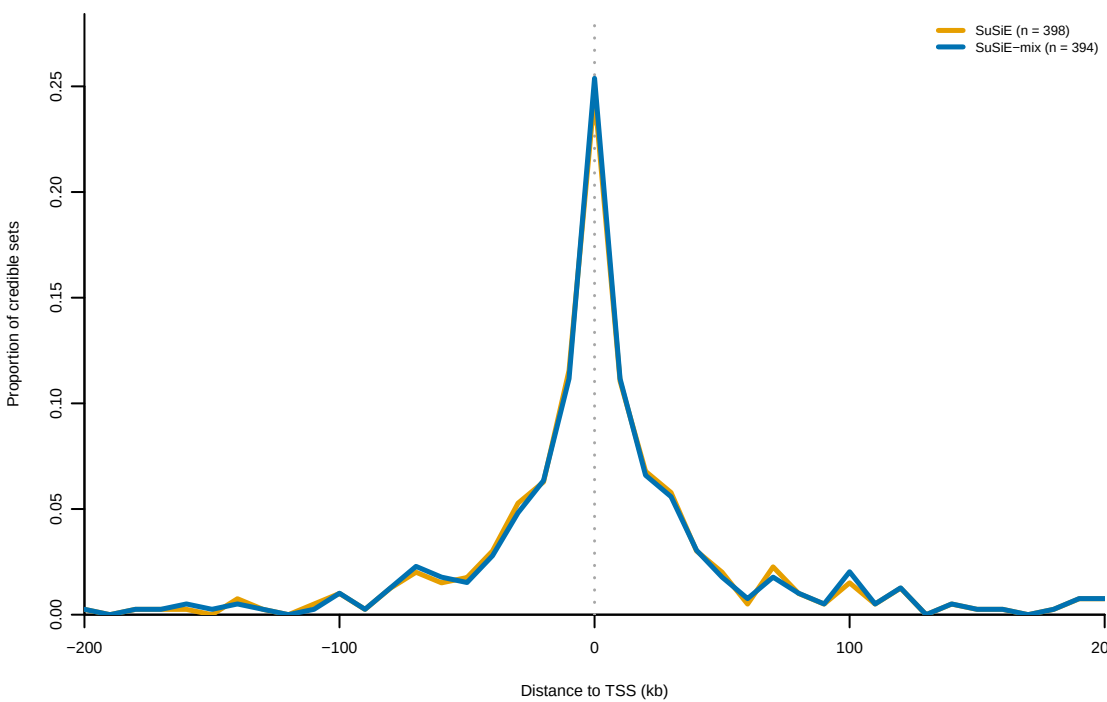

Testis: mixed-model coding patterns

Additive lead CS: 84.9%; overall: 84.7%; over-additive (FDR 1)

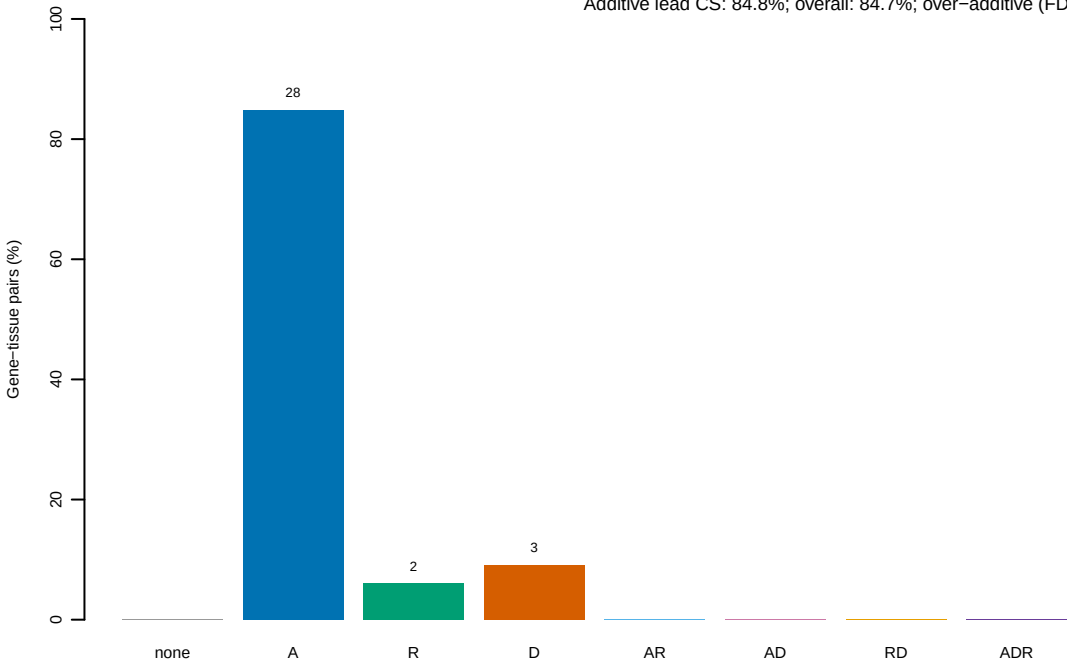

Testis: CS lead SNPs around the TSS

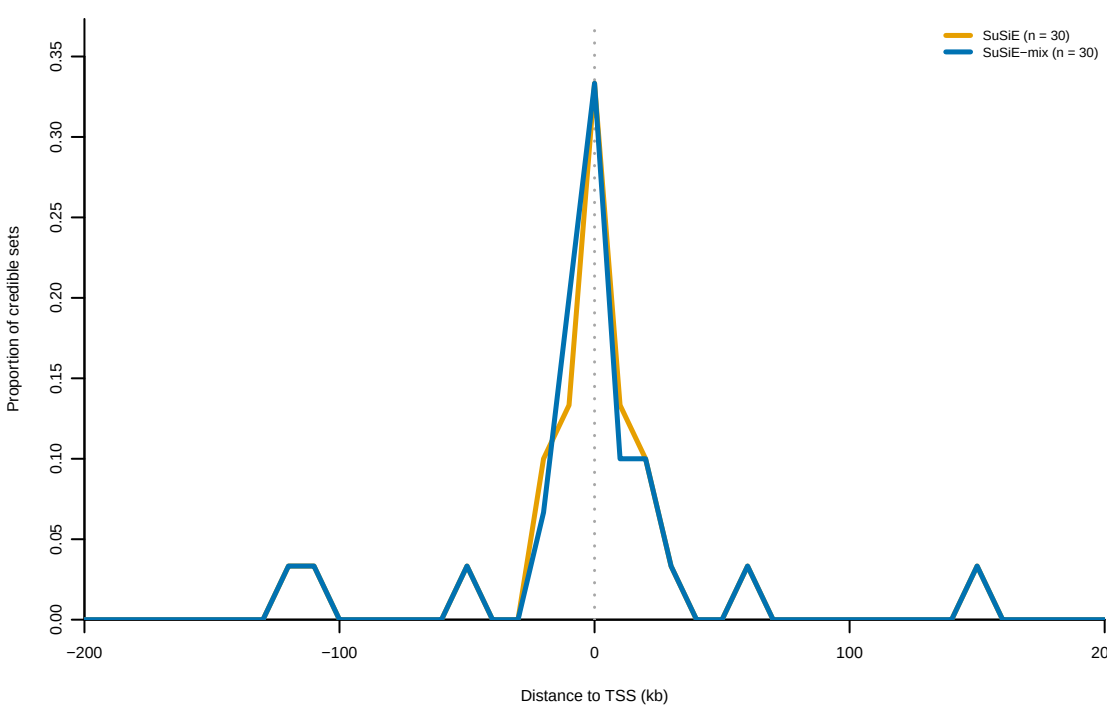

Vagina: mixed-model coding patterns

Additive lead CS: 84.8%; overall: 84.7%; over-additive (FDR 1)

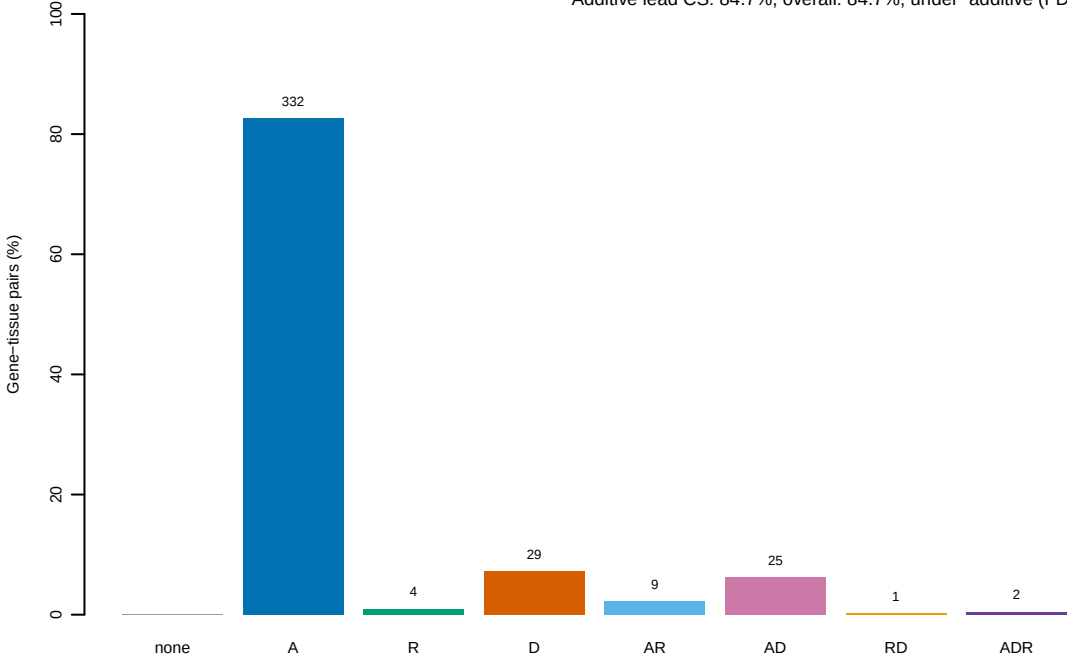

Vagina: CS lead SNPs around the TSS

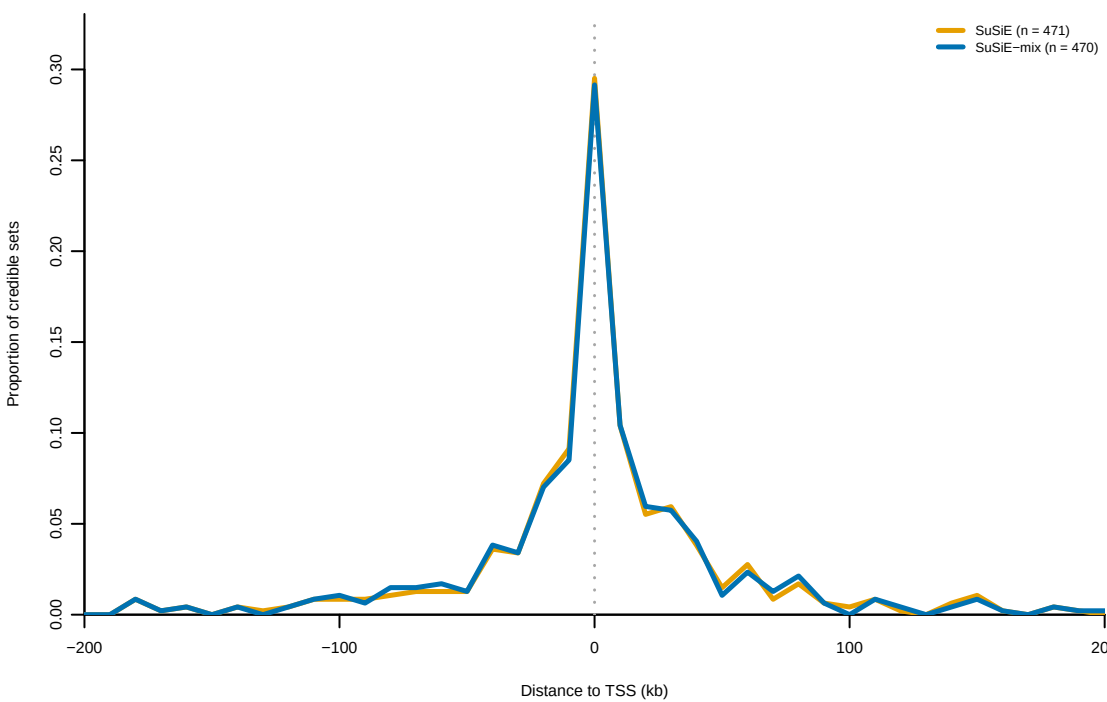

Adipose Tissue: mixed-model coding patterns

Additive lead CS: 84.7%; overall: 84.7%; under-additive (FDR 1)

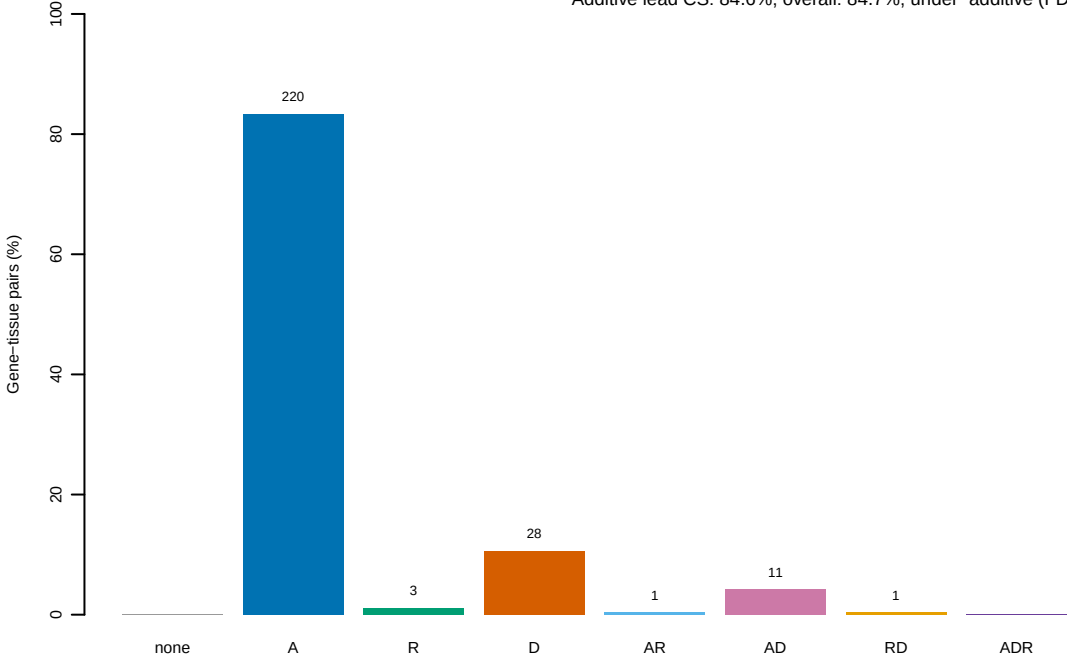

Adipose Tissue: CS lead SNPs around the TSS

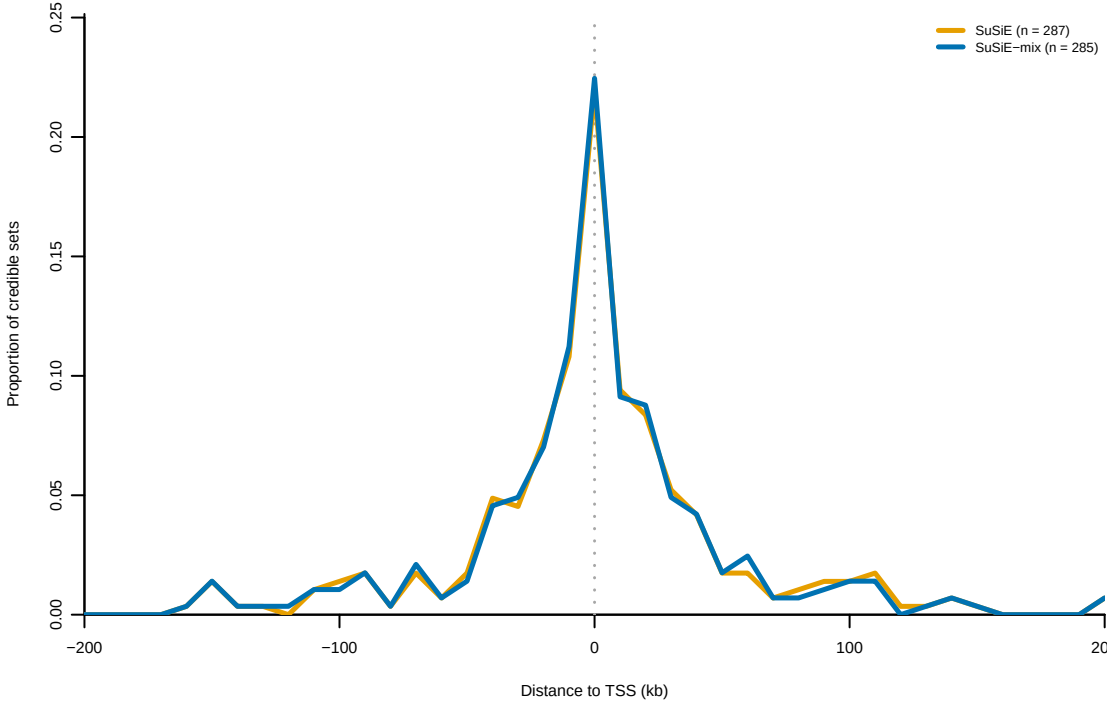

Pituitary: mixed-model coding patterns

Additive lead CS: 84.6%; overall: 84.7%; under-additive (FDR 1)

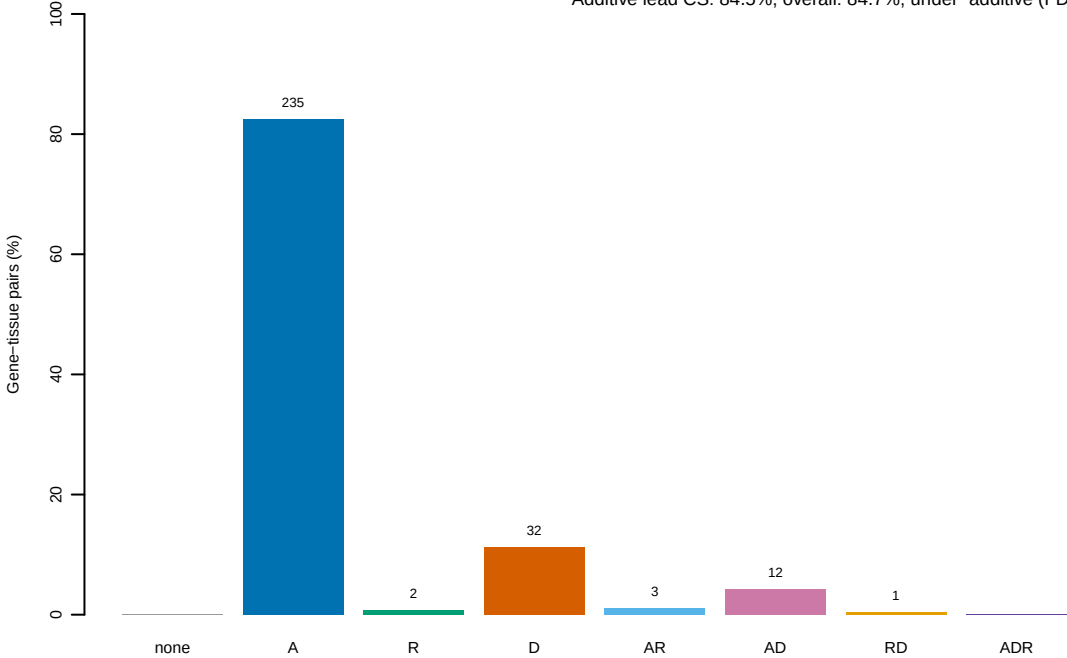

Pituitary: CS lead SNPs around the TSS

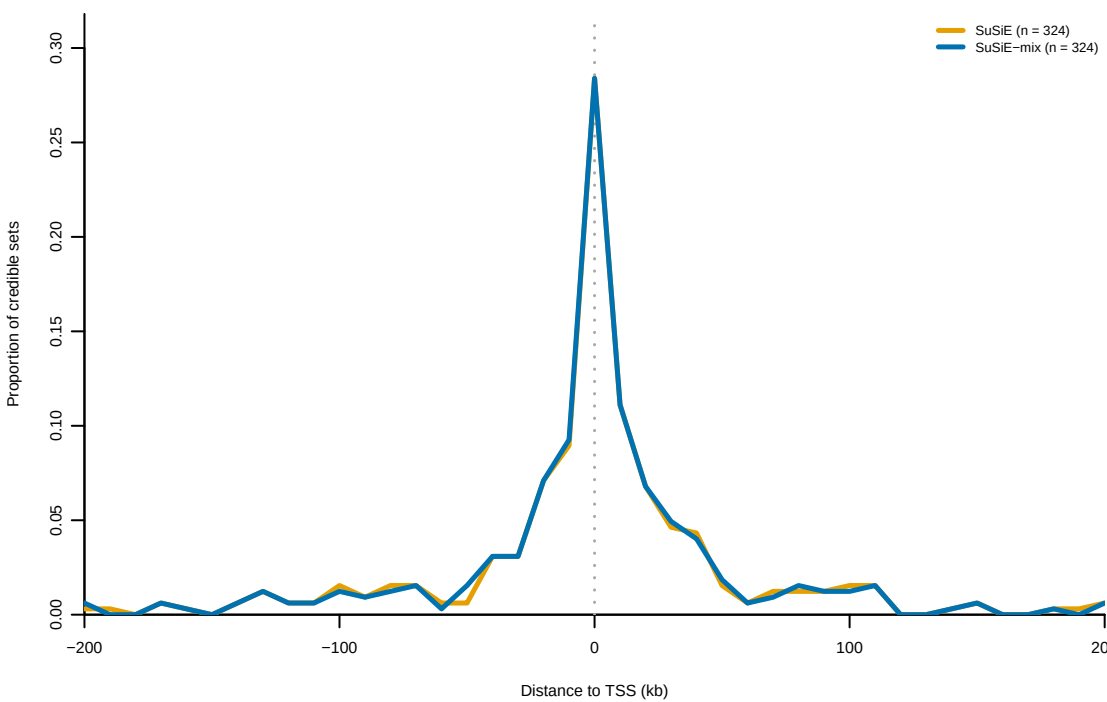

Lung: mixed-model coding patterns

Additive lead CS: 84.5%; overall: 84.7%; under-additive (FDR 1)

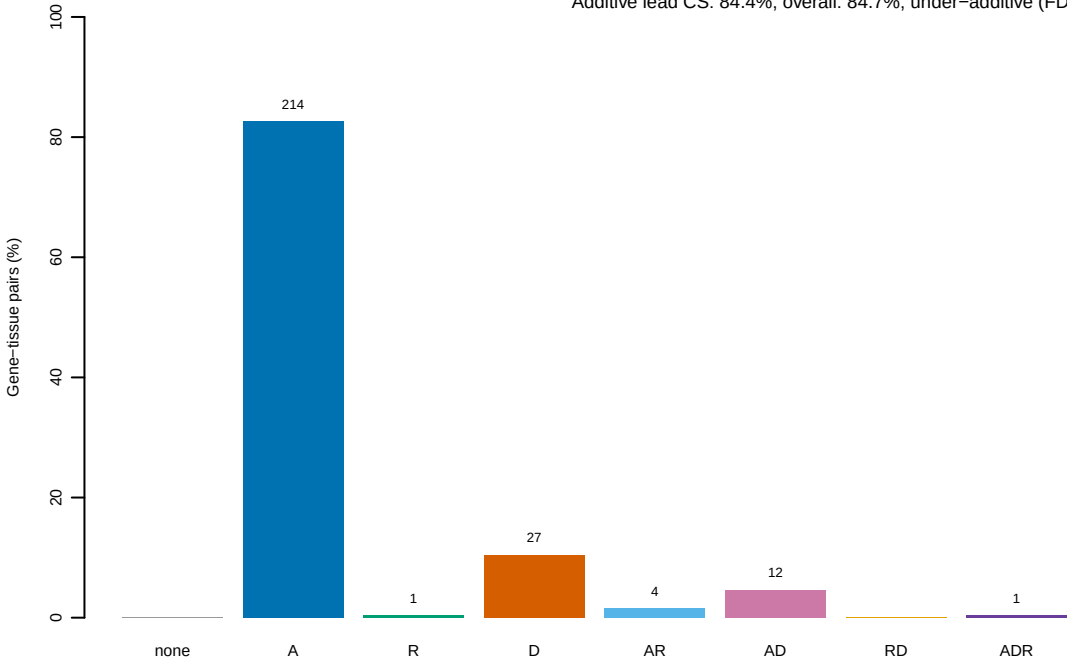

Lung: CS lead SNPs around the TSS

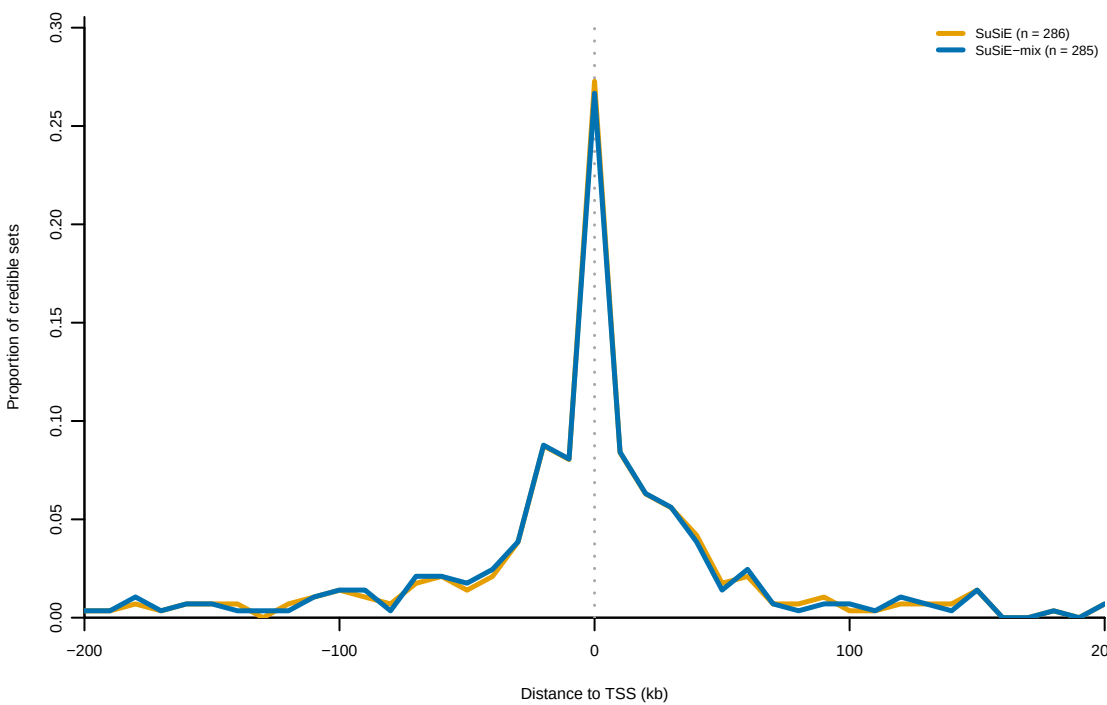

Colon: mixed-model coding patterns

Additive lead CS: 84.4%; overall: 84.7%; under-additive (FDR 1)

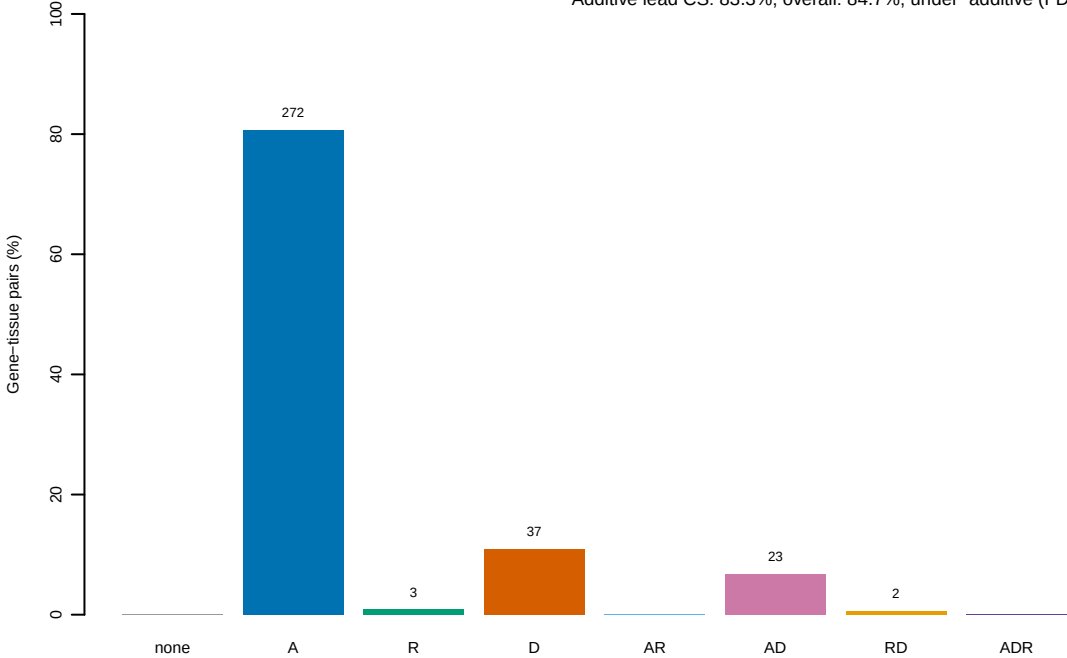

Colon: CS lead SNPs around the TSS

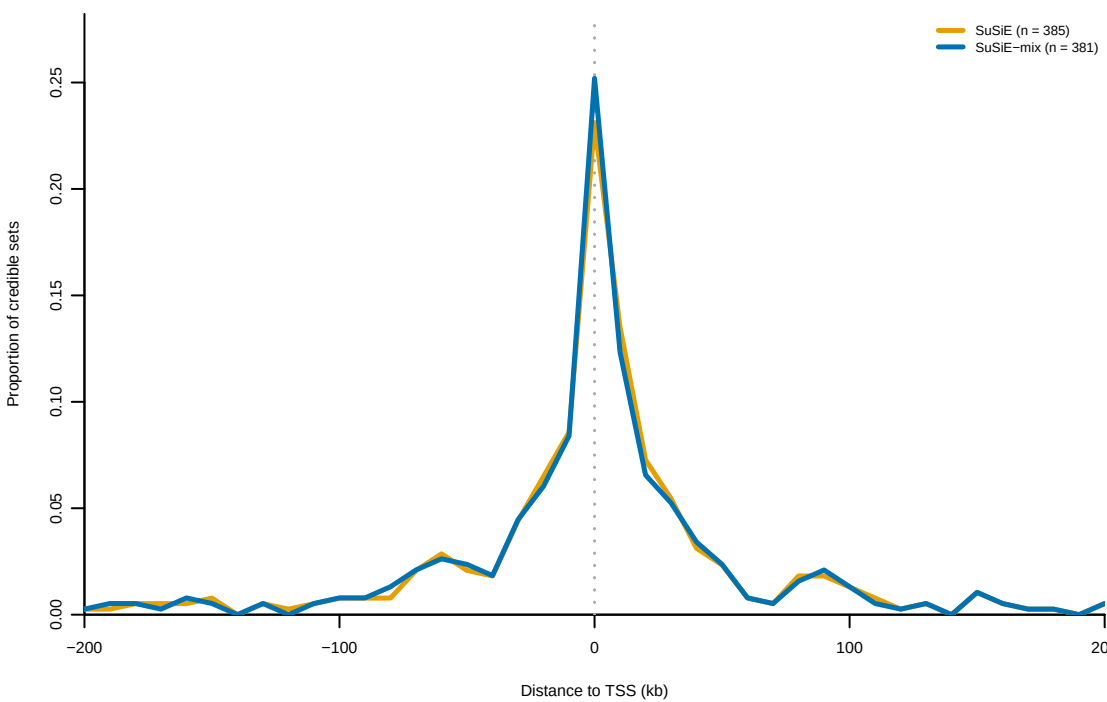

Skin: mixed-model coding patterns

Additive lead CS: 83.3%; overall: 84.7%; under-additive (FDR 1)

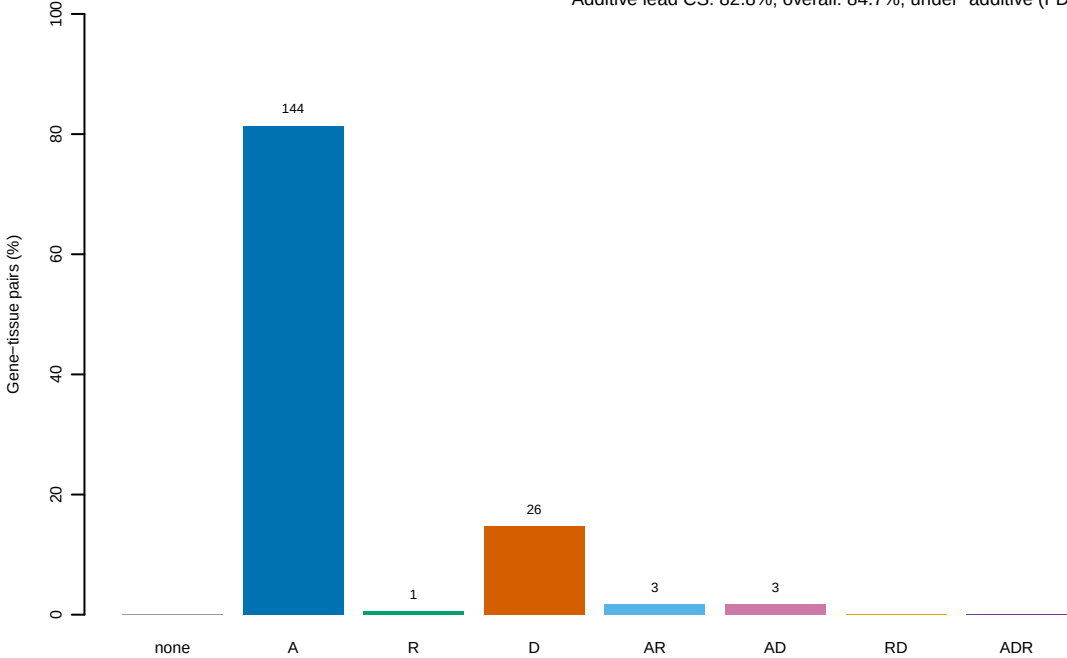

Skin: CS lead SNPs around the TSS

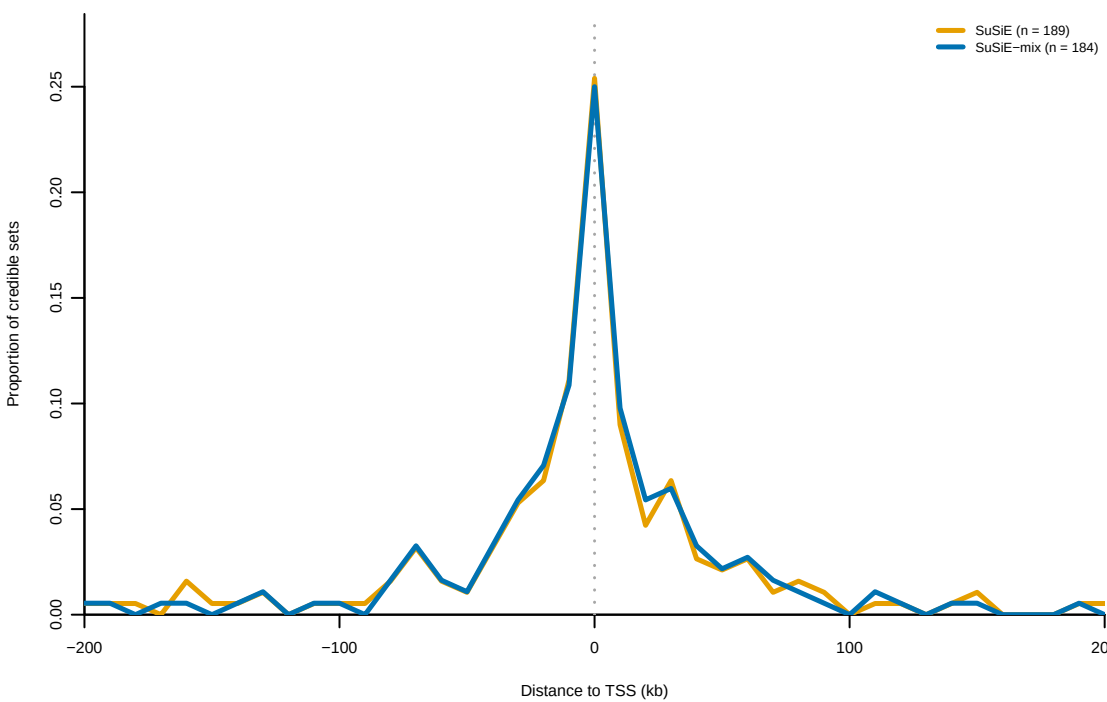

Pancreas: mixed-model coding patterns

Additive lead CS: 82.8%; overall: 84.7%; under-additive (FDR 1)

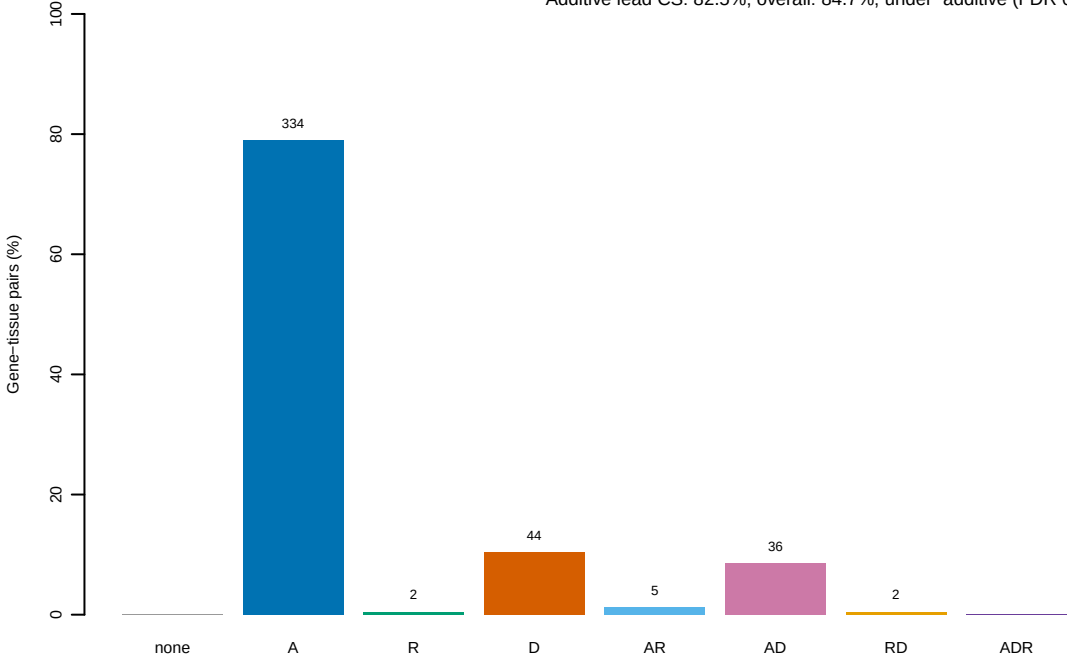

Pancreas: CS lead SNPs around the TSS

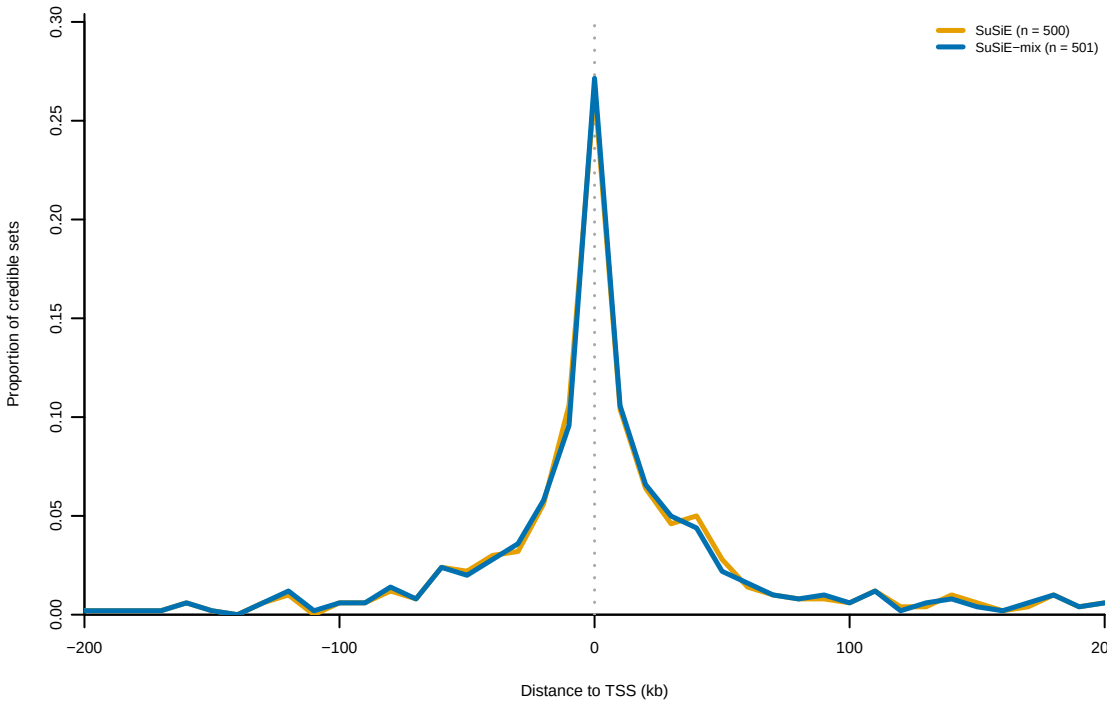

Muscle: mixed-model coding patterns

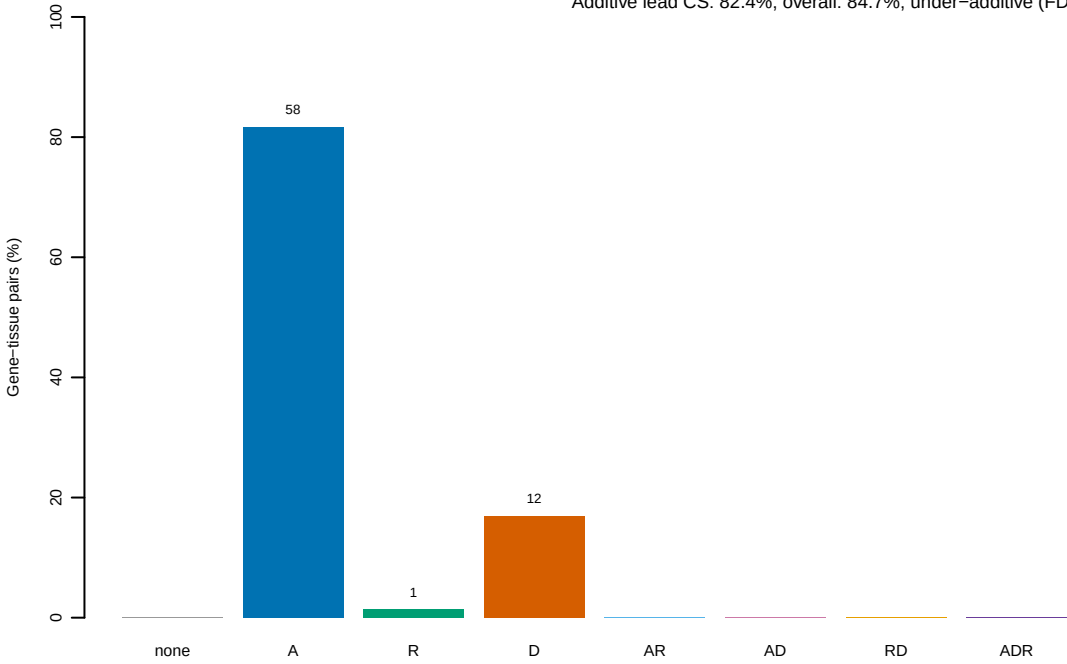

Additive lead CS: 82.5%; overall: 84.7%; under-additive (FDR 0.98)

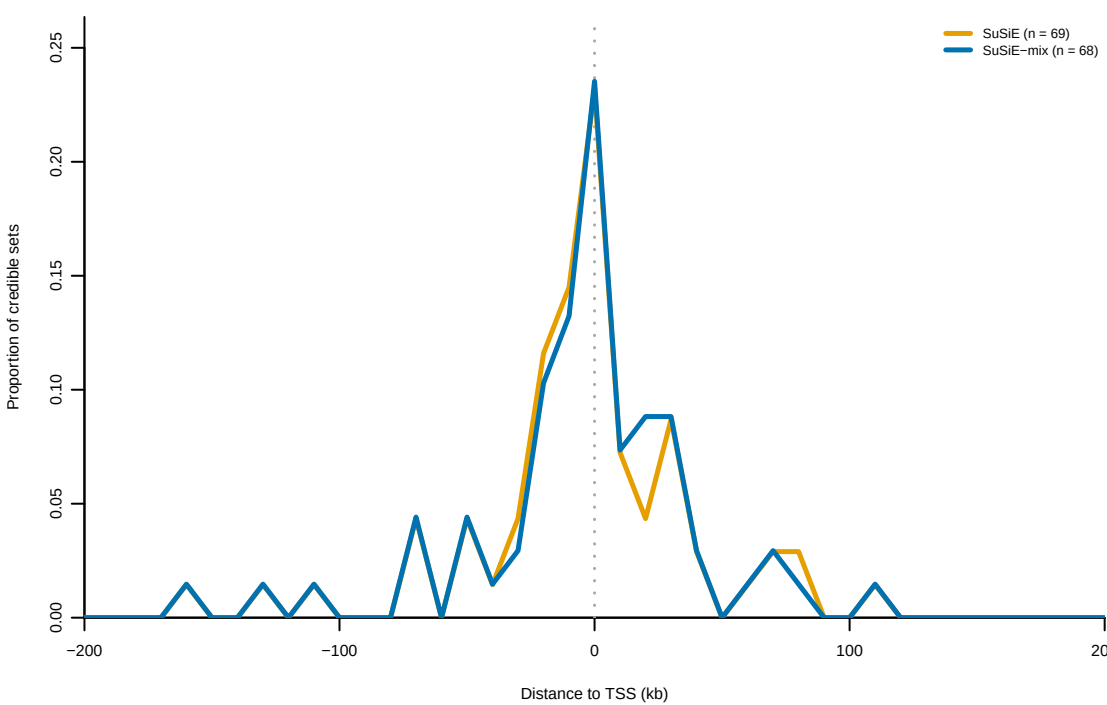

Muscle: CS lead SNPs around the TSS

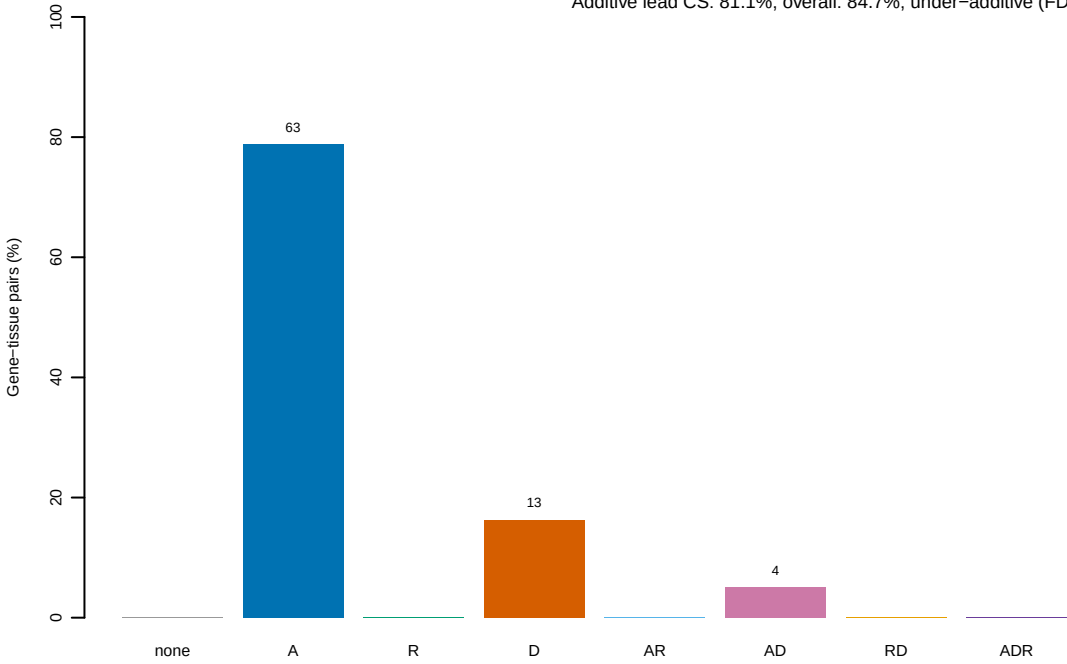

Ovary: mixed-model coding patterns
Additive lead CS: 82.4%; overall: 84.7%; under-additive (FDR 1)

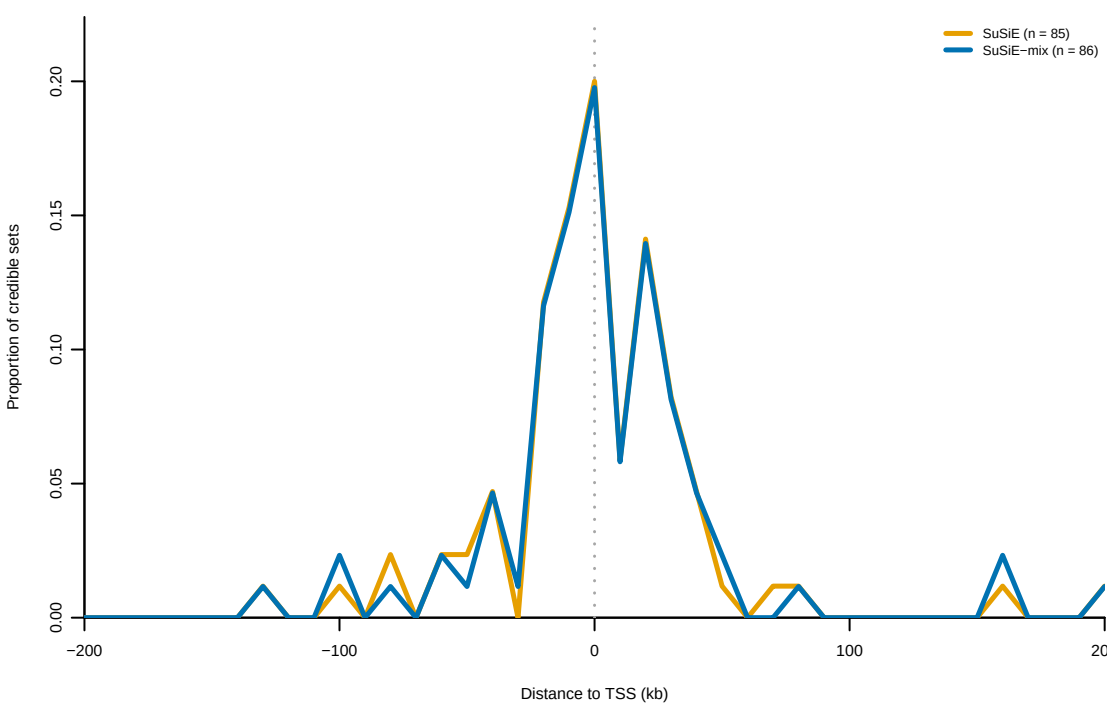

Ovary: CS lead SNPs around the TSS

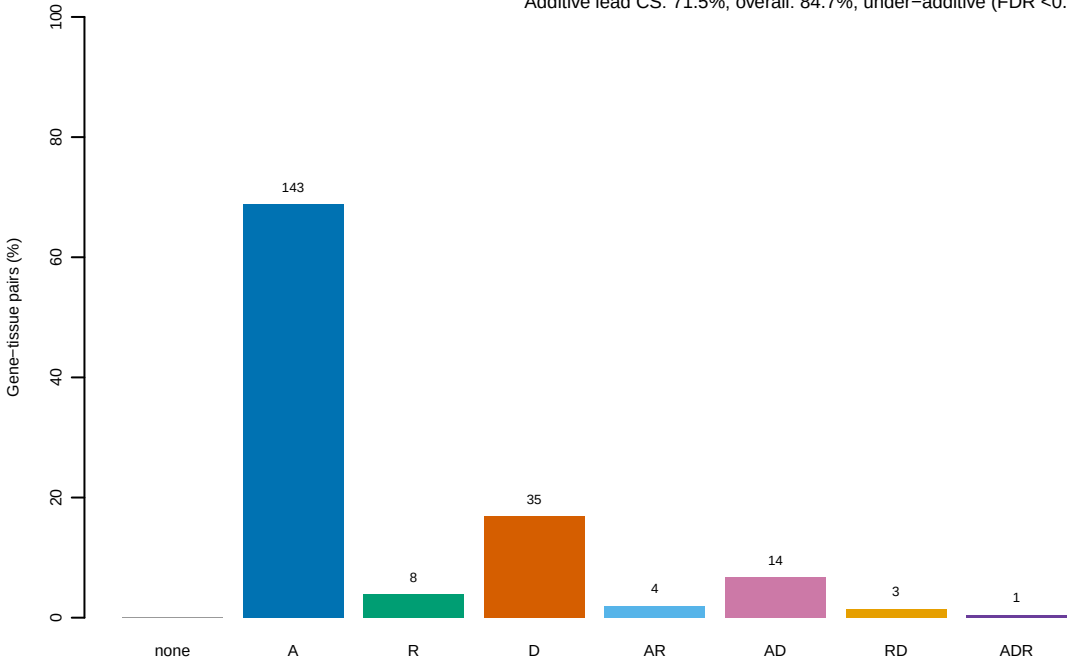

Brain: mixed-model coding patterns
Additive lead CS: 81.1%; overall: 84.7%; under-additive (FDR 1)

Brain: CS lead SNPs around the TSS

Blood: mixed-model coding patterns
Additive lead CS: 71.5%; overall: 84.7%; under-additive (FDR <0.001)

Blood: CS lead SNPs around the TSS
